Dear Sirs,

We are writing to express our objection to the changes proposed by Rainbow Springs Utility. Our home in the Woodlands is situated on more than one acre. Both the water well and septic system function satisfactory and meet requirements. We do not want or need utility service and we cannot afford the added expense of changing to a community system.

On two separate occasions we called Rainbow Springs Utility to clarify this proposal. We feel they lied to us when first they said that we were not included in the proposal, then they said that they did not intend to extend services to our area. If that is their true intention, why have they included large areas that were developed more that twenty years ago?

We have lost faith in the Rainbow Springs Utility and we are concerned about their true intentions. They have not been honest in their communication and we fear they would attempt to extend their service to our established neighborhood.

Their stated proposal is to correct an oversight from sixteen years ago, when the service territory for the utility was originally established. Our section of the development was established well before that time. It was established with homes situated on property large enough to support wells and septic systems. Buyers were not informed of the Rainbow Springs Utility or proposed services.

Please consider our objection to extension of service area for the Rainbow Springs Utility when the issue is brought before the Public service Commission.
