Ms. Blanca S. Bayo, Director Division of Records and Reporting Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee FL 32399-0870

Dear Ms. Bayo:

981591 - EG-

RE: Petition for Authority to Implement Good Cents Conversion Program

Enclosed are an original and fifteen copies of Gulf Power Company's Petition for New Program.

Also enclosed is a 3.5 inch double sided, high density diskette containing the Petition in WordPerfect for Windows 6.1 format as prepared on a Windows NT based computer.

Sincerely,

inda G. Malene

Linda G. Malone Assistant Secretary and Assistant Treasurer

FPSC-RECORDS/REPORTING

### BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

IN RE: Petition for Authority to Implement Good Cents Conversion Program by Gulf Power Company //

Docket No.: Filed:

November 12, 1998

### **PETITION FOR NEW PROGRAM**

GULF POWER COMPANY ("Gulf Power", "Gulf", or "the Company"), by and through its undersigned attorneys, and pursuant to Section 366.82(5) of the Florida Statutes and Rule 25-17.015 of the Florida Administrative Code, hereby petitions the Florida Public Service Commission for authority to implement a new program in the Company's energy conservation plan. In support thereof the Company would respectfully show:

1. Gulf is a corporation with its headquarters located at 500 Bayfront Parkway, Pensacola, Florida. The Company is an investor-owned utility operating under the jurisdiction of this Commission.

Gulf hereby requests authority from the Commission to implement a new program in the Company's energy conservation plan, the Good Cents Conversion Program.

3. A detailed description of the Good Cents Conversion Program is provided in the attached Exhibit 1 which is incorporated herein by reference. The objective of this new program is to provide Gulf Power Company's residential customers and equipment contractors an incentive to replace inefficient gas furnace and air conditioning systems with high efficiency heat pump systems. Benefits will include energy savings for the customer and both energy and peak demand reductions for Gulf Power and its general body of customers. 4. Monitoring and evaluation of the Good Cents Conversion Program will be through the Gulf Account Reporting System (GARS). Energy and demand savings will be validated through billing data and sample metering of customer equipment.

5. This program is cost-effective using the Commission approved methodology in Rule 25-17.008. The summary tables and cost-effectiveness runs are included in Exhibit 1 as Attachments A & B. While the assumptions used in calculating the cost effectiveness of the program as filed were the most logical and most probable, other scenarios were analyzed as a matter of interest and rigor. The results of those analyses are shown in Exhibit 2 which is incorporated herein by reference.

WHEREFORE, Gulf Power Company respectfully requests the Commission to authorize the Company to implement the Good Cents Conversion Program consistent with this petition.

Dated this  $1/\frac{t_{h}}{t_{h}}$  day of November, 1998

Runart Basky

JEFFREY A. STONE Florida Bar No. 325953 RUSSELL A. BADDERS Florida Bar No. 7455 Beggs & Lane P. O. Box 12950 (700 Blount Building) Pensacola, FL 32576-2950 (850) 432-2451 Attorneys for Gulf Power Company

# GoodCents<sup>®</sup> Conversion Program

### **Program Description**

The objective of the GoodCents<sup>®</sup> Conversion Program is to provide Gulf Power Company's residential customers and equipment contractors an incentive to replace inefficient gas furnace and air conditioning systems with high efficiency heat pump systems. This program will encourage earlier replacement of these equipment types resulting in immediate energy savings for the customer, an increase in ground source efficiency, and energy and peak demand reductions benefiting Gulf Power Company and its general body of customers.

Gulf Power will identify potential program participants through the Residential Energy Audit Program as well as through educational and promotional activities.

# **Program Guidelines**

In order to qualify for participation in the GOOdCents<sup>®</sup> Conversion Program, customers must have an On-site Energy Audit performed by a Gulf Power Residential Energy Consultant. Each Energy Audit will result in written recommendations to the customer, which may include lifestyle factors, improvements to the home's thermal envelope, and mechanical equipment upgrades/modifications. In addition, the Energy Consultant may provide detailed computer analysis of the customer's home in order to determine proper equipment sizing and demonstrate potential savings to the customer.

All heat pump installations must meet mechanical code requirements and have a minimum Seasonal Energy Efficiency Rating (SEER) of 11.0. Described heat pump installations replacing primary heating systems fueled by gas, propane, or fuel oil will qualify the customer for a rebate of \$200 and the installing heating and cooling contractor or salesperson an incentive of \$50 per system. Installations occurring without the necessary Gulf Power Energy Audit will not qualify for any incentive.

Qualifying installations will be reported by the Gulf Power Residential Energy Consultant to the appropriate support personnel located in Gulf Power's Corporate Office Residential Marketing Department in order to facilitate payment. A sample rebate form is included as Attachment "A".

### Participation Standards

The GoodCents<sup>®</sup> Conversion Program is available to all residential customers within Gulf Power's service territory with an existing combustion furnace as the primary source of heating for the home and to cooling and heating equipment contractors performing work for these customers.

### **Benefits and Costs**

•

Participating customers will benefit from reduced energy consumption in their homes resulting in lower energy bills. Energy calculations indicate an expected or average annual reduction of 1,030 kWh and 302 therms of natural gas. Additional benefits related to cost of maintenance and repair of customers' cooling and heating systems will be realized by early retirement of this equipment and replacement with new heat pump systems. Our environment will benefit by these customer actions because of a 39% reduction in ground source BTU consumption.

For Gulf Power Company, benefits include kWh reduction, kW demand savings, consumer education, and customer satisfaction. The kWh and kW demand savings are based on Residential Building Energy Program (RBEP) computer simulations. This analysis assumes that a customer in an average home of 1,680 square feet replaces a three ton air conditioner with a Seasonal Energy Efficiency Rating (SEER) of 7.0 and a 68% Annual Fuel Utilization Efficiency (AFUE) gas furnace with a heat pump having a SEER of 11.0 and a Heating Season Performance Factor (HSPF) of 7.4. RBEP comparisons based on these assumptions indicate that these installations will result in an annual energy reduction of 1,030 kWh and a summer demand reduction of 1.9 kW.

# **Monitoring and Evaluation**

Gulf Power will monitor this program through its existing Gulf Account Reporting System (GARS) which will enable the tracking of homes making this equipment change. Gulf Power will validate engineering analysis of energy and demand savings with billing data and sample metering of customer equipment.

# **Cost Effectiveness**

This program is cost effective using the Commission's approved methodology (Rule 25-17.008). The cost-effectiveness calculation is included as Attachment B.
