Ms. Beth W. Salak, Director
Division of Competitive Markets and Enforcement
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Dear Ms. Salak:

Attached are revised tariff pages filed to become part of the Verizon Florida LLC General Services Tariff.

Section A10. DIGITAL NETWORK SERVICES

6th Revised Page 45
2nd Revised Page 46.1
6th Revised Page 47
3rd Revised Page 47.1
7th Revised Page 48
12th Revised Page 49
7th Revised Page 50
9th Revised Page 51
6th Revised Page 51.1
1st Revised Page 51.2
Original Page 51.3

The purpose of this filing is to introduce new PRI services, which include:

- ISDN PRI Term and Volume One Year rate plans,
- Term and Volume Calling Line Identification with Name,
- B Channel Configurations for Flat Rate Voice/Measured Data,
- B Channel Configurations for Measured Voice/Measure Data.

This filing expands Tie Channel Applications to all CentraNet users not just digital CentraNet users. It also clarifies that older term plans will be grandfathered since newer plans provide better options and lower rates. Additionally, some terms and conditions have been amended to state that Verizon will not charge termination liability on optional features or when the customer disconnects a PRI DS1 Facility and moves it to an alternative high capacity facility.

If you require additional information, please call Joan Gage at (813) 483-2520.

Sincerely,

David M. Christian
Vice President
Regulatory Affairs Florida

Attachments

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI)

.1 General

- a. Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI) Service provides digital access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) is an alternative for individual access services, such as Two Way, Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800/877/888 Services, Wide Area Telecommunications Services, and local business trunks. (C)
- b. ISDN-PRI network interface requirements are described in the Technical Reference Specifications as used by the Telephone Company in the Verizon Technical interface Reference Manual. ISDN-PRI requires compatible customer-provided equipment registered under FCC Part 68.
- c. The customer must provide information regarding the intended use of the service sufficient to permit the Telephone Company to furnish and maintain the service ordered and assure that tariff regulations are followed.

The availability and functions of the features and capabilities for ISDN-PRI Service may vary by serving central office.

.2 Regulations

- a. ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- b. ISDN-PRI Service is typically divided in capacities of twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- c. The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- d. The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- e. The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.
- f. The minimum service period for each ISDN-PRI Service is one (1) month.
- g. Where a customer's ISDN-PRI Service interconnects with an Intermediary Customer (IC) (Interexchange Carrier or other service provider), PRI Access is only permitted within a single customer's ISDN-PRI Service Arrangement. Access to the Telephone Company's network exchange or switched services is not permitted.

(D)

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.3 Definitions (Continued)

d. Intermediary Customer (IC) Services

"B" channels may be dedicated or allowed to interconnect with various services provided by other service providers, such as Interexchange Carriers or Competitive Access Providers. The customer shall be responsible for the ordering of these services.

e. Tie Channel Service

Tie Channel Service provides intercom capability on "B" Channels of ISDN-PRI Arrangements and other CentraNet® systems within the same subscriber network (central office to central office). This feature provides the capability to communicate on a private facility basis, as a tie line between CentraNet® systems served from different central offices. Tie channels on a single ISDN-PRI Arrangement can be configured for intercom calling to a CentraNet® system and local exchange access for the CPE. Intercom calls between an ISDN-PRI Arrangement and a CentraNet® system do not incur usage charges. Calls to telephone numbers outside of a CentraNet® system without intercom capability may incur usage charges. (C)

Tie Channel Service may terminate on CPE at the customer location or at an Intermediary Customer (IC) location. Rates for Tie Channel Service to Customer Premises or Central Office to Central Office are available on a per "B" channel basis or on a per PRI basis when 10 or more "B" channels are activated and are in addition to the normal channel rates. Rates for Tie Channel Service to an IC are available on a per "B" channel basis or on a per PRI basis when 11 or more "B" channels are activated.

Tie Channel Service is available where facilities and conditions permit.

Tie Channel Service will not be provided on a Call by Call Access basis.

f. "B" Channel

The "B" channel is a channel at 64 Kbps that carries digitized customer traffic (voice, data).

g. "D" Channel

The "D" Channel is a signaling channel at 64 Kbps used to control and route "B" channel traffic.

h. Remote Switching Cluster

Remote Switching Clusters exist when the remote switch is dependent on the host switch for its software call processing. A remote switch can process only intra-office calls without the host switch.

i. Foreign Central Office/Foreign Exchange Special Transport

Foreign Central Office/Foreign Exchange Special Transport is a High Capacity Special Transport Facility between a customer's normal serving central office and the central office providing the ISDN-PRI service.

® - Registered Trademark of Verizon

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.4 PRI Features and Definitions

a. Standard Features

Calling Line Identification – Number Only

Calling Number Identification allows the customer to have access to the directory number of the calling party.

Call-by-Call Access

A customer specified arrangement of "B" channels is used to access services available in the ISDN-PRI serving central office switch. The customer will be allowed to mix dedicated services and call-by-call access on the same ISDN-PRI Service. To utilize call-by-call access, the customer must specify, at subscription time, the quantities of channels that will be utilized for a specific service on the ISDN-PRI Service. The "B" channels will be assigned and billed the maximum quantity specified. With this feature, separate facilities are not required for individual services, such as DID/DIOD, WATS, 800/877/888 services, and local switched access lines. This option is grandfathered as of July 1, 2008. Call by Call will no longer be provisioned on new PRIs as of July 1, 2008 except for at existing customer's locations. Existing customers may continue their PRI service provisioned with Call by Call but will need to choose a new B Channel Configuration rate out of the tariff. (C)
|
(C)

Clear Channel Capability

Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.

Non-Facility Associated Signaling (NFAS)

NFAS allows the D-channel signaling entity to assign calls to channels on more than one interface (including the one containing the D-channel). The collection of these B-channels and the controlling D-channel is called a PRI group. Up to 20 DS1 Facilities can be assigned to a PRI group.

b. Optional Features

Network Ring Again

Network Ring Again allows a calling station encountering a busy to activate the central office switch to notify the calling station when the called station becomes idle. The calling station can then activate the switch to complete the call.

This feature is available on a limited basis and only functions within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per line so arranged.

"D" Channel Back-up

In arrangements of two or more ISDN-PRI's, this service provides enhanced continuity of service by allowing a "D" channel of one ISDN-PRI to automatically take over for a failed "D" channel of another ISDN-PRI.

This feature is available on a limited basis and only available within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per customer group. This feature is only provided when ISDN-PRI is offered under a contract term commitment.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.4 PRI Features and Definitions (Continued)

b. Optional Features (Continued)

Calling Line Identification With Name

Calling Line Identification With Name allows the customer to have access to the directory number and name of the calling party. Compatible CPE is required. Calling Line Identification With Name is available only where facilities and conditions permit. Rates for Calling Line Identification With Name are available on a Month-to-Month basis or on a term commitment of 1, 2, 3, 5 years, or Term and Volume for customers subscribing to ISDN-PRI on a term commitment basis. (C)

Two B Channel Transfer

The Two B Channel Transfer feature allows the CPE to accept a call from one user and after accepting the call, the user can transfer the call to a user outside the CPE. Then both the incoming and outgoing B Channels are released for another call.

PRI Station Detail Billing

PRI Station Detail Billing provides individual station call details for all stations utilizing a Customer's ISDN Primary Service at an account level on a monthly basis. These details are provided with the normal customer bill or on the Verizon Communications Inc. website via the Internet.

PRI Station Detail billing is only available with message/measured usage service. Individual PRI Station Call Detail is for informational purposes only. Exact billing information is located in the Measured Call Summary portion of the bill.

The customer's ISDN Primary Service must be equipped with Calling Party Default Directory Number with the Calling Party Screening option. Customers will not have the option to change the Calling Party Number and CPN may not be deleted. Customers will have the option to define a partial listing in the screening list. Specific call details will not be provided for stations not included in the screening list. The screening list may not include 800 numbers, fictitious numbers, private network numbers or Centrex Dialing Plan numbers defined in the screening tables. Station Call Details will only be provided for valid telephone numbers within the switch providing the customer's ISDN Primary Service.

(D)
(D)

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.6 Rate Structure (Continued)

- c. "B" Channel Configurations - Channel Activations: Channel activation charges will apply to provide voice or circuit switched data capability for up to 24 B-channels. Channel activations are monthly recurring charges applied on a per channel basis.
- d. Channel Usage: Data channel usage rates will apply on a per channel basis. Data channel usage rates apply to switched data (only channels) and voice/data measured rate channels as offered by Verizon and Interexchange Carriers. Voice channel rates can be flat-rated or usage based. Measured usage is not applicable on a flat-rate channel. Five-year term commitment measured rate channel is not available.
- e. Circuit Establishment: Nonrecurring charges for database configuration work will apply for initial circuit establishment and channel configuration. The database charges are applied on a per PRI access and on a per service-type basis. When ISDN-PRI service is established for commitment terms, the ISDN-PRI Access nonrecurring charge is the only nonrecurring charge applicable. When ISDN-PRI service is established on a month-to-month basis, the Database Configuration Charges shall apply.
- f. Termination Liability: In the event the customer terminates the service prior to the completion of the term commitment, the Termination Liability in Section A2.3.17 of this tariff will apply. Termination liability charges do not apply to optional features. The termination liability charge will not apply when a customer converts from PRI Access and Facility to a PRI Access only when the PRI is connecting to an alternate high capacity facility (C)
 |
 (C)
- g. Subsequent Activity Charge (SAC): Nonrecurring charges for database configuration work will apply for all subsequent activity related to changes in channel configuration or ISDN-PRI attributes. The SAC is applicable per occurrence and is not based on the number of trunks. This charge is applicable for all contract terms.
- h. The Database Configuration Charge(s) are applicable to month-to-month customers only.
- i. For Two Way, DID/DIOD voice-only channel configurations, a mixture of Flat Rate and Message Rate Service will not be allowed within a single customer ISDN-PRI Service Arrangement. (C)
- j. To utilize Call-by-Call access, the customer must specify, at subscription time, the quantities of channels that will be utilized for a specific service (DID/DIOD, etc.) on the PRI Facility. The customer will be charged for the maximum number of channels specified for those services that are flat rate and on a usage basis only for those services that are usage based (OutWATS/800/877/888, Data).
- k. End User charges as well as the ISDN Line Port rate as specified in the Verizon Telephone Operating Companies Tariff FCC No. 14 (apply as appropriate).
- l. Presubscription of a Carrier of Preference is specified in Section 6 of the Verizon Telephone Operating Companies Tariff FCC No. 14 and Section 13 of the Intrastate Access Services Tariff. Based on a customer's ISDN-PRI Access Arrangement, a customer may be able to presubscribe to more than one Carrier of Preference.

(D)
 (D)

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.6 Rate Structure (Continued)

- m. The flat rate Extended Calling Service (ECS) option will permit flat rated ECS calling upon as many voice flat rate channel activations as equipped by the customer, up to twenty-four (24), per Switched Facility. Note: This service will not be available to customers subscribing to channel activations other than flat rate channels, i.e., Switched Data or Voice/Data Measured Rate channels.

The flat rate ECS option is offered under a one-, two-, three-, or five-year contract period. A Monthly Recurring Charge (MRC) will be charged per quantifying ISDN-PRI Switched Facility. This charge will apply in addition to any other charges for tariffed services as part of the customer's monthly bill. This option is included in the PRI Term and Volume Flat Rate contracts and 2 and 3-year Corporate Rewards contracts.

- n. The Foreign Central Office/Foreign Exchange Special Transport charge applies on a per airline mile basis between the serving central office and the customer's normal central office except when the customer's serving central office is part of a Remote Switching Cluster.
- o. The PRI Access Term & Volume Packages include the PRI Access, the DS1 Switched Facility, and the B Channel Activation, Caller ID, D Channel Backup, NFAS, and ECS (flat rate only). The PRI Access Term & Volume packages without the DS1 Switched Facility includes the same items except the DS1 Switched Facility. The options are flat rate voice and measured usage/data channels or measured voice and measured usage/data channels. Tie Channel Service is in addition to the Term and Volume rates. (C)
- p. Customers with existing PRI contracts may convert to a new contract plan without incurring termination liability charges provided the value of the new contract is equal to or greater than the remaining value of the existing contract plan.
- q. All of a customer's Telephone Company provided PRIs within a state will count towards the volume contract threshold. Volume contract customers may change the number of PRIs during the volume term period. In the event customers under a volume contract make subsequent PRI increases or decreases that cause the total number of PRIs to fall within a different threshold level, all remaining PRIs will be billed at the applicable level rate for the remainder of the volume contract term period. The customer must provide the account information of the PRIs included in the Term and Volume option at the time of the initial installation of service and with each change to the service.
- r. During the contract period, the customer may add PRI services at the same monthly rate as specified in the initial contract or the customer may add PRI services on a month-to-month or contract basis. The contract period for these additional PRI services will not end concurrently with PRI's from the initial contract.
- s. PRIs on two-year volume or Corporate Rewards contract customers may subscribe to 3-year contract PRI features and facilities when 2-year contract rates are not available.
- t. The PRI Access NRC does not apply for PRIs enrolled in a 2 or 3-year Corporate Rewards plan nor the 2 or 3-year Term and Volume plans.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.7 Rates and Charges

The following rates and charges are in addition to all other rates and charges that may be applicable for accessible services which operate in conjunction with ISDN-PRI Service.

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	
a. PRI Access			
(1.) Month-to-Month	-	\$350.00	
(2.) 1 Year Term Commitment ³	\$500.00	420.00	(T)
(3.) 5 Year Term Commitment	500.00	340.00	
b. Switched Facility ¹			
(1.) First System			
(a.) Month-to-Month	693.00	250.00	
(b.) 1 Year Term Commitment ³	-	225.00	(T)
(c.) 5 Year Term Commitment	-	182.25	
(2.) Additional System			
(a.) Month-to-Month	547.00	154.00	
(b.) 1 Year Term Commitment ³	-	203.00	(T)
(c.) 5 Year Term Commitment	-	166.50	
c. Foreign Central Office/Foreign Exchange Special Transport ² , Each Airline Mile or Fraction Thereof	-	15.00	

¹ Refer to A10.5.6.b for the rules and regulations associated with alternate transport facilities. The applicable rules, regulations, and rates for the alternate transport facility from the appropriate Company Tariff will apply in lieu of the Switched Facility rates and charges.

² The Hub Termination charge as specified in the Facilities for Intrastate Access Tariff, Section 7.7.7(A)(2), shall also apply.

³ This option is grandfathered as of July 1, 2008. Existing customers may stay on this plan until their term ends. (N)

(D)

.7 Rates and Charges (Continued)

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	
e. Optional Features			
(1.) Network Ring Again ³			(C)
(2.) "D" Channel Back-up ⁵			(C)
(3.) Calling Line Identification With Name, Per ISDN-PRI Access			
Month-to-Month	\$ 100.00	\$ 85.00	
1 year Contract ³	100.00	75.00	(T)
2 or 3 year Contract ³	100.00	70.00	(T)
5 year Contract	100.00	65.00	
Term and Volume ⁴		40.00	(N)
(4.) Two B Channel Transfer Per ISDN-PRI Access			
Month-to-Month	100.00	75.00	
1 year Contract	-	70.00	
2 or 3 year Contract	-	65.00	
f. Database Configuration ¹			
(1.) PRI Access, each	200.00	-	
(2.) "B" Channel, per type	150.00	-	
g. PRI Subsequent Activity Charge (SAC) ² (All contract terms), per occurrence			
	200.00	-	
h. Flat Rate Extended Calling Service, per Switched Facility			
1 year Contract ³	-	120.00	
2 or 3 year Contract ³	-	80.00	(T)
5 year Contract	-	80.00	(T)
i. PRI Station Detail Billing, per account			
	-	100.00	

¹ Applicable only to customers subscribing to PRI Access and Switched Facility on a Month-to-Month basis.

² Applicable only to customers subscribing to PRI Access and Switched Facility on a Term Commitment basis.

³ This service is grandfathered. Existing customers may stay on this plan until the term ends.

⁴ If Caller ID with Name is added to an existing PRI arrangement, the Subsequent Activity Charge is applicable. No NRC applies if the feature is added at the initial installation of the PRI Access.

⁵ D Channel Back Up is included in the PRI Access

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI)

.1 General

- a. Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI) Service provides digital access for integrated services between the customer's premises and the serving office via a 1.544 Mbps facility. ISDN-PRI denotes an end-to-end digital network capable of supporting a combination of public and private network access services. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) is an alternative for individual access services, such as Two Way, Direct Inward Dialing (DID), Direct Outward Dialing (DOD), (C) 800/877/888 Services, Wide Area Telecommunications Services, and local business trunks.
- b. ISDN-PRI network interface requirements are described in the Technical Reference Specifications as used by the Telephone Company in the Verizon Technical interface Reference Manual. ISDN-PRI requires compatible customer-provided equipment registered under FCC Part 68.
- c. The customer must provide information regarding the intended use of the service sufficient to permit the Telephone Company to furnish and maintain the service ordered and assure that tariff regulations are followed.

The availability and functions of the features and capabilities for ISDN-PRI Service may vary by serving central office.

.2 Regulations

- a. ISDN-PRI Service is available to customers where facilities are available. Customers must provide compatible premises switching equipment for terminating the "D" channel and the 1.544 Mbps high capacity digital services facilities.
- b. ISDN-PRI Service is typically divided in capacities of twenty-three 64 Kbps "B" channels and one 64 Kbps "D" channel (23B+D).
- c. The "B" channels can carry switched voice and switched data at up to 64 Kbps. The channels can be configured for voice or data.
- d. The "B" channels can be dedicated to a specific configuration, or, optionally, a group of "B" channels can be shared for access to two or more configurations.
- e. The "D" channel carries the out-of-band signaling required to control its associated "B" channels on one or more 1.544 Mbps high capacity digital services facilities where technology permits.
- f. The minimum service period for each ISDN-PRI Service is one (1) month.
- g. Where a customer's ISDN-PRI Service interconnects with an Intermediary Customer (IC) (Interexchange Carrier or other service provider), PRI Access is only permitted within a single customer's ISDN-PRI Service Arrangement. Access to the Telephone Company's network exchange or switched services is not permitted.

~~(M)~~ Material moved to Page 45.1

(D)

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.3 Definitions (Continued)

d. Intermediary Customer (IC) Services

"B" channels may be dedicated or allowed to interconnect with various services provided by other service providers, such as Interexchange Carriers or Competitive Access Providers. The customer shall be responsible for the ordering of these services.

e. Tie Channel Service

Tie Channel Service provides intercom capability on "B" Channels of ISDN-PRI Arrangements and other ~~digital~~ (C) CentraNet® systems within the same subscriber network (central office to central office). This feature provides the capability to communicate on a private facility basis, as a tie line between CentraNet® systems served from different central offices. Tie channels on a single ISDN-PRI Arrangement can be configured for intercom calling to a CentraNet® system and local exchange access for the CPE. Intercom calls between an ISDN-PRI Arrangement and a CentraNet® system do not incur usage charges. Calls to telephone numbers outside of a CentraNet® system without intercom capability may incur usage charges.

Tie Channel Service may terminate on CPE at the customer location or at an Intermediary Customer (IC) location. Rates for Tie Channel Service to Customer Premises or Central Office to Central Office are available on a per "B" channel basis or on a per PRI basis when 10 or more "B" channels are activated and are in addition to the normal channel rates. Rates for Tie Channel Service to an IC are available on a per "B" channel basis or on a per PRI basis when 11 or more "B" channels are activated.

Tie Channel Service is available where facilities and conditions permit.

Tie Channel Service will not be provided on a Call by Call Access basis.

f. "B" Channel

The "B" channel is a channel at 64 Kbps that carries digitized customer traffic (voice, data).

g. "D" Channel

The "D" Channel is a signaling channel at 64 Kbps used to control and route "B" channel traffic.

h. Remote Switching Cluster

Remote Switching Clusters exist when the remote switch is dependent on the host switch for its software call processing. A remote switch can process only intra-office calls without the host switch.

i. Foreign Central Office/Foreign Exchange Special Transport

Foreign Central Office/Foreign Exchange Special Transport is a High Capacity Special Transport Facility between a customer's normal serving central office and the central office providing the ISDN-PRI service.

® - Registered Trademark of Verizon

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.4 PRI Features and Definitions

a. Standard Features

Calling Line Identification – Number Only

Calling Number Identification allows the customer to have access to the directory number of the calling party.

Call-by-Call Access

A customer specified arrangement of "B" channels is used to access services available in the ISDN-PRI serving central office switch. The customer will be allowed to mix dedicated services and call-by-call access on the same ISDN-PRI Service. To utilize call-by-call access, the customer must specify, at subscription time, the quantities of channels that will be utilized for a specific service on the ISDN-PRI Service. The "B" channels will be assigned and billed the maximum quantity specified. With this feature, separate facilities are not required for individual services, such as DID/DIOD, WATS, 800/877/888 services, and local switched access lines. This option is grandfathered as of July 1, 2008. Call by Call will no longer be provisioned on new PRIs as of July 1, 2008 except for at existing customer's locations. Existing customers may continue their PRI service provisioned with Call by Call but will need to choose a new B Channel Configuration rate out of the tariff. (C)
| (C)

Clear Channel Capability

Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.

Non-Facility Associated Signaling (NFAS)

NFAS allows the D-channel signaling entity to assign calls to channels on more than one interface (including the one containing the D-channel). The collection of these B-channels and the controlling D-channel is called a PRI group. Up to 20 DS1 Facilities can be assigned to a PRI group.

b. Optional Features

Network Ring Again

Network Ring Again allows a calling station encountering a busy to activate the central office switch to notify the calling station when the called station becomes idle. The calling station can then activate the switch to complete the call.

This feature is available on a limited basis and only functions within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per line so arranged.

"D" Channel Back-up

In arrangements of two or more ISDN-PRI's, this service provides enhanced continuity of service by allowing a "D" channel of one ISDN-PRI to automatically take over for a failed "D" channel of another ISDN-PRI.

This feature is available on a limited basis and only available within a single customer's ISDN-PRI Service Arrangement. The rate for this feature will be on an Individual Case Basis (ICB) basis per customer group. This feature is only provided when ISDN-PRI is offered under a contract term commitment.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.4 PRI Features and Definitions (Continued)

b. Optional Features (Continued)

Calling Line Identification With Name

Calling Line Identification With Name allows the customer to have access to the directory number and name of the calling party. Compatible CPE is required. Calling Line Identification With Name is available only where facilities and conditions permit. Rates for Calling Line Identification With Name are available on a Month-to-Month basis or on a term commitment of 1, 2, 3, ~~or~~ 5 years, or Term and Volume for customers subscribing to (C) ISDN-PRI on a term commitment basis.

Two B Channel Transfer

The Two B Channel Transfer feature allows the CPE to accept a call from one user and after accepting the call, the user can transfer the call to a user outside the CPE. Then both the incoming and outgoing B Channels are released for another call.

PRI Station Detail Billing

PRI Station Detail Billing provides individual station call details for all stations utilizing a Customer's ISDN Primary Service at an account level on a monthly basis. These details are provided with the normal customer bill or on the Verizon Communications Inc. website via the Internet.

PRI Station Detail billing is only available with message/measured usage service. Individual PRI Station Call Detail is for informational purposes only. Exact billing information is located in the Measured Call Summary portion of the bill.

The customer's ISDN Primary Service must be equipped with Calling Party Default Directory Number with the Calling Party Screening option. Customers will not have the option to change the Calling Party Number and CPN may not be deleted. Customers will have the option to define a partial listing in the screening list. Specific call details will not be provided for stations not included in the screening list. The screening list may not include 800 numbers, fictitious numbers, private network numbers or Centrex Dialing Plan numbers defined in the screening tables. Station Call Details will only be provided for valid telephone numbers within the switch providing the customer's ISDN Primary Service.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.6 Rate Structure (Continued)

- c. "B" Channel Configurations - Channel Activations: Channel activation charges will apply to provide voice or circuit switched data capability for up to 24 B-channels. Channel activations are monthly recurring charges applied on a per channel basis.
- d. Channel Usage: Data channel usage rates will apply on a per channel basis. Data channel usage rates apply to switched data (only channels) and voice/data measured rate channels as offered by Verizon and Interexchange Carriers. Voice channel rates can be flat-rated or usage based. Measured usage is not applicable on a flat-rate channel. Five-year term commitment measured rate channel is not available.
- e. Circuit Establishment: Nonrecurring charges for database configuration work will apply for initial circuit establishment and channel configuration. The database charges are applied on a per PRI access and on a per service-type basis. When ISDN-PRI service is established for commitment terms, the ISDN-PRI Access nonrecurring charge is the only nonrecurring charge applicable. When ISDN-PRI service is established on a month-to-month basis, the Database Configuration Charges shall apply.
- f. Termination Liability: In the event the customer terminates the service prior to the completion of the term commitment, the Termination Liability in Section A2.3.17 of this tariff will apply. Termination liability charges do not apply to optional features. The termination liability charge will not apply when a customer converts from PRI Access and Facility to a PRI Access only when the PRI is connecting to an alternate high capacity facility. (C)
- g. Subsequent Activity Charge (SAC): Nonrecurring charges for database configuration work will apply for all subsequent activity related to changes in channel configuration or ISDN-PRI attributes. The SAC is applicable per occurrence and is not based on the number of trunks. This charge is applicable for all contract terms.
- h. The Database Configuration Charge(s) are applicable to month-to-month customers only.
- i. For Two Way DID/DIOD voice-only channel configurations, a mixture of Flat Rate and Message Rate Service will not be allowed within a single customer ISDN-PRI Service Arrangement. (C)
- j. To utilize Call-by-Call access, the customer must specify, at subscription time, the quantities of channels that will be utilized for a specific service (DID/DIOD, etc.) on the PRI Facility. The customer will be charged for the maximum number of channels specified for those services that are flat rate and on a usage basis only for those services that are usage based (OutWATS/800/877/888, Data).
- k. End User charges as well as the ISDN Line Port rate as specified in the Verizon Telephone Operating Companies Tariff FCC No. 14 (apply as appropriate).
- l. Presubscription of a Carrier of Preference is specified in Section 6 of the Verizon Telephone Operating Companies Tariff FCC No. 14 and Section 13 of the Intrastate Access Services Tariff. Based on a customer's ISDN-PRI Access Arrangement, a customer may be able to presubscribe to more than one Carrier of Preference.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.6 Rate Structure (Continued)

- m. The flat rate Extended Calling Service (ECS) option will permit flat rated ECS calling upon as many voice flat rate channel activations as equipped by the customer, up to twenty-four (24), per Switched Facility. Note: This service will not be available to customers subscribing to channel activations other than flat rate channels, i.e., Switched Data or Voice/Data Measured Rate channels.

The flat rate ECS option is offered under a one-, two-, three-, or five-year contract period. A Monthly Recurring Charge (MRC) will be charged per quantifying ISDN-PRI Switched Facility. This charge will apply in addition to any other charges for tariffed services as part of the customer's monthly bill. This option is included in the PRI Term and Volume Flat Rate contracts and 2 and 3-year Corporate Rewards contracts.

- n. The Foreign Central Office/Foreign Exchange Special Transport charge applies on a per airline mile basis between the serving central office and the customer's normal central office except when the customer's serving central office is part of a Remote Switching Cluster.

- o. The PRI Access Term & Volume Packages include the PRI Access, the DS1 Switched Facility, and the B Channel Activation, Caller ID, D Channel Backup, NFAS, Call by Call Access, and ECS (flat rate only). The PRI Access Term & Volume packages without the DS1 Switched Facility includes the same items except the DS1 Switched Facility. The options are flat rate voice and measured usage/data channels or measured voice and measured usage/data channels. Tie Channel Service is in addition to the Term and Volume rates. (C)

- p. Customers with existing PRI contracts may convert to a new contract plan without incurring termination liability charges provided the value of the new contract is equal to or greater than the remaining value of the existing contract plan.

- q. All of a customer's Telephone Company provided PRIs within a state will count towards the volume contract threshold. Volume contract customers may change the number of PRIs during the volume term period. In the event customers under a volume contract make subsequent PRI increases or decreases that cause the total number of PRIs to fall within a different threshold level, all remaining PRIs will be billed at the applicable level rate for the remainder of the volume contract term period. The customer must provide the account information of the PRIs included in the Term and Volume option at the time of the initial installation of service and with each change to the service.

- r. During the contract period, the customer may add PRI services at the same monthly rate as specified in the initial contract or the customer may add PRI services on a month-to-month or contract basis. The contract period for these additional PRI services will not end concurrently with PRI's from the initial contract.

- s. PRIs on two-year volume or Corporate Rewards contract customers may subscribe to 3-year contract PRI features and facilities when 2-year contract rates are not available.

- t. The PRI Access NRC does not apply for PRIs enrolled in a 2 or 3-year Corporate Rewards plan nor the 2 or 3-year Term and Volume plans.

A10. DIGITAL NETWORK SERVICES

A10.5 INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) (Continued)

.7 Rates and Charges

The following rates and charges are in addition to all other rates and charges that may be applicable for accessible services which operate in conjunction with ISDN-PRI Service.

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	
a. PRI Access			
(1.) Month-to-Month	-	\$350.00	
(2.) 1 Year Term Commitment <u>3</u>	\$500.00	420.00	<u>(T)</u>
(3.) 5 Year Term Commitment	500.00	340.00	
b. Switched Facility ¹			
(1.) First System			
(a.) Month-to-Month	693.00	250.00	
(b.) 1 Year Term Commitment <u>3</u>	-	225.00	<u>(T)</u>
(c.) 5 Year Term Commitment	-	182.25	
(2.) Additional System			
(a.) Month-to-Month	547.00	154.00	
(b.) 1 Year Term Commitment <u>3</u>	-	203.00	<u>(T)</u>
(c.) 5 Year Term Commitment	-	166.50	
c. Foreign Central Office/Foreign Exchange Special Transport ² , Each Airline Mile or Fraction Thereof	-	15.00	

¹ Refer to A10.5.6.b for the rules and regulations associated with alternate transport facilities. The applicable rules, regulations, and rates for the alternate transport facility from the appropriate Company Tariff will apply in lieu of the Switched Facility rates and charges.

² The Hub Termination charge as specified in the Facilities for Intrastate Access Tariff, Section 7.7.7(A)(2), shall also apply.

3 This option is grandfathered as of July 1, 2008. Existing customers may stay on this plan until their term ends. (N)

~~(M) Material now appears in Section A110.6.~~ (D)

1 Year Contract ⁶	-	17.00	<u>(C)</u>
3 Year Contract ⁶	-	13.50	
5 Year Contract ⁶	-	13.00	<u>(C)</u>
(7.) Voice/Data Measured Rate Channel Activation ^{5,7,1,2}			
1 Year Contract	-	75.00	<u>(C)</u>
(8.) Flat Voice/Measured Data Channel Activation ^{1,2}	-	15.00	<u>(N)</u>

¹ Applies in addition to PRI Access and Switched Facility Month-to-Month and Term Commitment rates and charges.

² The applicable ~~rates and charges for the DID/DIOD accessible service are as specified in Section A13 of this tariff. The appropriate charges are the Network Access Register (NAR) as specified in Section A3 for voice only, for monthly usage rates for voice and data usage are as specified in Section A10.2.5d.(4), Switched Data Service, for voice and data. The PBX trunk rate does not apply, only the NAR rate applies.~~ (C)

³ ~~The applicable rates and charges for the OutWATS/800 accessible service are as specified in Section A19 of this tariff. The appropriate charges are the monthly usage rates.~~ (D)

⁴ ~~The applicable rates and charges for the Switched Data accessible service are as specified in Section A10.2 of this tariff. The appropriate charges are the network usage charges.~~ (C)

⁵ ~~The applicable Voice Flat Rate Channel Activation and/or Voice/Data Measured Rate Channel Activation rate is available to contract term customers only. Customers subscribing to the month to month rate shall be charged the applicable Network Access Register (NAR) rate as specified in Section A3.13 of this Tariff. A voice measured data rate is not available under a five year contract term.~~ (D)

^{6,3} Applicable only to customers subscribing to PRI Access and Switched Facility on a Month-to-Month basis and Term Commitment. (C)

⁴ ISDN PRI CentraNet[®] Access or ISDN PRI Voice over Internet Protocol (VoIP) CentraNet[®] Access NRCs from General Services Tariff A-12 is required. This NRC always applies. These rates can be used on Term and Volume Plans. Tie Channels are in addition to the regular channel rates. (C)

^{7,5} Applicable only to customers subscribing to PRI Access and Switched Facility on a Term Commitment basis. (T)

⁶ This option is grandfathered as of July 1, 2008. Existing customers may stay on this plan until their term ends. (N)
