TARIFF FORMAT

Sheet Numbering - Sheet numbers appear in the upper right hand corner of the page. Sheets are numbered sequentially and from time to time new pages may be added to the Tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Sheets 3 and 4 would be numbered 3.1.

Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in the tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

Check Sheets - When a Tariff filing is made with the FPSC, an updated check sheet accompanies the Tariff filing. The check sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision, all revisions made in a given filing are designed by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it. The Tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the FPSC.
