Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, Florida 32399-0850

Dear Ms. Salak:

Pursuant to Florida Statute 364.05, we are filing herewith revision to our Access Service Tariff. Following is the page being filed:

General Subscriber Service Tariff	
A12	Fourth Revised Page 109

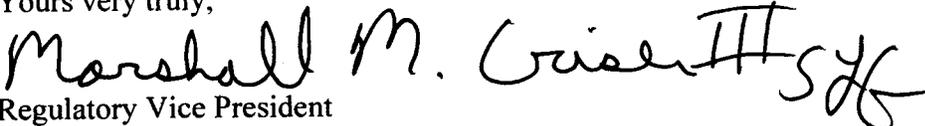

With this tariff filing, BellSouth Telecommunications, Inc. is introducing Simultaneous Ring (a Centrex feature).

Attachment A provides additional supporting and explanatory information for the proposed tariff revision. This attachment constitutes a comprehensive package, which fulfills the basic requirements for supporting data specified in Rule 25-9.05.

Acknowledgment, date of receipt, and authority number of this filing are requested. A duplicate letter of transmittal is attached for this purpose.

Your consideration and approval will be appreciated.

Yours very truly,

Regulatory Vice President

Attachment(s)

EXECUTIVE SUMMARY

Introduction

The purpose of this filing is to provide appropriate tariff language and support documentation for the second phase implementation of Centrex Simultaneous Ring (“SimRing”) feature (*Customer Managed*, which allows the customer to add, change, or delete the non-pilot destination numbers) in the Florida GSST tariff.

Description of Tariff

BellSouth’s SimRing is a terminating feature that allows simultaneous notification on an incoming call to a Centrex “pilot” directory number (PDN) and up to four other “non-pilot” member directory numbers (NPMDN). The PDN must be an analog (non-ISDN) Centrex station; the NPMDNs can be wireline Centrex or non-Centrex numbers, including ISDN, or wireless/cellular telephone numbers.

Calls dialed to a Centrex station (PDN) equipped with the SimRing feature will ring the Centrex PDN telephone and any valid user-defined NPMDN telephones. The first phone to answer the call connects to the calling party. The other phones stop ringing and are available for other calls. The caller doesn’t know that all the SimRing group NPMDNs have received notification of the call.

This feature will only be provided for BellSouth Centrex Service and is not available for ESSX or MultiServ customers.

The benefit to BellSouth Centrex customers subscribing to the SimRing optional feature is improved accessibility (i.e., greater convenience) by allowing incoming calls to ring at multiple locations. Customers can be mobile and never miss a call while being accessible to their customers or employees without providing a detailed itinerary. The target market identified will likely consist of Large Business customers (Enterprise and Major/Regional customers), such as Higher Education, Government, Manufacturing, Real Estate, and Sales. The SimRing marketing strategy includes retention and “stickiness”.

Cost Information

SimRing Phase 2 will cover its costs.
