related facilities in St. Lucie County, Florida. This proceeding shall: 1) allow Panda Midway Power Partners, L.P. to present evidence and testimony in support of their petition for a determination of need for their proposed plant and related facilities in St. Lucie County, Florida; 2) allow any intervenors to present testimony and exhibits concerning this matter; 3) allow members of the public who are not parties to the need determination proceeding the opportunity to present testimony concerning this matter; and, 4) allow for such other purposes as the Commission may deem appropriate. The proceedings will be governed by the provisions of Chapter 120, Florida Statutes, Section 403.519, Florida Statutes, Chapter 25-22, Florida Administrative Code, and Chapter 28-106, Florida Administrative Code.

Under Section 403.519, Florida Statutes, the Commission is the sole forum for the determination of need for the electrical power plant and associated facilities. In making its determination, the Commission must take into account the need for electric system reliability and integrity, the need for adequate electricity at a reasonable cost, and whether the proposed plant is the most cost-effective alternative available. The Commission must also expressly consider the conservation measures taken by or reasonably available to the petitioners which might mitigate the need for the proposed plant, and other matters within its jurisdiction which it deems relevant. The Commission's determination of need for the St. Lucie County facility shall create a presumption of public need and necessity and shall serve as the Commission's report as required by Section 403.507(2)(a)(2), Florida Statutes. An order entered by the Commission pursuant to this hearing shall constitute final agency action.

Only issues relating to the need for the power plant and its associated facilities will be heard at the July 12, 13 and 14, 2000, hearing. Separate public hearings will be held before the Division of Administrative Hearings to consider environmental and other impacts of the proposed plant and associated facilities.

Members of the public who are not parties to the need determination proceeding will have an opportunity to present testimony regarding the need for the proposed plant and associated facilities. All members of the public who wish to offer testimony should be present at the beginning of the hearing. All witnesses

will be sworn and will be subject to cross-examination at the conclusion of their testimony.

Written comments regarding the need for the proposed plant and associated facilities may be sent to the Commission at the following address:

Those wishing to intervene in these proceedings, unless appearing on their own behalf, must be represented by an attorney or other person who can be determined to be a qualified representative pursuant to Chapter 120, Florida Statutes, and Rule 28-106.106, Florida Administrative Code. GENERAL LOCATION AND PROJECT DESCRIPTION

The proposed electric power plant is estimated to produce 1,000 MW of electricity and is to be located near the Central Florida Substation of Florida Power Corporation in St. Lucie County, Florida.
