LOCAL EXCHANGE SERVICES PRICE LIST

ISSUED: February 26, 2008

SECTION 7

EFFECTIVE: February 27, 2008

THIRD REVISED PAGE 25.1

BY: Carol Paulsen-Price List Administrator CANCELS SECOND REVISED PAGE 25.1

7. AT&T LOCAL EXCHANGE SERVICES

7.9 AT&T Local Exchange Services-ISDN PRI (Cont'd)

After reconfiguration to the alternative service, if the Customer's usage changes so that it no longer exceeds the criteria stated above, the Customer may request that the Company reconfigure the service back to the original service, with its associated rates and features. The Company will review the request and, upon determination that usage no longer exceeds the above criteria after two full billing periods, reconfigure the Customer's service back to the original service within 30 days.

A. Customer Not Ready Charges

AT&T may begin billing customers the monthly recurring charges for access when the customer refuses or delays installation of service. If the customer reschedules or refuses service after 30 days of their Firm Commitment date, AT&T may bill the customer the monthly recurring charges for access beginning thirty-one (31) days after the original installation date.

B. Vendor No Show Charges

AT&T may begin billing customers the monthly recurring charges for access as a result of the customer's vendor not showing up at the time of cutover. The first time the customer's vendor does not show up, the customer will be requested to reschedule a new date within 14 days. If the customer's vendor is a No Show twice, AT&T may begin billing the customer the monthly recurring charges for access.

C. Original Called Number (OCN)

(T)

This feature, which must be ordered for specific ALS ISDN PRI trunks, places the callers original dialed digits into the OCN field of the selected ISDN message for inbound calls which have been forwarded one or more times. These ISDN messages, containing OCN information, will be transmitted over the designed Data-Channels (D-Channels, primary, secondary, and back up on the ISDN trunk.

Refer to the RATE SCHEDULE.

EFFECTIVE: February 27, 2008

SECOND REVISED PAGE 39

BY: Carol Paulsen-Tariff Administrator

CANCELS FIRST REVISED PAGE 39

7. AT&T LOCAL EXCHANGE SERVICES

7.16 SECONDARY EXCHANGE SERVICE

(T)

Secondary Exchange Service enables an ALS DS-1 Digital Facilities, ALS ISDN PRI or AT&T Business Trunks service customer to originate calls from a remote calling Secondary exchange within the customer's LATA (Originating Secondary Exchange service), and receive calls as if they were being placed to the Secondary exchange calling area (Terminating Secondary Exchange service). Secondary Exchange Service customers remain responsible for all DS-1 Digital Facilities, ISDN PRI or Business Trunks service calls utilizing Secondary Exchange Service.

Secondary Exchange service is only available in conjunction with ALS DS-1 Digital Facilities, ALS ISDN PRI or AT&T Business Trunks services.

The Secondary exchange must 1) be in the same LATA as the customer's local calling area, 2) be in a rate center where AT&T also provides local service, and 3) be served by the same AT&T switch as the Customer's local calling area.

The customer must designate separate trunk groups for primary local service and Secondary Exchange service. These trunk groups can be within the same T1.

The Billing Telephone Number assigned to the Secondary trunk group will correspond to the assigned Secondary rate center. DID Secondary numbers, up to a maximum of 20 DID numbers per trunk, can be ordered on this trunk group. Customers requiring more than 20 DID numbers must order additional Secondary trunk groups. A maximum of 3 trunk groups are allowed per trunk.

The customer's premises must have a customer provided compatible Private Branch Exchange (PBX) system or multiline terminating system and the customer must assign separate dial-out service to the Secondary Exchange trunk group(s) than to the customer's primary local service (e.g., dial "9" for primary local service and Dial "8" for Secondary Exchange Service).

Secondary Exchange Service does not provide access to 911 service. The customer is responsible for programming their PBX to route 911 calls over the customer's primary local service trunk groups.

Secondary Exchange Service charges are in addition to ALS DS-1 Digital Facilities, ALS ISDN PRI or AT&T Business Trunks service charges.

Refer to the RATE SCHEDULE for rates and charges.

CANCELS SECOND REVISED PAGE 40

7. AT&T LOCAL EXCHANGE SERVICES

7.17 ALTERNATE ENHANCED REDIRECT SOLUTION (AERS)

(T)

7.17.1 Description

Alternate Enhanced Redirect Solution will provide customers the ability to redirect incoming telephone numbers in the event their primary location is unavailable. AERS also provides the additional capability to redirect incoming traffic to a predefined redirect option within two minutes of completing the control call. Customers will be able to define and control how to route critical calls in the event of an emergency.

AERS provides the capability for the customer to predefine redirect telephone numbers for each incoming telephone number at their location. Calls can be redirected to any ten-digit North American Number Plan (NANP) telephone including toll-free numbers. The customer controls when to invoke and when to restore AERS via a telephone number or control activation number. However, the customer cannot revise the predefined redirect options without a service order.

The customer can create up to nine options including eight redirect options for each Customer Group. A Customer Group is a list of incoming telephone numbers and the customer can have up to 20 Customer Groups per customer location dependent on the total number of telephone numbers being redirected.

When a redirect option is invoked, all incoming telephone numbers within the Customer Group will be redirected to their respective numbers. Customers must use service orders to update Customer Group telephone numbers or redirect options within the Customer Group.

The location that receives the redirected calls must have sufficient lines and associated facilities to handle the estimated or actual number of calls without interfering with the exchange or toll service. In the event that there is interference with exchange or toll service, AT&T reserves the right to disconnect any redirect option immediately.

The customer controlled redirect option is available for business lines and trunks as well as incoming telephone numbers to a PBX or other CPE.

THIRD REVISED PAGE 41

BY: Carol Paulsen-Tariff Administrator

CANCELS SECOND REVISED PAGE 41

7. AT&T LOCAL EXCHANGE SERVICES

7.17 ALTERNATE ENHANCED REDIRECT SOLUTION (AERS) (Cont'd)

(T)

7.17.1 Description (Cont'd)

AERS calls must be redirected to a customer designated location or telephone number, an Interexchange carrier's point of presence, a voice mail system, an announcement, or an auto attendant system. A redirected telephone number cannot be used to trigger a call to be redirected to another redirecting telephone number.

It is the responsibility of the customer to obtain, when appropriate, any necessary permission of the party to whom the calls will be redirected. AT&T assumes no liability to the customer for the redirecting of calls.

AERS is not to be used by customers to avoid toll charges. If a customer is using this service to avoid such charges, AT&T reserves the right to disconnect the service immediately and bill all appropriate toll charges.

Charges for the call between customer numbers equipped with redirection and the number to which the calls are redirected are the responsibility of the customer. The customer will be billed on a usage per call/minutes of use (MOU) basis or flat rates based on MOU.

Refer to the RATE SCHEDULE for rates and charges.

CANCELS SECOND REVISED PAGE 42

7. AT&T LOCAL EXCHANGE SERVICES

7.17 ALTERNATE ENHANCED REDIRECT SOLUTION (AERS) (Cont'd)

(T)

7.17.2 Limitations

- A. AERS supports redirection of incoming call traffic only. It does not provide an alternate means for outbound calling in the event there is a failure in the local loop. In addition, AERS will not protect against failures in the local serving office.
- B. Due to technical limitations, AERS cannot redirect calls that are placed within internal company private network.

Example: An AERS customer whose incoming Telephone Numbers (ITNs) are part of a private network could have calls from outside parties sent to the Redirected Telephone Number (RTN) for that ITN, but calls from other stations on the customer's private network (i.e. an employee in another office) would continue to be completed to the ITN.

Calls to ITNs that have been subscribed to a Terminating Switched Access Arrangement or Access Value Arrangement cannot be redirected under AERS. Additionally, AERS may not be able to redirect calls in cases where the ITN is subject to authorization/account codes, Toll Deny, or similar dialing limitations for the origination of calls.

- C. Each AERS Customer Group must be maintained for a minimum of twelve (12) full months of billing. In the event that an AERS Customer Group is terminated for any reason before completing a stated in the RATE SCHEDULE shall be applied for each such terminated Customer Group.
