SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

- 3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. All calls are rounded up to the next whole increment.
- Jusage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.

Formula:

. . .

- 3.1.3 Timing begins when the called party answers and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Timing for each call ends when either party hangs up.
- 3.1.4 The Company will not bill for uncompleted calls.

3.2 <u>Customer Complaints and/or Billing Disputes</u>

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

Issued: September 11, 2000 Effective:

3.2 Continued

Any objection to billed charges should be reported promptly to the Company or its billing agent. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. A Customer who is unable to resolve a billing dispute with the Company may contact the Commission by telephone at 1-800-342-3552 to intervene in the billing dispute.

3.3 <u>Level of Service</u>

A Customer can expect end to end network availability of not less than 99% at all times for all services.

3.4 Billing Entity Conditions

When billing functions on behalf of the Company or its intermediary are performed by local exchange telephone companies or others, the payment of charge conditions and regulations of such companies and any regulations imposed upon these companies by regulatory bodies having jurisdiction apply. 3.5 Service Offerings

3.5.1 1+ Dialing

This service permits Customers to originate calls via switched or dedicated access lines, and to terminate intrastate calls. The customer dials "1+" followed by "ten digits" or dials "101XXXX" followed by "1+ ten digits". The Customer can also make outbound calls utilizing the Company's unified messaging technology from any telephone.

3.5.2 Travel Cards

The Customer utilizes an 11 digit "toll-free" access number established by the Company to access a terminal. Upon receiving a voice prompt, the Customer uses push button dialing to enter an identification code assigned by the Company, and the ten digit number of the called party.

3.5.3 800 Service (Toll-Free)

This service is inbound calling only where an 800, 888 or other toll-free prefix number rings into a Customer's premise routed to a specific telephone number or terminated over a dedicated facility.

Issued: September 11, 2000 Effective: Paul S. Hoffman, Chief Financial Officer By: 5053 Ocean Blvd., #54

Sarasota, Florida 34242

3.5.4 Company Prepaid Calling Cards

This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Company Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Company Prepaid Calling Cards are available at a variety of face values. Company Prepaid Calling Card service is accessed using the Company toll-free number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. The Company's processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units and applicable taxes for each call are deducted from the remaining Telecom Unit balance on the Customer's Company Prepaid Calling Card.

All calls must be charged against Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

When the balance is depleted, the Customer can either call the toll-free number on the back of the Company Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Company Prepaid Calling Card is insufficient to continue the call.

Section 3.5.4 Continued

A card will expire on the date indicated on the card, or if no date is specified, 12 months from the date of first usage, or the date of last recharge, whichever is later. The Company will not refund unused balances.

A credit allowance for Company Prepaid Calling Card Service is applicable to calls that are interrupted due to poor transmission, one-way transmission, or involuntary disconnection of a call. To receive the proper credit, the Customer must notify the Company at the designated toll-free customer service number printed on the Company Prepaid Calling Card and furnish the called number, the trouble experienced (e.g. cut-off, noisy circuit, etc.), and the approximate time that the call was placed.

When a call charged to a Company Prepaid Calling Card is interrupted due to cut-off, one-way transmission, or poor transmission conditions, the Customer will receive a credit equivalent of one Telecom Unit.

Credit allowances for calls pursuant to the Company Prepaid Card Service do not apply for interruptions not reported promptly to the Company or interruptions that are due to the failure of power, equipment or systems not provided by the Company.

Credit for failure of service shall be allowed only when such failure is caused by or occurs due to causes within the control of the Company.

The Company will block all calls beginning with the NPA "900" and NXX "976" calls, therefore such calls can not be completed.

MANAGEMENT INFORMATION

Go Solo Technologies, Inc.

Management Information

Louis J. Zant, President/CEO

As the founder of GoSolo Technologies, Lou Zant has been on the forefront of many big ideas and has experienced how, with a little bit of finesse and timing, innovative ideas become reality. Lou started four prior companies that exceeded \$100 million in annual revenues. His first two companies were in the fashion industry where his marketing savvy produced unprecedented results. But Lou had the vision and the aptitude to break into the technology sector and did so in a big way. In the early 90's, Lou identified a trend in personal security systems, and took heed to the call with the creation of Quorum International — a company that set records by taking sales from zero to \$21 million a month in just 21 months. Capitalizing on his knack for recognizing opportunity, Lou created his first company in the communications arena and launched N'Touch. N'Touch was developed to create one of the first successful "virtual office" concepts in telecommunications. After only 10 months, N'Touch was acquired, proving again that Lou could create a hit. After his two-year non-compete agreement expired, Lou was in the game again clearly recognizing the urgent need to make communications simpler and more manageable and to bring communications technologies together. In February of 1999, Lou put his concepts into action using the name "GoSolo" and the rest is history! With Lou as leader and visionary force behind GoSolo, the company is destined to become the number one, all-in-one, voice portal and personal communications service!

Gregg W. Corella, Executive Vice President

Considered a pioneer in the relatively new industry of unified messaging, Gregg brings leadership in both the technology and marketing triumphs of the company. Gregg plays a vital role in virtually every aspect of the company from conceptual development to project planning to marketing. He is responsible for overseeing sales, customer service, corporate communications and various marketing functions. Gregg's expertise in Web design and development has been instrumental in the design of the Web interface for GoSolo customers and customer service team. Formally trained as an architect, Gregg brings a unique skillset to the company including creative design and problem-solving abilities, project planning experience and a keen eye for detail. He is intimately involved in all aspects of strategic planning and operations.

Scott Seltzer, Chief Technology Officer

As GoSolo's very own computer and telecommunications wizard, Scott Seltzer's impressive knowledge base has ignited GoSolo to be the most advanced natural speech one-number service. In his role as Chief Technology Officer, Scott works his magic overseeing the programming of the platform, telephony software and hardware purchasing, and manages a support team of programmers. He also oversees all outsourced technology vendors employed by GoSolo. Scott's background includes being founder, president, and chief developer of a nine year old customized voicemail service bureau (now a wholly owned subsidiary of GoSolo), and several years in development and marketing roles with IBM Corporation.

Sonja R. Bentley, Director of Channel Relations

As a former advertising executive for the New York Times Company, Sonja's experience with major world players is an important asset to GoSolo as she develops the communications materials that interpret the GoSolo story. Sonja previously served as Public Relations Director for Prosperity Partners, Inc. as well, a role which prepared her well for her position as GoSolo's resident writer. Sonja's daily work path takes her from development to marketing, producing GoSolo support materials, scripting audio and visual presentations as well as all corporate communications.

Benjamin A. Stolz, General Counsel

General Counsel, Benjamin Stolz handles the intricacies of GoSolo's diverse legal demands which encompass telecommunications, securities, corporate and technology issues. Ben began his interest in technology at 18 when he was hired to design a prototype system for the insurance industry; he copyrighted his first product at 19. Picking up his law license in 1990, Ben has continued to focus on cutting edge technology issues. At GoSolo Ben not only protects the company's interests, but also plays an active role as Vice President of Strategic Planning. Combining both roles, Ben vigilantly protects GoSolo's interests and actively maps out its future with Senior Management.

Paul S. Hoffman, Chief Financial Officer

As GoSolo's former CPA, Paul accepted the role as Chief Financial Officer and is now leading the company into financial efficiency through advanced systems, management and technology. With a technical background that includes writing and programming of financial software, Paul brings a keen understanding of the financial management needs of GoSolo. Paul lends leadership and confidence to the GoSolo team as critical financial decisions are made. All financial and market analysis data are channeled through Paul.
