RECORDS AND REPORTING

Marshall M. Criser III RIGINAL **Regulatory Vice President**

September 11, 2000

Mrs. Blanca S. Bayo Director, Division of Records and Reporting Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee, Florida 32399

001378 -TP

Re: Approval of two Amendments to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. ("BellSouth") and NEXTLINK Florida, Inc. pursuant to Sections 251, 252 and 271 of the Telecommunications Act of 1996

Dear Mrs. Bayo:

Pursuant to section 252(e) of the Telecommunications Act of 1996, BellSouth and NEXTLINK Florida, Inc. are submitting to the Florida Public Service Commission two amendments to their negotiated agreement for the interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to NEXTLINK Florida, Inc. The Commission approved the initial agreement between the companies in Order No. 98-1324-FOF-TP issued October 12, 1998 in Docket 980886-TP.

Pursuant to section 252(e) of the Act, the Commission is charged with approving or rejecting the negotiated agreement between BellSouth and NEXTLINK Florida, Inc. within 90 days of its submission. The Act provides that the Commission may only reject such an agreement if it finds that the agreement or any portion of the agreement discriminates against a telecommunications carrier not a party to the agreement or the implementation of the agreement or any portion of the agreement is not consistent with the public interest, convenience and necessity. Both parties aver that neither of these reasons exist as to the agreement they have negotiated and therefore, are very hopeful that the Commission shall approve their agreement.

Very truly yours,

Marshall M. CriserTT

Regulatory Vice President (SP)

The Agreement entered into by and between NEXTLINK Florida, Inc. and BellSouth Telecommunications, Inc., dated 07/17/2000, for the state(s) of Florida consists of the following:

	ITEM	NO. PAGES
Title Page		21
TOTAL		21

AMENDMENT TO THE INTERCONNECTION AGREEMENT BETWEEN NEXTLINK FLORIDA, INC. and BELLSOUTH TELECOMMUNICATIONS, INC.

THIS AMENDMENT ("Amendment") is made by and between BellSouth Telecommunications, Inc. ("BellSouth") and NEXTLINK Florida, Inc. ("NEXTLINK"), as of the _____ of June 2000. (BellSouth and NEXTLINK are collectively referred to as the "Parties".)

WHEREAS, the Parties executed an Interconnection Agreement on June 23, 1998, (the "Agreement"); and

WHEREAS, the Parties desire to amend the Agreement to set forth the terms and conditions relating to BellSouth providing to NEXTLINK unbundled access to the high frequency spectrum of BellSouth's local loops as a network element.

NOW, THEREFORE, for and in consideration of the promises contained herein, the parties to this Amendment, intending to be legally bound, hereby agree as follows:

1.0 Attachment 2 of the Agreement shall be amended by adding the following Section 19:

19 HIGH FREQUENCY SPECTRUM NETWORK ELEMENT

19.1 GENERAL

BellSouth shall provide NEXTLINK access to the high frequency portion of the local loop as an unbundled network element ("High Frequency Spectrum") at the rates set forth in Section 19.4 herein. BellSouth shall provide NEXTLINK with the High Frequency Spectrum irrespective of whether BellSouth chooses to offer xDSL services on the loop.

19.1.1 The High Frequency Spectrum is defined as the frequency range above the voiceband on a copper loop facility carrying analog circuit-switched voiceband transmissions. Access to the High Frequency Spectrum is intended to allow NEXTLINK the ability to provide Digital Subscriber Line ("xDSL") data services. The High Frequency Spectrum shall be available for any version of xDSL presumed acceptable for deployment pursuant to 47 C.F.R. Section 51.230, including, but not limited to, ADSL, RADSL, and any other xDSL technology that is presumed to be acceptable for deployment pursuant to FCC rules. BellSouth will continue to have access to the low frequency portion of the loop spectrum (from 300 Hertz to at least 3000 Hertz, and potentially up to 3400 Hertz, depending on equipment and facilities) for the purposes of providing voice service. NEXTLINK shall only use xDSL technology that is within the PSD mask parameters set forth in T1.413 or other applicable industry standards. NEXTLINK shall provision xDSL service on the High Frequency Spectrum in accordance with the applicable Technical Specifications and Standards.

- 19.1.2 The following loop requirements are necessary for NEXTLINK to be able to access the High Frequency Spectrum: an unconditioned. 2-wire copper loop. An unconditioned loop is a copper loop with no load coils, low-pass filters, range extenders, DAMLs, or similar devices and minimal bridged taps consistent with ANSI T1.413 and T1.601. The process of removing such devices is called "conditioning." BellSouth shall charge and NEXTLINK shall pay as interim rates, the same rates that BellSouth charges for conditioning stand-alone loops (e.g., unbundled copper loops, ADSL loops, and HDSL loops) until permanent pricing for loop conditioning is established either by mutual agreement or by a state public utility commission. The interim costs for conditioning are subject to true up as provided in paragraph 19.4. BellSouth will condition loops to enable NEXTLINK to provide xDSL-based services on the same loops the incumbent is providing analog voice service, regardless of loop length. BellSouth is not required to condition a loop for shared-line xDSL if conditioning of that loop significantly degrades BellSouth's voice service. BellSouth shall charge, and NEXTLINK shall pay, for such conditioning the same rates BellSouth charges for conditioning stand-alone loops (e.g., unbundled copper loops, ADSL loops, and HDSL loops.) If NEXTLINK requests that BellSouth condition a loop longer than 18,000 ft. and such conditioning significantly degrades the voice services on the loop, NEXTLINK shall pay for the loop to be restored to its original state.
- 19.1.3 NEXTLINK's meet point is the point of termination for NEXTLINK's or the toll main distributing frame in the central office ("Meet Point"). BellSouth will use jumpers to connect the NEXTLINK's connecting block to the splitter. The splitter will route the High Frequency Spectrum on the circuit to the NEXTLINK's xDSL equipment in the NEXTLINK's collocation space.
- 19.1.4 NEXTLINK shall have access to the Splitter for test purposes, irrespective of where the Splitter is placed in the BellSouth premises.

19.2 PROVISIONING OF HIGH FREQUENCY SPECTRUM AND SPLITTERS

- 19.2.1 BellSouth will provide NEXTLINK with access to the High Frequency Spectrum as follows:
 - 19.2.1.1 BellSouth is unable to obtain a sufficient number of splitters for placement in all central offices requested by competitive local exchange carriers ("CLECs") by June 6, 2000. Therefore, BellSouth, NEXTLINK and other CLECs have developed a process for allocating the initial orders of splitters. BellSouth will install all splitters ordered on or before April 28, 2000, in accordance with the schedule set forth in Exhibit A of this Agreement. Once all splitters ordered by all CLECs on or before April 28, 2000, have been installed, BellSouth will install splitters within forty-two (42) calendar days of NEXTLINK's submission of such order to the BellSouth Complex Resale Support Group; provided, however, that in the event BellSouth did not have reasonable notice that a particular central office was to have a splitter installed therein, the forty-two (42) day interval shall not apply. Collocation itself or an application for collocation will serve as reasonable notice. BellSouth and NEXTLINK will reevaluate this forty-two (42) day interval on or before August 1, 2000.
 - 19.2.1.2 On or after June 6, 2000, once a splitter is installed on behalf of NEXTLINK in a central office, NEXTLINK shall be entitled to order the High Frequency Spectrum on lines served out of that central office.
 - 19.2.1.3 BellSouth will select, purchase, install, and maintain a central office POTS splitter and provide NEXTLINK access to data ports on the splitter. In the event that BellSouth elects to use a brand of splitter other than Siecor, the Parties shall renegotiate the recurring and non-recurring rates associated with the splitter. In the event the Parties cannot agree upon such rates, the then current rates (final or interim) for the Siecor splitter shall be the interim rates for the new splitter. BellSouth will provide NEXTLINK with a carrier notification letter at least 30 days before of such change and shall work collaboratively with NEXTLINK to

select a mutually agreeable brand of splitter for use by BellSouth. NEXTLINK shall thereafter purchase ports on the splitter as set forth more fully below.

- 19.2.1.4 BellSouth will install the splitter in (i) a common area close to the NEXTLINK collocation area, if possible; or (ii) in a BellSouth relay rack as close to the NEXTLINK DS0 termination point as possible. For purposes of this section, a common area is defined as an area in the central office in which both Parties have access to a common test access point. BellSouth will cross-connect the splitter data ports to a specified NEXTLINK DS0 at such time that a NEXTLINK end user's service is established. The parties shall work collaboratively towards providing NEXTLINK the ability to hard-wire rather than cross connect to the splitter data ports.
- 19.2.1.5 The High Frequency Spectrum shall only be available on loops on which BellSouth is also providing, and continues to provide, analog voice service. In the event the end-user terminates its BellSouth provided voice service for any reason. and NEXTLINK desires to continue providing xDSL service on such loop, NEXTLINK shall be required to purchase the full stand-alone loop unbundled network element. In the event BellSouth disconnects the end-user's voice service pursuant to its tariffs or applicable law, and NEXTLINK desires to continue providing xDSL service on such loop, NEXTLINK shall be required to purchase the full stand-alone loop unbundled network element. BellSouth shall give NEXTLINK notice in a reasonable time prior to disconnect, which notice shall give NEXTLINK an adequate opportunity to notify BellSouth of its intent to purchase such loop. The Parties shall work collaboratively towards the mode of notification and the time periods for notice.
- 19.2.1.6 NEXTLINK and BellSouth shall continue to work together collaboratively to develop systems and processes for provisioning the High Frequency Spectrum in various real life scenarios. BellSouth and NEXTLINK agree that NEXTLINK is entitled to purchase the High Frequency Spectrum on a loop

that is provisioned over fiber fed digital loop carrier. BellSouth will provide NEXTLINK with access to feeder subloops at UNE prices. BellSouth and NEXTLINK will work together to establish methods and procedures for providing NEXTLINK access to the High Frequency Spectrum over fiber fed digital loop carriers by August 1, 2000.

- 19.2.1.7 Only one competitive local exchange carrier shall be permitted access to the High Frequency Spectrum of any particular loop.
- 19.2.1.8 To order the High Frequency Spectrum on a particular loop, NEXTLINK must have a DSLAM, or access to a DSALM, that serves the end-user of such loop. BellSouth shall allow NEXTLINK to order splitters in central offices where NEXTLINK is in the process of collocating or augmenting their current collocation arrangement. BellSouth will begin billing NEXTLINK the Recurring and Non-Recurring charges associated with the splitter once notification of the completed splitter installation is provided to NEXTLINK by BellSouth via the splitter completion notice. BellSouth will install these splitters within the interval provided in paragraph 19.2.1.1.
- 19.2.1.9 BellSouth will devise a splitter order form that allows NEXTLINK to order a portion of the shelf or a full shelf of splitter ports.
- 19.2.1.10 BellSouth will provide NEXTLINK the Local Service Request ("LSR") format to be used when ordering the High Frequency Spectrum.
- 19.2.1.11 BellSouth will initially provide access to the High Frequency Spectrum within the following intervals:

19.2.1.11.1

ŧ

Lines	FOC or Error notice	After LSR Receipt
1-5	48 hours manual	3 Business days
	Less than 24 hours electronic	
6-10	48 hours manual	5 Business days
	Less than 24 hours electronic	
10 +	48 hours manual	To Be Negotiated
	Less than 24 hours electronic	

BellSouth and NEXTLINK will re-evaluate these intervals on or before August 1, 2000. Upon BellSouth's deployment of real-time, flow through ordering systems referenced in 19.2.1.12, BellSouth will provide FOCs and error notification to NEXTLINK in real-time, or as close to real-time as possible, and in no event greater than a monthly average of 4 hours.

19.2.1.12 NEXTLINK will initially use BellSouth's existing pre-qualification functionality and order processes to pre-qualifv line and order the High Frequency Spectrum. NEXTLINK and BellSouth will continue to work together to modify these functionalities and processes to better support provisioning the High Frequency Spectrum. In particular, BellSouth will work with NEXTLINK to develop a real-time, mechanized, integratable preordering and ordering functionality with realtime flow through functionality with a target of the 4th Quarter 2000.

19.3 MAINTENANCE AND REPAIR

į,

- 19.3.1 NEXTLINK shall have access, for test, repair, and maintenance purposes, to any loop as to which it has access to the High Frequency Spectrum. NEXTLINK may access the loop at the point where the combined voice and data signal exits the central office splitter.
- 19.3.2 BellSouth will be responsible for repairing voice services and the physical line between the network interface device at the customer premise and the Meet Point of demarcation in the central office. NEXTLINK will be responsible for repairing data services. Each Party will be responsible for maintaining its own equipment.
- 19.3.3 If the problem encountered appears to impact primarily the xDSL service, the end user should call NEXTLINK. If the problem impacts primarily the voice service, the end user should call BellSouth. If both services are impaired, the recipient of the call should coordinate with the other service provider(s).
- 19.3.4 BellSouth and NEXTLINK will work together to diagnose and resolve any troubles reported by the end-user and to develop a

process for repair of lines as to which NEXTLINK has access to the High Frequency Spectrum. The Parties will continue to work together to address customer initiated repair requests and other customer impacting maintenance issues to better support unbundling of High Frequency Spectrum.

- 19.3.4.1 The Parties will be responsible for testing and isolating troubles on its respective portion of the loop. Once a Party ("Reporting Party") has isolated a trouble to the other Party's ("Repairing Party") portion of the loop, the Reporting Party will notify the Repairing Party that the trouble is on the Repairing Party's portion of the loop. The Repairing Party will take the actions necessary to repair the loop if it determines a trouble exists in its portion of the loop.
- 19.3.4.2 If a trouble is reported on either Party's portion of the loop and no trouble actually exists, the Repairing Party may charge the Reporting Party for any dispatching and testing (both inside and outside the central office) required by the Repairing Party in order to confirm the loop's working status.
- 19.3.4.3 BellSouth and NEXTLINK will work together to provide NEXTLINK the ability to have remote access to BellSouth's testing capability on a non discriminatory basis for those loops where NEXTLINK has access to the High Frequency Spectrum.
- 19.3.5 In the event NEXTLINK's deployment of xDSL on the High Frequency Spectrum significantly degrades the performance of other advanced services or of BellSouth's voice service on the same loop, BellSouth shall notify NEXTLINK and allow twentyfour (24) hours to cure the trouble. If NEXTLINK fails to resolve the trouble, BellSouth may discontinue NEXTLINK's access to the High Frequency Spectrum on such loop.

19.4 PRICING

19.4.1 BellSouth and NEXTLINK agree to the following negotiated, interim rates for the High Frequency Spectrum. All interim prices will be subject to true up based on either mutually agreed to permanent pricing or permanent pricing established in a line sharing cost proceeding conducted by state public utility commissions. In the event interim prices are established by state public utility commissions before permanent prices are established, either through arbitration or some other mechanism, the interim prices established in this Agreement will be changed to reflect the interim prices mandated by the state public utility commissions; however, no true up will be performed until mutually agreed to permanent prices are established or permanent prices are established by state public utility commissions. Once a docket in a particular state in BellSouth's region has been opened to determine permanent prices for the High Frequency Spectrum, BellSouth will provide cost studies for that state for the High Frequency Spectrum upon NEXTLINK's written request, within 30 days or such other date as may be ordered by a state commission. All cost related information shall be provided pursuant to a proprietary, nondisclosure agreement.

19.4.2 BellSouth and NEXTLINK enter into this Agreement without waiving current or future relevant legal rights and without prejudicing any position BellSouth or NEXTLINK may take on relevant issues before state or federal regulatory or legislative bodies or courts of competent jurisdiction. This clause specifically contemplates but is not limited to: (a) the positions BellSouth or NEXTLINK may take in any cost docket related to the terms and conditions associated with access to the High Frequency Spectrum; and (b) the positions that BellSouth or NEXTLINK might take before the FCC or any state public utility commission related to the terms and conditions under which BellSouth must provide NEXTLINK with access to the High Frequency Spectrum. The interim rates set forth herein were adopted as a result of a compromise between the parties and do not reflect either party's position as to final rates for access to the High Frequency Spectrum.

DESCRIPTION	USOC	FL
SYSTEM, SPLITTER - 96 LINE CAPACITY	ULSDA	
Monthly recurring		\$100
Non Recurring – 1st		\$150
Non Recurring – Add'l.		\$0
Non Recurring – Disconnect Only		\$150
SYSTEM, SPLITTER - 24 LINE CAPACITY	ULSDB	
Monthly recurring		\$25
Non Recurring		\$150
Non Recurring – Add'l.		\$0
Non Recurring – Disconnect Only		\$150
LOOP CAPACITY, LINE ACTIVATION ~ PER OCCURRENCE	ULSDC	- <u></u>
Monthly recurring		\$6.00
Non Recurring – 1st		\$40
Non Recurring – Add'l.		\$22
SUBSEQUENT ACTIVITY - PER OCCURRENCE -	ULSDS	
Non Recurring – 1st		\$30
Non Recurring – Add'I.		\$15

19.4.3 Any element necessary for interconnection that is not identified above is priced as currently set forth in the Agreement.

2.0 BellSouth shall make available to NEXTLINK any agreement for the High Frequency Spectrum entered into between BellSouth and any other CLEC. If NEXTLINK elects to adopt such agreement, NEXTLINK shall adopt all rates, terms and conditions relating to the High Frequency Spectrum in such agreement.

3.0 In the event of a conflict between the terms of this Amendment and the terms of the Interconnection Agreement, the terms of this Amendment shall prevail.

4.0 All of the other provisions of the Agreement shall remain in full force and effect.

5.0 Either or both of the Parties is authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment to be executed by their respective duly authorized representatives on the date indicated below.

CLEC/BellSouth Line Sharing Jointly Developed

* Rules for Splitter Allocation

BellSouth is unable to obtain a sufficient number of splitters for placement in all central offices requested by competitive local exchange carriers ("CLECs") by June 6, 2000. As a result of the current shortage of splitters, CLECs and BellSouth developed the following rules for splitter allocation. These rules shall apply until such time as those CLECs participating in the creation of the rules agree that the regular splitter installation rules should apply.

- 1. There shall be a single CLEC priority list of central offices that shall consist of the Georgia CLEC priority list combined with the priority list from the other states in BellSouth's nine-state region (the "Priority List"). This priority list shall be used for filling orders; it shall determine the order in which splitters will be deployed in those central offices for which splitters have been ordered. Georgia central offices (CO) will have priority over other state's COs.
- 2. During the allocation period, a CLEC may order 24 ports or 96 ports. In either event, BellSouth shall install a 96 port splitter in accordance with the Priority List. However, during the allocation period, in the event a CLEC orders 96 ports, BellSouth will only allocate 24 ports of the 96 port splitter to the first CLEC that orders a splitter for that central office, thus creating a backlog of 72 ports that have already been ordered by that CLEC ("Backlog"). In the event of a Backlog, BellSouth will charge CLEC a monthly recurring charge appropriate for the number of ports allocated to CLEC. In addition, if CLEC requested a 96 port splitter, it shall pay a non-recurring charge for a 96 port splitter, but shall pay no non-recurring charges when additional ports are added to alleviate the Backlog.
- 3. BellSouth will allocate, on a first-come/first-served basis, the remaining 72 ports of the splitter (in blocks of 24 ports) to the other CLECs that place an order for a splitter at that same central office.

Orders Submitted by April 28, 2000 with Due Date of June 6, 2000 or Sooner

4. A firm order for a splitter issued to the BellSouth Complex Resale Support Group (CRSG) on or by April 28, 2000, with due date of June 6, 2000, or sooner, will be given priority over orders received after April 28, 2000. Orders for the first 200 splitters received prior to April 28, 2000, will be installed on or before June 5, 2000, and shall be installed in accordance with the priority list. The first 25-splitter orders shall be installed no later than May 22, 2000.

- 5. In the event CLECs submit to BellSouth more than 200 splitter orders on or before April 28, 2000, BellSouth shall install fifty (50) splitters a week each week after June 5, 2000.
- 6. In the event there are more than four (4) orders submitted on or before April 28, 2000, for a splitter at a particular central office, a second splitter will be installed at that central office in accordance with the Priority List.
- 7. Backlogs associated with orders submitted on or before April 28, 2000 will be fulfilled in their entirety before any orders received after April 28, 2000 are worked. In fulfilling a Backlog, the CLEC's additional ports may not be on the same shelf as the initial 24 ports.

Orders Received after April 28, 2000

- 8. Irrespective of the Priority List, no orders received after April 28, 2000, will be worked until after all orders received on or before April 28, 2000 have been completed.
- 9. Once all orders received on or before April 28, 2000, have been worked in their entirety, orders received after April 28, 2000, will have a minimum interval of forty-two (42) calendar days from date of receipt.

Orders Submitted with Due Dates After June 6, 2000

i,

10. Any order submitted on or before April 28, 2000, with a due date of after June 6, 2000, will be completed according to the due date provided there is available inventory and all orders with a due date of June 6, 2000 or earlier have been completed.

ATTACHMENT TO TRANSMITTAL LETTER

. .

The Amendment entered into by and between NEXTLINK Florida, Inc. and BellSouth Telecommunications, Inc., dated 07/17/2000, for the state(s) of Florida consists of the following:

ITEM	NO.
	PAGES
Amendment	6
TOTAL	6

07/26/00

AMENDMENT TO THE MASTER INTERCONNECTION AGREEMENT BETWEEN NEXTLINK FLORIDA, INC. AND BELLSOUTH TELECOMMUNICATIONS, INC. DATED JUNE 23, 1998

?

Pursuant to this Agreement, (the "Amendment"), NEXTLINK Florida, Inc. ("NEXTLINK"), and BellSouth Telecommunications, Inc. ("BellSouth"), hereinafter referred to collectively as the "Parties," hereby agree to amend that certain Interconnection Agreement between the Parties dated June 23, 1998 (the "Agreement").

WHEREAS, BellSouth and NEXTLINK entered into an Interconnection Agreement on June 23, 1998, and;

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby covenant and agree as follows:

- Section 2.5.3 of Attachment 2, Unbundled Network Elements, of the Agreement is hereby amended by adding new sub-sections 2.5.1.1 through 2.5.1.5, Technical Requirements, and a new Section 2.7 providing for the Unbundled Copper Loops as set forth as set forth in Attachment 1 to this Amendment.
- 2. The terms and conditions for Loop Make Up and Service Inquiry are hereby added to Attachment 2, Unbundled Network Elements, of the Agreement as Section 2.7 as set forth in Attachment 1 to this Amendment.
- 3. The Terms and Conditions for Loop Conditioning are hereby added to Attachment 2, Unbundled Network Elements, of the Agreement, as Section 2.8 as set forth as set forth in Attachment 1 to this Amendment.
- 4. BellSouth and NEXTLINK enter into this Agreement without waiving current or future relevant legal rights and without prejudicing any position BellSouth or NEXTLINK may take on relevant issues before state or federal regulatory or legislative bodies or courts of competent jurisdiction. This clause specifically contemplates but is not limited to: (a) the positions BellSouth or NEXTLINK may take in any cost docket related to the terms and conditions associated with access to the copper twisted pair loop combination or UCL; (b) the positions that BellSouth or NEXTLINK might take before the FCC or any state public utility commission related to the terms and conditions under which BellSouth must provide NEXTLINK with access to the copper twisted pair loop of UCL; and (c) the ability of NEXTLINK to request renegotiation of the terms and conditions herein, including pricing, based on any regulatory proceeding or BellSouth's offering of different terms, conditions, or rates to other parties. The interim rates set forth herein were adopted as a result of a compromise between

the parties and do not reflect either party's position as to final rates for access to the copper twisted pair loop combination or UCL.

- 5. BellSouth shall make available to NEXTLINK any agreement for the UCL entered into between BellSouth and any other CLEC, consistent with federal and state law. In addition, BellSouth shall make available any standard offering for UCL or xDSL-capable loops developed by BellSouth. If NEXTLINK elects to adopt standard offering, NEXTLINK shall adopt all rates, terms and conditions relating to the UCL or xDSL-capable loops in such agreement.
- 6. All of the other provisions of the Agreement, dated June 23, 1998 shall remain in full force and effect.
- 7. Either or both of the Parties is authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment to be executed by their respective duly authorized representatives on the date indicated below.

NEXTLINK Florida, Inc. By: Name: R. Gerard Salemme Title: Senior Vice President Q 7 - / U Date:

BellSouth Telecommunications, Inc.

By: Name: Jerry Hendrix

Senior Director Title: Date:

ATTACHMENT 1 TO THE AMENDMENT DATED

2.5 (cont'd)Technical Requirements

- 2.5.3.1 For non-service specific loops described in 2.5.3 above (e.g. UCL, loops modified beyond applicable technical standards by NEXTLINK using the Unbundled Loop Modifications (ULM) process), BellSouth will only support that the loop has copper continuity and balanced tip-and-ring.
- 2.5.3.2 In cases in which NEXTLINK has requested that BellSouth modify a BellSouth loop in such a way that it no longer meets applicable technical specifications, BellSouth will no longer be expected to maintain and repair the loop to the standards specified for that loop type in the TR73600 and other standards referenced in this Agreement. Loops modified in this manner will be ordered and maintained as Unbundled Copper Loops
- 2.5.3.3Unbundled Copper Loops

The copper twisted pair loop described in 2.5.3 above shall be known as the Unbunded Copper Loop (UCL) and shall be subject to the rates and terms contained herein.

The UCL will be offered in two versions - Short and Long. A short UCL (18 kft or less) will be provisioned according to Resistance Design parameters, may have up to 6kft of bridged tap and will have up to 1300 ohms of resistance. The long UCL (beyond 18kft) will be any dry copper pair longer than 18kft and may have up to 12kft of bridged tap and up to 2800 ohms of resistance. Unbundled Loop Modifications (ULM) may be used when a CLEC wants to condition copper loops by removing load coils and other intervening equipment. In almost every case, the UCL long will require ULM to remove load coils. BST will only ensure electrical continuity and balance relative to tip and ring on UCLs.

- 2.5.3.4 The UCL will be a designed circuit, with or without conditioning, provisioned with a test point and come standard with a DLR. OC will be offered as a chargeable option on all UCL loops. Order Coordination – Time Specific (OC-TS) will not be offered on UCLs.
- 2.5.3.5 The UCL is a dry cooper loop and is not intended to support any particular telecommunications service. NEXTLINK may use the UCL loop for a variety of services, including xDSL (e.g., IDSL and SDSL) services, by attaching appropriate terminal equipment of NEXTLINK's choosing. NEXTLINK will determine the type of service that will be provided over the loop.
- 2.5.3.6 Because the UCL loop shall be an unbundled loop offering that is separate and distinct from BellSouth's ADSL and HDSL capable loop offerings, CLEC agrees that BellSouth's UCL loop will not be held to the service level and performance expectations that apply to its ADSL and HDSL unbundled

ATTACHMENT 1 TO THE AMENDMENT DATED _____

loop offerings. BellSouth shall only be obligated to maintain copper continuity and provide balance relative to tip and ring on UCL loops.

- 2.5.3.7 The UCL loop shall be provided to CLEC in accordance with BellSouth's Technical Reference 73600.
- 2.5.3.8 Rates
- 2.5.3.9 Rates for the Unbundled Copper Loops are as set forth in Exhibit A to this Amendment.

2.7 Loop Make Up Service Inquiry

- 2.7.1 As an interim process until electronic access to the data contained within LFACs is available, BellSouth shall make available to NEXTLINK a Loop Make-Up Service Inquiry process that will provide a description of the loop facility for a specific telephone number or the loop facility(ies) (DLC and/or copper) serving a specific address. This information will allow NEXTLINK to make a determination of what type of loop to order and what loop conditioning activities (using BellSouth's Unbundled Loop Modification product), if any, are desired by NEXTLINK.
- 2.7.2 The information provided via this process includes 1) the portion of the loop serviced by Digital Loop Carrier (if applicable), 2) cable lengths and gauges, 3) the presence and location of load coils, 4) the presence, location and length of bridged taps.
- 2.7.3 This process is available to NEXTLINK based on telephone number or specific address. Requests submitted based on telephone numbers will provide the loop make-up of the loop currently serving that telephone number. Requests submitted based on a specific address served by both copper facilities and digital loop carrier will contain the loop make-up information for the best available copper loop and the best available loop served by a DLC. Requests submitted based on a specific address that is serviced by only one type of loop will provide the loop make-up information for the best available loop at that address. "Best available," as used in the preceding paragraph, is the loop that BellSouth believes is most compatible with advanced data services (e.g. xDSL, etc).
- 2.7.4 The interval for this Loop Make-Up Service Inquiry process is seven (7) business days. This interval is separate from the Service Inquiry and Provisioning Interval stated in the Interval Guide.
- 2.7.5 NEXTLINK shall submit a Service Inquiry for Loop Make-Up to the NEXTLINK account representative or the CRSG. BellSouth will perform the loop make-up and return the completed Loop Make-Up to NEXTLINK. The Parties understand that Loop Make-Up is offered in order for NEXTLINK to best determine the type of loop to order at a given location, and that Loop

ATTACHMENT 1 TO THE AMENDMENT DATED _____

Make-Up will only reserve the facilities for a reasonable standard time interval, currently four business days.

- 2.7.6 Exhibit A to this Attachment 1 reflects the rates for the provision of Loop Makeup Service Inquiry for each state.
- 2.8 Loop Conditioning
- 2.8.1 Subject to applicable and effective FCC rules and orders, BellSouth shall condition loops, as requested by NEXTLINK, whether or not BellSouth offers advanced services to the End User on that loop.
- 2.8.2 Loop conditioning is defined as the removal from the loop of any devices that may diminish the capability of the loop to deliver high-speed switched wireline telecommunications capability, including xDSL service. Such devices include, but are not limited to, bridge taps, low pass filters, and range extenders.
- 2.8.3 BellSouth shall recover the cost of line conditioning requested by NEXTLINK through a recurring charge and/or nonrecurring charge(s) in accordance with the FCC's forward-looking pricing principles promulgated pursuant to section 252 (d) (1) of the Act and in compliance with FCC Rule 52.507 (e).
- 2.8.4 In those cases where NEXTLINK has requested that BellSouth modify a loop so that it no longer meets the technical parameters for a service specific loop (e.g., voice grade, ISDN, ADSL, etc.) the resulting modified loop will be ordered and maintained as a UCL.
- 2.8.5 Exhibit A to this Attachment 1 reflects the rates for the provision of Loop Conditioning for each state. Such rates shall serve as the interim rates, subject to true up, between the Parties upon the establishment of permanent rates.
