Revenue Requirements and Rate )  
Stabilization Plan of Southern Bell ) Filed: 9-11-96  
Telephone and Telegraph Company )

INTERMEDIA COMMUNICATIONS INC.'s  
AMENDED DIRECT TESTIMONY OF  
THOMAS ERWIN ALLEN, JR.

DOCUMENT NUMBER-DATE  
09684 SEP 11 88  
FPSC-RECORDS/REPORTING

1 Q. Please state your name, employer and business address.

2 A. My name is Thomas E. Allen, Jr. I am employed by  
3 Intermedia Communications Inc. ("Intermedia") as Vice  
4 President, Strategic Planning and Regulatory Policy. My  
5 business address is Cobb Corporate Center, 450 Franklin  
6 Road, Suite 170, Marietta, Georgia, 30067.

7 Q. What are your responsibilities in that position?

8 A. I am the primary interface between Intermedia  
9 Communications and the Local Exchange Companies. I am also  
10 responsible for the setting of regulatory policy.

11 Q. Please give a brief description of your background and  
12 experience.

13 A. I graduated from Emory University in 1976 with a Bachelor  
14 of Arts in Political Science. In 1978, I received a Master  
15 of Public Administration degree with a concentration in  
16 Public Finance from the University of Georgia. I joined  
17 Southern Bell in 1979 as an Installation Foreman. From  
18 that position I subsequently had assignments in the  
19 Customer Services organization. In 1985, I accepted a  
20 position in the Southern Bell Headquarters' Rates and  
21 Tariffs group with responsibility for dedicated service  
22 tariffs. In 1986, I was promoted to Manager in the Rates  
23 and Tariffs group maintaining my same responsibilities. In  
24 1991, my organization was consolidated into the BellSouth  
25 Regulatory Policy and Planning Department. There I was

1 responsible for developing and analyzing local competition  
2 policies and strategies. The last several years were spent  
3 specifically looking at the subjects of local competition,  
4 unbundling and resale. I joined Intermedia in October,  
5 1995.

6 Q. What is the purpose of your testimony?

7 A. I have three basic purposes in giving this testimony.  
8 First, I wish to offer some basic principles the Commission  
9 should honor in evaluating the various proposals in this  
10 docket. Second, I wish to present and support Intermedia's  
11 recommendation on the proposals in this docket in light of  
12 these principles. And third, in the context of BellSouth's  
13 Megalink proposal, I wish to propose the reduction of  
14 certain other rates.

15 Q. What principles should the Commission use in evaluating the  
16 various proposals in this docket?

17 A. First, given that we are on the threshold of a more  
18 competitive environment for the provision of local exchange  
19 telecommunication services, the Commission should avoid  
20 doing any harm to that competitive environment. Second,  
21 the Commission should prefer rate reductions that actually  
22 promote competition. Third, the Commission should prefer  
23 rate reductions that are cost-based when they meet the  
24 first two principles, i.e., when they do no harm and tend  
25 to promote competition. And fourth, the Commission should

1 prefer rate reductions that benefit customers generally as  
2 opposed to reductions that benefit a narrow slice of  
3 customers.

4 Q. What is Intermedia's recommendations with respect to the  
5 proposals in this docket?

6 A. Perhaps the most useful way to present Intermedia  
7 recommendations is to address the proposals as they are  
8 listed in the Prehearing Order. Beginning with BellSouth's  
9 proposals, the Prehearing Order list its 14 discrete  
10 proposals as follows:

<u>BellSouth Proposal</u>	<u>millions</u>
1) Reduce switched access (introduce zone density)	\$16.40
2) Reduce PBX rates and introduce term contracts	13.45
3) Waive certain business and residential Secondary Service Order charges	5.81
4) Reduce First Line Connection charge (Business)	3.22
5) Introduce Area Plus for Business	2.25
6) Eliminate usage charge on Remote Call Forwarding	2.01
7) Reduce DID recurring and	1.88

1	non-recurring charges	
2	8) Credit for ECS routes	1.10
3	implemented	
4	9) Reduce Business Line	.62
5	monthly rates in Rate Group 12	
6	10) Reduce Megalink	.58
7	interoffice rates	
8	11) Reduce WATS and 800 Service	.36
9	access line charges	
10	12) Eliminate the Secondary Service	.30
11	Order charge for WatsSaver	
12	13) Reduce SNAC charges	.07
13	for Business	
14	14) Reduce DS-1	
15	interoffice mileage rates	<u>.04</u>
16	Total	\$48.09

17 Q. What is Intermedia's recommendation with respect to Issue  
18 1 A) 1), the proposal to use \$16.4 million to reduce  
19 switched access via the introduction of zone density  
20 pricing?

21 A. Intermedia recommends that the Commission reject this  
22 proposal. Although zone density pricing is in theory a  
23 more cost-based approach to setting the affected rates,  
24 BellSouth's proposal would tend to be anticompetitive. If  
25 the Commission wishes to use some of the \$48 million to

1           reduce access charges, it would be better to eliminate the  
2           RIC as suggested in the Joint Proposal of ATT, MCI, Sprint  
3           Communications, FIXCA, Ad Hoc and McCaw Communications.

4    Q.    What is Intermedia's recommendation with respect to Issue  
5           1 A) 2), the proposal to use \$13.45 million to reduce PBX  
6           rates and introduce term contracts?

7    A.    The Commission should reject this proposal as  
8           anticompetitive. PBX trunks are a very competitive service  
9           and concentrating rate reductions in this area would only  
10          enhance BellSouth's current competitive advantage. The  
11          proposed \$29.00 rate for 49 to 60 months is very low -  
12          close to or perhaps below cost. Intermedia urges the  
13          Commission to review carefully the cost information to  
14          insure that BellSouth has complied with the cost  
15          requirements for these proposed rates. In any event, these  
16          rate reductions would widen BellSouth's competitive  
17          advantage in the state.

18   Q.    Why does Intermedia oppose reduction of PBX rates through  
19          term contracts?

20   A.    The proposal to introduce term contracts is another in a  
21          series of recent actions by BellSouth to lock up market  
22          share. Intermedia has recently filed a protest to  
23          BellSouth's contract service arrangements (CSAs) tariff  
24          expansion that allows CSAs on a much broader range of  
25          services. Intermedia is not against contracts or reduction

1 of these rates in principle; rather, Intermedia opposes  
2 BellSouth's strategic use of CSAs and/or reductions to lock  
3 up customers and thus limit competition in the near term.  
4 BellSouth understands well that its competitors are  
5 preparing to compete aggressively for these customers and  
6 is seeking to preempt competition by locking up market  
7 share.

8 Q. What is the problem with offering customers a better deal  
9 through term contracts and CSAs?

10 A. As suggested above, BellSouth can use term contracts and  
11 CSAs to lock up the market and effectively deny both the  
12 contracting customer and other customers the benefit of a  
13 variety of competitive choices. Customers are being  
14 bombarded with offers of term contracts and CSAs for local  
15 exchange service by the incumbent before competitors can  
16 bring their services to market (much of the delay of  
17 getting products to market is the result of the current  
18 negotiating environment and the recent FCC order).  
19 Consequently, there is a serious risk that competitors will  
20 have fewer customers available to market their services to;  
21 there will be some customers, of course, but the market  
22 will be greatly reduced. Even from the contracting  
23 customer's perspective, BellSouth's strategy of locking up  
24 the market through term contracts and CSAs is troubling.  
25 For example, those customers in long term contracts will be

1 denied the opportunity to get similar services at reduced  
2 rates from alternative providers. Intermedia believes that  
3 the purpose of introducing competition is to grant all  
4 customers the ability to take advantage of  
5 telecommunication providers. The public interest requires  
6 that the customer be able to "shop" the market for the  
7 services and products that best meets its particular needs.  
8 Thus, the full benefit of competition will be delayed, if  
9 not desired, if BellSouth is allowed to use term contracts  
10 and CSAs without some buffering policy such as "Fresh  
11 Look."

12 Q. Is there any kind of rate reduction for PBX or business  
13 rates that Intermedia would find acceptable?

14 A. Intermedia believes that these rates may need to be reduced  
15 in general; nevertheless, the Commission should not allow  
16 the dramatic reduction proposed by BellSouth and should not  
17 allow term contracts at this time. Once the Commission has  
18 adopted a "Fresh Look" policy and there are bona fide  
19 competitors for PBX services, it would be appropriate to  
20 allow term contracts.

21 Q. What is Intermedia's recommendation with respect to Issue  
22 1 A) 3), the proposal to use \$5.81 million to waive certain  
23 business and residential Secondary Service Order charges?

24 A. Intermedia opposes the waiver of these charges, although it  
25 may be appropriate to implement some cost-based reductions.

1 Waiver of charges would promote BellSouth's position in the  
2 market by providing a below cost discount to prospective  
3 customers and is thus anticompetitive.

4 Q. What is Intermedia's recommendation with respect to Issue  
5 1 A) 4), the proposal to use \$3.22 million to reduce First  
6 Line Connection charge (Business)?

7 A. Intermedia opposes the reduction of these charges. Rather  
8 than benefit ratepayers generally, these reductions target  
9 business customers to give BellSouth an unnecessary  
10 advantage in the market place. This proposal would impede  
11 competition rather than promote it.

12 Intermedia also opposes those reductions because they do  
13 not appear to be cost-based. Service connection charges  
14 historically have been cost based; for example, many of the  
15 LECs raised service connection charges because of increased  
16 labor cost in recent years. Thus, it is troubling that  
17 BellSouth now proposes a reduction of its line connection  
18 charge only for business customers. BellSouth is proposing  
19 to reduce the business rate by 29% from \$56.00 to \$40.00.  
20 This new business rate would match the rate for residential  
21 customers. In the past, the company had argued  
22 successfully that the business rate should be more because  
23 business customers usually triggered higher engineering  
24 costs (typically more lines and features are provided to  
25 business customers). I am not aware of any claim that the

1 cost of serving business customers has declined but the  
2 cost of serving residential services has not. In any  
3 event, Intermedia believes that nonrecurring charges, which  
4 have typically been cost based, should not be reduced as  
5 requested unless the company can provide support for the  
6 proposed reduction.

7 Q. What is Intermedia's recommendation with respect to Issue  
8 1 A) 5), the proposal to use \$2.25 million to reduce  
9 introduce Area Plus for Business?

10 A. Intermedia opposes the this proposal. Rather than benefit  
11 ratepayers generally, the proposed reduction would target  
12 business customers to give BellSouth an unnecessary  
13 advantage in the market place. Thus, this proposal would  
14 impede competition rather than promote it.

15 Q. What is Intermedia's recommendation with respect to Issue  
16 1 A) 6), the proposal to use \$2.01 million to reduce  
17 eliminate usage charge on Remote Call Forwarding?

18 A. Intermedia supports the reduction of the recurring rates  
19 for remote call forwarding, but only where such call  
20 forwarding is associated with number portability.  
21 Facilitating number portability promotes competition and  
22 benefits ratepayers generally.

23 Q. What is Intermedia's recommendation with respect to Issue  
24 1 A) 7), the proposal to use \$1.88 million to reduce DID  
25 recurring and non-recurring charges?

1 A. Intermedia opposes this proposal as it would only widen  
2 BellSouth's competitive advantage. BellSouth is proposing  
3 to reduce DID Trunk Termination recurring rates from \$31.00  
4 to \$20.00 and reduce the nonrecurring charge from \$90.00 to  
5 \$65.00. In addition, the Company proposes to reduce the  
6 Establishment Trunk Group NRC from \$915.00 to \$55.00.  
7 BellSouth has decided to reduce these rates and charges at  
8 this time for the same reason it has proposed the PBX rate  
9 reductions: to lock out competition. NRCs are typically  
10 established at cost and Intermedia does not believe that  
11 the cost for DID establishment has been reduced by 94%. In  
12 addition, the Commission should not approve these  
13 reductions because NRCs typically affect future customers  
14 and the reductions in this proceeding should benefit  
15 current customers.

16 In summary, Intermedia believes that DID charges should not  
17 be reduced using the revenues identified in this  
18 proceeding. BellSouth would reduce charges that do not  
19 benefit the general body of rate payers, nor, for the most  
20 part, current customers. Moreover, Intermedia believes the  
21 proposed dramatic change in the NRCs are not cost based and  
22 not pro-competitive.

23 Q. What is Intermedia's recommendation with respect to Issue  
24 1 A) 8), the proposal to use \$1.10 million to as a credit  
25 for certain ECS routes?

1 A. Intermedia does not oppose this proposal. The Commission  
2 has previously determined the ECS routes in question to be  
3 in the public interest.

4 Q. What is Intermedia's recommendation with respect to Issue  
5 1 A) 9), the proposal to use \$0.62 million to reduce  
6 Business Line monthly rates in Rate Group 12?

7 A. Intermedia opposes this proposal. BellSouth proposes  
8 reducing the rate group 12 monthly flat rate from \$29.10 to  
9 \$29.00. BellSouth states that the rates exceed their cost  
10 and reducing the rate brings them in line with the proposed  
11 PBX trunk rates (under the 49-to-60 month contract).  
12 Intermedia believes that while business rates may need to  
13 be reduced, basing the proposed reductions on inappropriate  
14 reductions in PBX rates would not promote competition or  
15 benefit the public generally.

16 Q. What is Intermedia's recommendation with respect to Issue  
17 1 A) 10), the proposal to use \$0.58 million to reduce  
18 Megalink interoffice rates?

19 A. Intermedia supports this proposal. These reductions would  
20 bring the rates closer to costs and would be pro-  
21 competitive. In addition, the Commission should reduce  
22 LightGate, MegaLink and SynchroNet rates (local channel and  
23 interoffice rates). The corresponding High Capacity  
24 Service and Digital Data Access Service rate should also be  
25 reduced. Specifically, the Commission should require a

1 flat-rated local channel and reduce inter-office rates  
2 (both fixed and per mile).

3 Q. What is Intermedia's recommendation with respect to Issue  
4 1 A) 11), the proposal to use \$0.36 million to reduce WATS  
5 and 800 Service access line charges?

6 A. Intermedia opposes reduction of WATS & 800 Service Access  
7 Line charges for basic reasons. First, these reductions  
8 would benefit only a small number of customers in a narrow  
9 slice of the competitive market. Second, the reductions  
10 would not appear to be cost-based. BellSouth apparently  
11 believed that these access line charges were necessary to  
12 cover the costs associated with adding WATS and 800  
13 Service. There has been no demonstration that the  
14 underlying costs of these services have decreased.  
15 Reductions of charges that benefit only a few consumers and  
16 that are not cost-based are likely anti-competitive.

17 Q. What is Intermedia's recommendation with respect to Issue  
18 1 A) 12), the proposal to use \$0.30 million to reduce  
19 eliminate the Secondary Service Order charge for  
20 WatsSaver?

21 A. Intermedia does not support the elimination of the  
22 Secondary Service Order charge for WatsSaver. BellSouth is  
23 again proposing a rate reduction that would neither be  
24 cost-based, nor benefit the general body of ratepayers.

25 Q. What is Intermedia's recommendation with respect to Issue

1 1 A) 13), the proposal to use \$0.07 million to reduce SNAC  
2 charges for Business?

3 A. Intermedia supports this proposal. These reductions would  
4 bring the rates closer to costs, and is pro-competitive.

5 Q. What is Intermedia's recommendation with respect to Issue  
6 1 A) 14), the proposal to use \$0.04 million to reduce DS-1  
7 interoffice mileage rates?

8 A. Intermedia supports this proposal, as it would also would  
9 bring the rates closer to costs and is pro-competitive.

10 Q. That concludes BellSouth's proposals. Do you wish to  
11 address the proposals of other parties?

12 A. Yes. Next I would like to address the proposed reductions  
13 made under the Joint Proposal of ATT, MCI, Sprint  
14 Communications, FIXCA, Ad Hoc and McCaw Communications.  
15 Issue 1 B) summarizes the Joint Proposal as follows:

16	<u>Proposals</u>	<u>millions</u>
17	1) Reduce PBX and DID trunk charges	\$11.00
18	2) Eliminate the Residual	35.00
19	Interconnection Charge	
20	3) Reduce mobile interconnection rates	2.00
21	Total	48.00

22 Q. What is Intermedia's recommendation with respect to Issue  
23 1 B) 1), the proposal to use \$11 million to reduce PBX and  
24 DID trunk charges?

25 A. Intermedia opposes this proposal. The restructure of PBX

1 rates and the elimination or reduction of NRCs provides  
2 little or no relief for the average rate payer and only  
3 improve BellSouth's competitive advantage.

4 Q. What is Intermedia's recommendation with respect to Issue  
5 B) 2), the proposal to use \$35 million to Eliminate the  
6 Residual Interconnection Charge?

7 A. Intermedia does not oppose elimination of the RIC. Our  
8 only concern with this is that if the RIC is entirely  
9 eliminated the lion's share of the available revenues would  
10 have been used to reduce access charges. As a matter of  
11 policy, the Commission might choose to use some of that \$35  
12 million elsewhere. Intermedia does support FIXCA's basic  
13 point, however, that access charges need to be driven  
14 further toward costs as soon as possible.

15 Q. What is Intermedia's recommendation with respect to Issue  
16 1 B) 3), the proposal to use million to reduce mobile  
17 interconnection rates?

18 A. Intermedia does not oppose this proposal. As we  
19 understand, this proposal would bring mobile  
20 interconnection usage rates closer to cost, which is  
21 procompetitive.

22 Q. In Issue 1 C, the Public Counsel proposes to use some of  
23 the available revenue establish a reserve fund to assist  
24 BST customers who have experienced problems with conversion  
25 to the 954 NPA? What is Intermedia's recommendation with

1           respect to that proposal?

2    A.    Intermedia takes no position on that issue at this time.

3    Q.    In Issue 1 D), FCTA proposes to use some of the available  
4           revenue    to    eliminate    nonrecurring    charges    for  
5           interconnection trunks and special access circuits ordered  
6           by ALECs?

7    A.    We favor this proposal.  These reductions would facilitate  
8           interconnection and thus would promote competition.

9    Q.    In Issue 1 E), Palm Beach Newspapers, Inc./Florida Today  
10           proposes to reduce usage rates for N11 service to \$.01 per  
11           minute.  What is Intermedia's position on this proposal?

12   A.    Intermedia does not oppose this proposal because it is  
13           cost-based and thus would promote competition in local  
14           information services.

15   Q.    With respect to Issue 2, to the extent the Commission does  
16           not approve the plans proposed by BellSouth, Public  
17           Counsel, FCTA, Palm Beach Newspapers, Inc./Florida Today  
18           and AT&T, MCI, Sprint, FIXCA, AD Hoc and McCaw, how should  
19           the Commission implement the scheduled rate reduction?

20   A.    As suggested in my previous answer to Issue 1 A) 10), the  
21           proposal to use \$0.58 million to reduce Megalink  
22           interoffice rates, Intermedia believes that the Commission  
23           should also reduce (a) LightGate, MegaLink and SynchroNet  
24           rates (local channel and interoffice rates) and (b) the  
25           corresponding High Capacity Service and Digital Data Access

1           Service rates. Specifically, the Commission should require  
2           a flat-rated local channel and reduce inter-office rates  
3           (both fixed and per mile). These proposals have not been  
4           advanced by any other party, yet would be an important pro-  
5           competitive, cost-based use of the available funds.

6    Q.    Does this conclude your testimony?

7    A.    Yes it does.
