A3. BASIC LOCAL EXCHANGE SERVICE

A3.16 Verizon Local Calling Plans (Continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

The Company will not connect a call to a nonpublished subscriber on behalf of another caller when the caller does not furnish the nonpublished number to the Company. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the subscriber's request to refrain from publishing his telephone number in the directory does not create any relationship or obligation, directly or indirectly, to any person other than the subscriber.
- d. In the absence of gross negligence or willful misconduct, no liability for damages arising from publishing a nonpublished number in the directory or disclosing said number to any person shall attach to the Company and, where such a number is published in the directory, the Company's liability shall be limited to and satisfied by a refund of any monthly charges which the Company may have made for such nonpublished number. At the subscriber's request, the Company will change the nonpublished telephone number at no charge to the subscriber.

A3. BASIC LOCAL EXCHANGE SERVICE

A (continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.
