MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

H.2 Frontier Digital Phone Service

2. Regulations

- a. The Frontier Digital Phone Service is available where technically feasible.
- b. The features are provided subject to their individual service regulations as specified in the applicable sections of the tariff.
- c. When the customer disconnects any component of the bundle, the remaining components of the package will be billed at their individually tariffed rates.
- d. Non-payment or partial payment of the bill may result in the removal of the regulated services that are included in the package in accordance with existing tariff rules.
- e. Customers may add or delete any features offered in the package without a service order charge.
- f. No discounts from the bundled rate will be given to subscribers that do not use all the features or have some features turned off."
- g. Federal Subscriber Line Charge will be billed separately from the basic bundles offering. All other surcharges and taxes will apply.
- h. The bundles are offered on a month-to-month basis.
- i. The bundle will appear as a single line item on the bill.

3. Stay Connected Seasonal Offering allows the customer to suspend the DigitalPhone Service while they are away, a minimum of one month and up to nine months for a reduced rate.

- a. Customer is asked to provide a reconnect date at the time of the suspension. If a reconnect date is given then the reconnection charges does not apply.
- b. A \$25.00 re-activation fee will apply if the customer does not provide a reactivation date at the time the order is placed to add the service.

1. General

Frontier Business Metro is a package offering available to Business Customers. The package includes up to ten Basic Business Lines; a combination of enhanced calling features, certain designated non-regulated services and price-listed services.

Main Line Bundle:

Flat Rate Business Line	Call Waiting
Extended Area Service	Call Forward
Call ID Plus Name	Basic Voice Mail
Touch Tone	Call Waiting ID (Where applicable)

Add-On Feature Pack:

Busy Redial	Call Return
3-Way Calling	Speed Call 30 or Speed Call 8
Call Forward Variable	

2. Regulations

- a. A bundle is available only to customers who are served from a central office in which all services in the bundle are offered and can be provided by the Company to the customer.
- b. The bundles are offered on a monthly basis.
- c. The bundle rate includes Extended Area Service (EAS)
- d. In order to receive the long-distance minutes included in the bundles, customers must select the Frontier Business Unlimited long-distance plan of Frontier Communications of America, Inc., with Frontier Communications of America, Inc., selected as their Primary Interexchange Carrier for both their Intra and InterLATA services.
- e. The bundle cannot be used in association with a Residential Line, PBX Service, Centrex, or ISDN service.

3. Rates and Charges

- a. Unless otherwise stated elsewhere in this section, Service Charges apply to the installation of individual components of the bundles.
- b. Service Charges apply if the customer switches from a bundle to an unbundled service.

MISCELLANEOUS SERVICE ARRANGEMENTS

I. Telecommunications Service Priority

1. General

- a. Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support National Security and Emergency Preparedness (NS/EP missions).

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis, which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64.401, Appendix A of the Federal Communications Commission's Rules and Regulations (47.C.F.R.) and the "Service Vendor Handbook for the Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or re-issuance of these regulations or manuals supersede the tariff language contained herein.

- b. The TSP program has two components: restoration and provisioning.
1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
  2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP service will be restored before provisioning new TSP services.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

2. TSP Request Process

a. TSP Request Process - Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

1. Determine that its telecommunications service supports an NS/SP function under one of the following four TSP categories.
  - a. National Security Leadership
  - b. National Security Posture and U.S. Population Attack Warning.
  - c. Public Health, Safety, and Maintenance of Law and Order
  - d. Public Welfare and Maintenance of National Economic Posture
2. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category (see 2.a above) and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT at the NCS website (<http://tsp.ncs.gov/>) for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Notify the Company, upon receipt of the TSP Authorization Code from the OPT and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

2. TSP Request Process (Cont'd)

b. TSP Request Process - Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2a. above for restoration priority assignment except for the following differences. The user must:

1. Certify that its telecommunications service is an emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a(a) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
2. Verify that the Company cannot meet the service due date without a TSP assignment.

Obtain approval from the invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

3. Responsibilities of the End-User

End-users or entities acting on behalf of the end-user must perform the following:

- a. Identify telecommunications services requiring priority.
- b. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every two years and must be done before expiration of the end-user's TSP Authorization Code(s).
- c. Submit the TSP Authorization Code along with a service request to the Company. The TSP assignment is signified by the TSP Authorization Code.
- d. Accept TSP services by the service due dates.
- e. For services assigned priority levels, ensure (through contractual means or otherwise) the availability of Customer Premise Equipment (CPE) and Customer Premise Wiring (CPW) necessary for end-to-end service operation by the service due date and for continued operation. For services in the Emergency NS/EP category, ensure CPE and CPW for end-to-end service by the time vendors are prepared to provide the services. Additionally, designate the organization responsible for the service on an end-to-end basis.
- f. Pay the Company any authorized costs associated with priority services.  
Report to the Company any failed or unusable services with priority levels.
- g. Designate a 24-hour point of contact for each TSP request and appraise the OPT.
- h. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.
- i. During certain emergencies, make TSP service requests verbally, but follow up with a written service order within two working days.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

(M)

4. Responsibilities of the Company

The Company will perform the following:

- a. Provide TSP service only after the receipt of a TSP Authorization Code. The Company is not authorized to provide priority treatment to provision TSP services to customers that have no provisioning priority (i.e., "O" is the first character of the TSP code).
- b. Revoke TSP services at the direction of the end-user or OPT.
- c. Ensure the TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).
- d. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
- e. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
- f. Confirm completion of TSP service order activity to the OPT.
- g. Participate in reconciliation of TSP information at the request of the OPT.
- h. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor, when acting as the prime contractor.
- i. Ensure that other carriers supplying underlying facilities are provided, upon request, information necessary to implement priority treatment of facilities that support NS/EP services.
- j. Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to the service.
- k. Disclose content of the NS/EP TSP database only as may be required by law.
- l. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

The Company may verify provisioning priority assignments with the TSP Program Office. However, the Company may not delay provisioning of an Emergency TSP service for verification purposes.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

5. Preemption

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, the sequence in which existing services may be preempted is as follows:

Non-TSP Services

TSP services may be preempted to provision or restore NS/EP services with a higher priority level assignment. When this is necessary, NS/EP services will be selected in the inverse order of their TSP priority level assignment. When such preemption is necessary, the Company will make every reasonable effort to notify the preempted customer of the action to be taken. When such preemption is necessary, prior consent of the service user is not required; however, the Company will make every reasonable effort to notify the preempted customer of the action to be taken.

6. Rates and Charges

- a. This charge applies in addition to all standard installation and service connection charges.
- b. In the event that the Company must utilize additional labor outside of normal business hours in the provisioning or restoration of a service, additional labor charges may apply. Such charges will be based on cost and billed to the customer. The Company will attempt to inform the customer of approximately how much these charges will be in advance.
- c. In subscribing to TSP, the customer recognizes that quoting charges and obtaining customer permission to proceed with service installation or restoration would delay the installation or restoration process and grants the Company the right to assess additional charges, when applicable, after the installation or restoration has been completed. When possible, the Company will attempt to provide an estimate to the customer of the additional charges in advance of the work.
- d. Facilities required by the Company for provisioning, restoration, or maintenance are exempt from the TSP rules.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

- K. Business Traffic Study Service (M)
- b. General
    - a. Business Traffic Study Service provides performance reports of call capacity for originating and terminating traffic on access lines, trunk groups or hunt groups. The traffic study report enables business customers to determine how many calls terminate successfully compared with the number of calls that reach a station-busy condition.
  - 2. Regulations
    - a. At the customer's request traffic studies will be performed on access lines, trunk groups or hunt groups that are provided by the Company.
    - b. A separate traffic study report is required for each access line, hunt line, or trunk group.
    - c. Business Traffic Study Service is available to business customers and only where technically feasible.
    - d. Traffic study detail requested by the customer will be limited to calls that originate or terminate on the Company's network.
    - e. Studies will not be performed on toll-free or pay-per-call type telephone numbers.
    - f. Studies are done in 7-day intervals.
    - g. Types of studies include (but are not limited to):
      - Line or Trunk Study
      - Remote Call Forwarding Study
      - Multiline Hunt Group Study
  - 3. Rates Monthly

MISCELLANEOUS SERVICE ARRANGEMENTS

I. Telecommunications Service Priority

1. General

- a. Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support National Security and Emergency Preparedness (NS/EP missions).

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis, which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64.401, Appendix A of the Federal Communications Commission's Rules and Regulations (47.C.F.R.) and the "Service Vendor Handbook for the Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or re-issuance of these regulations or manuals supersede the tariff language contained herein.

- b. The TSP program has two components: restoration and provisioning.

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.

2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP service will be restored before provisioning new TSP services.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

2. TSP Request Process

a. TSP Request Process - Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

1. Determine that its telecommunications service supports an NS/SP function under one of the following four TSP categories.

- a. National Security Leadership
- b. National Security Posture and U.S. Population Attack Warning.
- c. Public Health, Safety, and Maintenance of Law and Order
- d. Public Welfare and Maintenance of National Economic Posture

2. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category (see 2.a above) and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.

3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).

4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT at the NCS website (<http://tsp.ncs.gov/>) for information on identifying a sponsor for TSP requests.

5. Submit the SF 315 to the OPT.

6. Notify the Company, upon receipt of the TSP Authorization Code from the OPT and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

2. TSP Request Process (Cont'd)

b. TSP Request Process - Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2a. above for restoration priority assignment except for the following differences. The user must:

1. Certify that its telecommunications service is an emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a(a) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
2. Verify that the Company cannot meet the service due date without a TSP assignment.

Obtain approval from the invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

3. Responsibilities of the End-User

End-users or entities acting on behalf of the end-user must perform the following:

- g. Identify telecommunications services requiring priority.
- h. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every two years and must be done before expiration of the end-user's TSP Authorization Code(s).
- i. Submit the TSP Authorization Code along with a service request to the Company. The TSP assignment is signified by the TSP Authorization Code.
- j. Accept TSP services by the service due dates.
- k. For services assigned priority levels, ensure (through contractual means or otherwise) the availability of Customer Premise Equipment (CPE) and Customer Premise Wiring (CPW) necessary for end-to-end service operation by the service due date and for continued operation. For services in the Emergency NS/EP category, ensure CPE and CPW for end-to-end service by the time vendors are prepared to provide the services. Additionally, designate the organization responsible for the service on an end-to-end basis.
- l. Pay the Company any authorized costs associated with priority services.  
Report to the Company any failed or unusable services with priority levels.
- g. Designate a 24-hour point of contact for each TSP request and appraise the OPT.
- h. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.
- i. During certain emergencies, make TSP service requests verbally, but follow up with a written service order within two working days.

4. Responsibilities of the Company

The Company will perform the following:

- e. Provide TSP service only after the receipt of a TSP Authorization Code. The Company is not authorized to provide priority treatment to provision TSP services to customers that have no provisioning priority (i.e., "O" is the first character of the TSP code).
  - f. Revoke TSP services at the direction of the end-user or OPT.
  - g. Ensure the TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).
  - h. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
  - e. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
  - f. Confirm completion of TSP service order activity to the OPT.
  - g. Participate in reconciliation of TSP information at the request of the OPT.
  - h. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor, when acting as the prime contractor.
  - i. Ensure that other carriers supplying underlying facilities are provided, upon request, information necessary to implement priority treatment of facilities that support NS/EP services.
  - j. Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to the service.
  - k. Disclose content of the NS/EP TSP database only as may be required by law.
  - l. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.
- The Company may verify provisioning priority assignments with the TSP Program Office. However, the Company may not delay provisioning of an Emergency TSP service for verification purposes.

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

I. Telecommunications Service Priority (Cont'd)

5. Preemption

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, the sequence in which existing services may be preempted is as follows:

Non-TSP Services

TSP services may be preempted to provision or restore NS/EP services with a higher priority level assignment. When this is necessary, NS/EP services will be selected in the inverse order of their TSP priority level assignment. When such preemption is necessary, the Company will make every reasonable effort to notify the preempted customer of the action to be taken. When such preemption is necessary, prior consent of the service user is not required; however, the Company will make every reasonable effort to notify the preempted customer of the action to be taken.

6. Rates and Charges

- m. This charge applies in addition to all standard installation and service connection charges.
- n. In the event that the Company must utilize additional labor outside of normal business hours in the provisioning or restoration of a service, additional labor charges may apply. Such charges will be based on cost and billed to the customer. The Company will attempt to inform the customer of approximately how much these charges will be in advance.
- o. In subscribing to TSP, the customer recognizes that quoting charges and obtaining customer permission to proceed with service installation or restoration would delay the installation or restoration process and grants the Company the right to assess additional charges, when applicable, after the installation or restoration has been completed. When possible, the Company will attempt to provide an estimate to the customer of the additional charges in advance of the work.
- p. Facilities required by the Company for provisioning, restoration, or maintenance are exempt from the TSP rules.

J. Electronic Bill Payment Program

(M)

1. General

Frontier Online Bill Payment program is a voluntary program available to customers to view and/or pay their telephone bill on-line. Frontier customers can go to Frontieronline.com to register, view invoices and make payments. Once a customer registers for the service, a paper bill will continue to come for two months. After two months, the customer may opt to no longer receive a paper bill.

2. Regulations

- a. Frontier Online Bill Payment is a discretionary service.
- b. An Email reminder will be sent to customer when their bill is available
- c. If the customer opts to receive only the electronic bill and not the paper bill, the monthly recurring charge will be waived.

3. Rates

	Monthly
Rate for Online Bill Payment with duplicate paper bill	\$2.00

MISCELLANEOUS SERVICE ARRANGEMENTS (Cont'd)

K. Business Traffic Study Service

(M)

a. General

a. Business Traffic Study Service provides performance reports of call capacity for originating and terminating traffic on access lines, trunk groups or hunt groups. The traffic study report enables business customers to determine how many calls terminate successfully compared with the number of calls that reach a station-busy condition.

2. Regulations

a. At the customer's request traffic studies will be performed on access lines, trunk groups or hunt groups that are provided by the Company.

b. A separate traffic study report is required for each access line, hunt line, or trunk group.

c. Business Traffic Study Service is available to business customers and only where technically feasible.

d. Traffic study detail requested by the customer will be limited to calls that originate or terminate on the Company's network.

e. Studies will not be performed on toll-free or pay-per-call type telephone numbers.

f. Studies are done in 7-day intervals.

g. Types of studies include (but are not limited to):

-Line or Trunk Study

-Remote Call Forwarding Study

-Multiline Hunt Group Study

3. Rates

Monthly

Set up Charge and first week per access line or trunk group \$60.00

Each additional week per access line or trunk group \$25.00
