Ms. Beth W. Salak, Director  
Division of Competitive Markets and Enforcement  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Dear Ms. Salak:

Attached are new tariff pages filed to become part of the Verizon Florida Inc. General Services Tariff.

Section A10 Digital Network Services  
5th Revised Page 47  
9th Revised Page 49

The purpose of this filing is to update a definition and term and volume service structure in the Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) section of the tariff.

If you require additional information, please call Carlton Ball at (813) 483-2529.

Sincerely,  
David M. Christian  
Assistant Vice President  
Regulatory Affairs Florida

## A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

## .4 PRI Features and Definitions

## a. Standard Features

Calling Line Identification – Number Only(D)  
(N)

Calling Number Identification allows the customer to have access to the directory number of the calling party. (N)

Call-by-Call Access

A customer specified arrangement of "B" channels is used to access services available in the ISDN-PRI serving central office switch. The customer will be allowed to mix dedicated services and call-by-call access on the same ISDN-PRI Service. To utilize call-by-call access, the customer must specify, at subscription time, the quantities of channels that will be utilized for a specific service on the ISDN-PRI Service. The "B" channels will be assigned and billed the maximum quantity specified. With this feature, separate facilities are not required for individual services, such as DID/DIOD, WATS, 800/877/888 services, and local switched access lines.

Clear Channel Capability

Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.

Non-Facility Associated Signaling (NFAS)

NFAS allows the D-channel signaling entity to assign calls to channels on more than one interface (including the one containing the D-channel). The collection of these B-channels and the controlling D-channel is called a PRI group. Up to 20 DS1 Facilities can be assigned to a PRI group.

## b. Optional Features

Network Ring Again

Network Ring Again allows a calling station encountering a busy to activate the central office switch to notify the calling station when the called station becomes idle. The calling station can then activate the switch to complete the call.

This feature is available on a limited basis and only functions within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per line so arranged.

"D" Channel Back-up

In arrangements of two or more ISDN-PRI's, this service provides enhanced continuity of service by allowing a "D" channel of one ISDN-PRI to automatically take over for a failed "D" channel of another ISDN-PRI.

This feature is available on a limited basis and only available within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per customer group. This feature is only provided when ISDN-PRI is offered under a contract term commitment.

## A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

## .6 Rate Structure (Continued)

- m. The flat rate Extended Calling Service (ECS) option will permit flat rated ECS calling upon as many voice flat rate channel activations as equipped by the customer, up to twenty-four (24), per Switched Facility. Note: This service will not be available to customers subscribing to channel activations other than flat rate channels, i.e., Switched Data or Voice/Data Measured Rate channels.

The flat rate ECS option is offered under a one-, two-, three-, or five-year contract period. A Monthly Recurring Charge (MRC) will be charged per quantifying ISDN-PRI Switched Facility. This charge will apply in addition to any other charges for tariffed services as part of the customer's monthly bill. This option is included in the PRI Term and Volume Flat Rate contracts and 2 and 3-year Corporate Rewards contracts.

- n. The Foreign Central Office/Foreign Exchange Special Transport charge applies on a per airline mile basis between the serving central office and the customer's normal central office except when the customer's serving central office is part of a Remote Switching Cluster.
- o. The PRI Access Term & Volume Packages include the PRI Access, the DS1 Switched Facility, and the B Channel Activation, Caller ID, D Channel Backup, NFAS and ECS (flat rate only). The PRI Access Term & Volume packages without the DS1 Switched Facility includes the same items except the DS1 Switched Facility. The options are flat rate voice and measured usage/data channels.
- p. Customers with existing PRI contracts may convert to a new contract plan without incurring termination liability charges provided the value of the new contract is equal to or greater than the remaining value of the existing contract plan.
- q. All of a customer's Telephone Company provided PRIs within a state will count towards the volume contract threshold. Volume contract customers may change the number of PRIs during the volume term period. In the event customers under a volume contract make subsequent PRI increases or decreases that cause the total number of PRIs to fall within a different threshold level, all remaining PRIs will be billed at the applicable level rate for the remainder of the volume contract term period. The customer must provide the account information of the PRIs included in the Term and Volume option at the time of the initial installation of service and with each change to the service. (D)
- r. During the contract period, the customer may add PRI services at the same monthly rate as specified in the initial contract or the customer may add PRI services on a month-to-month or contract basis. The contract period for these additional PRI services will not end concurrently with PRI's from the initial contract.
- s. PRIs on two-year volume or Corporate Rewards contract customers may subscribe to 3-year contract PRI features and facilities when 2-year contract rates are not available.
- t. The PRI Access NRC does not apply for PRIs enrolled in a 2 or 3-year Corporate Rewards plan nor the 2 or 3-year Term and Volume plans.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.4 PRI Features and Definitions

a. Standard Features

Intra-Service Caller ID

(D)

~~Intra-Service Caller ID allows the delivery of caller ID between an ISDN-PRI Service and a CentraNet® system or between two or more ISDN-PRI Services belonging to the same customer~~

(D)

~~Calling Line Identification – Number Only~~

(N)

Calling Number Identification allows the customer to have access to the directory number of the calling party.

(N)

Call-by-Call Access

A customer specified arrangement of "B" channels is used to access services available in the ISDN-PRI serving central office switch. The customer will be allowed to mix dedicated services and call-by-call access on the same ISDN-PRI Service.
