

**2004 Incumbent Local Exchange Carrier (ILEC) Data Request**  
**Third Supplemental Response**  
*(Fifth Supplement Due by October 5, 2004)*

**Company:** BellSouth Telecommunications, Inc.  
**Contact name & title:** Nancy H. Sims, Director  
**Telephone number:** 850 222-1201  
**E-mail address:** Nancy.Sims@bellsouth.com  
**Stock Symbol (if company is publicly traded):** BLS

1. Please complete the attached Tables 1-4.

**RESPONSE:** Completed Tables 2 and 3 are provided in the enclosed Proprietary CD-ROM. This response contains proprietary, confidential business information. BellSouth needs additional time to respond to Tables 1 and 4 and will supplement this request at a later date.

**FIRST SUPPLEMENTAL RESPONSE:** Completed Tables 1 and 4 are provided in the enclosed Proprietary CD-ROM. This response contains proprietary, confidential business information.

**SECOND SUPPLEMENTAL RESPONSE:** In response to the Florida Public Service Commission's ("Commission") request, Tables 1, 3 and 4 have been revised and are categorized as requested by and discussed with the Commission. The revised Tables are provided in the enclosed Proprietary CD-ROM. This response contains proprietary, confidential business information.

**THIRD SUPPLEMENTAL RESPONSE:** In response to the Florida Public Service Commission's ("Commission") August 12 request, Table 3 has been revised and is categorized as requested by the Commission. The revised Table is in the enclosed Proprietary CD-ROM. This response contains proprietary, confidential business information.

**FOURTH SUPPLEMENTAL RESPONSE:** In response to the Florida Public Service Commission's ("Commission") request, Table 4 has been revised and is categorized as requested by the Commission. The revised Table is in the enclosed Proprietary CD-ROM. This response contains proprietary, confidential business information.

**FIFTH SUPPLEMENTAL RESPONSE:** Revised Table 2 is provided in the enclosed Proprietary CD-ROM. This table has been revised to add information for Century FL. This response contains proprietary, confidential business information.

## SAMPLE DATA

ILEC TABLE-1: RETAIL ACCESS LINES (VGE Basis)

Note: UNKNOWN RSLR - Customer service record doesn't contain FID RESH to allow BellSouth to identify CLEC  
Note: UNKNOWN - BellSouth cannot determine the CLEC name at the Exchange level.

**PROPRIETARY**

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-2:**

- A. The purpose of this table is to obtain UNE-P and Resale lines (on a VGE basis) leased to CLECs. **Do not include lines or channels, such as private lines, that are not connected to a switch.**
- B. Each field must be populated. All entries must be made without quotation marks.
- C. **Report VGE Access Lines based on how you bill the CLEC.** If you bill a CLEC for 1 DS1, the access line count would be 24 even if the CLEC isn't utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 4. Enter Method of Service as UNE-P or Resale. **Each method must be entered in separate rows.**

Column 5. Enter Type of Service as either Analog or Digital. **Each type must be entered in separate rows.**

Column 6. For Analog lines, enter count of all analog loops for each method of service and service type (Res or Bus). **Each count must be entered in separate rows.** For digital services, enter line count as voice-grade equivalents (VGEs). Count lines based on how they are charged to the CLEC rather than how they are physically provisioned. **EXAMPLE:** Report 8 voice-grade equivalent lines if a CLEC buys 8 channels that happen to be provisioned over a DS1 circuit. If a CLEC buys a DS1 circuit that is provided as a channelized service, report 24 voice-grade equivalent lines, even if there is some indication that the CLEC is only using 8 of the derived lines. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication. Each line count must be entered in separate rows. The Grand Total must be equal to the total number of residential and business VGE access lines connected to the serving switches.

NOTE: UNKNOWN - BellSouth can not determine the CLEC name at the Exchange level.

**PROPRIETARY**

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-3:**

- A. *The purpose of this table is to obtain the actual count of lines leased to CLECs (other than UNE-P and resale). Do not include lines or channels, such as private lines, the*
- B. *Data must be actual line counts, not VGEs.*
- C. *Each field must be populated. All entries must be made without quotation marks.*

**TABLE COLUMN INSTRUCTIONS:**

*Column 1. Enter the CLEC's name.*

*Column 2. List exchanges in alphabetical order.*

*Column 3. Enter Method of Service as either EEL (include only loop and not transport piece), UNE-L, or Other (i.e. tariff services such as special access local, ISDN, etc.). Each row.*

*Column 4. Enter Line Type as Analog, ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), etc. Each row.*

*Column 5. Enter actual line count total, not VGEs, in the Total Lines column without duplication, e.g., Enhanced Extended Link (EEL) Loops must not be included in UNE-L count total must be entered in separate rows.*

*EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.*

## SAMPLE DATA

**ILEC TABLE-3: UNE-L, EEL Loop & Other Line Counts (not VGEs)**

1	2	3	4	5
CLEC Name	Exchange	Method of Service	Line Type	Total Lines
Company A	Apopka	UNE-L	analog	35
Company A	Apopka	UNE-L	DS1	4
Company A	Apopka	UNE-L	DS3	1
Company A	Apopka	EEL	DS3	2
Company A	Tampa	UNE-L	OC3	1
Company A	Tampa	EEL	ISDN-BRI	4
Company B	Naples	UNE-L	DS3	2
Company B	Naples	Other	OC1	1
Company B	Orlando	UNE-L	analog	53
Company B	Orlando	UNE-L	DS1	4
Company B	Orlando	UNE-L	DS3	5
Company B	Orlando	EEL	OC3	1
Company B	Orlando	Other	DS1	2

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-4:**

- A. The purpose of this table is to obtain a breakdown of retail digital access lines (reported in Table-1) by line type and actual line counts, not VGEs.
- B. DO NOT INCLUDE LINES OR CHANNELS THAT DO NOT HAVE SWITCH PORT ASSIGNMENTS SUCH AS PRIVATE LINES.
- C. Each field must be populated. All entries must be made without quotation marks.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. List exchanges in alphabetical order.

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered into separate rows.**

Column 3. Enter Line Type as ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), etc. **Each type must be entered in separate rows.**

Column 4. Enter actual line count total, not VGEs, in the Total Lines column without duplication. Example: Enter 1 for 1 ds1, 2 for 2 DS3s, etc. **Each actual line count total must be entered in separate rows.**

EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.

Note: Generally access line services transported over HICAP facilities are included in residence and business analog access line counts and BellSouth lacks the ability to segregate those lines from the total counts. An exception to this are those lines which are provisioned over PathLink (A primary rate ISDN service). An approximation of the impact of this service is included on the Business Digital row and represents the number of PathLink facilities times 23.

**PROPRIETARY**

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:**

- A. An access line connects the end-user's customer premises equipment (CPE) to the serving switch and allows the end-user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN). The access line counts in Table-1 above must be based on all of your different types of access lines such as copper, fiber, hybrid fiber/copper, coaxial cable, hybrid fiber/coaxial cable, fixed-wireless (free-space optics, microwave or satellite, etc.).
- B. Each field must be populated. All entries must be made without quotation marks.
- C. **Report VGE Access Lines based on how you bill the customer.** If you bill a customer for 1 DS1, the access line count would be 24 even if the customer isn't utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. List Exchanges in alphabetical order.

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 3: Enter Type of Service as either Analog or Digital. **Each type must be entered in separate rows.**

Column 4. For Analog lines, enter count of all analog loops for each method of service and service type (Res or Bus). **Each count must be entered in separate rows.** For digital services, enter line count as voice-grade equivalents (VGEs). Count lines based on how they are charged to the customer rather than how they are physically provisioned. **EXAMPLE:** Report 8 voice-grade equivalent lines if a customer buys 8 channels that happen to be provisioned over a DS1 circuit. If a customer buys a DS1 circuit that is provided as a channelized service, report 24 voice-grade equivalent lines, even if there is some indication that the customer is only using 8 of the derived lines. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication. Each line count must be entered in separate rows. The Grand Total must be equal to the total number of residential and business VGE access lines connected to the serving switches.

		GRAND TOTAL			821616

Note: UNKNOWN RSLR - Customer service record doesn't contain FID RESH to allow BellSouth to identify CLEC  
Note: UNKNOWN - BellSouth cannot determine the CLEC name at the Exchange level.

**PROPRIETARY**

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-2:**

- A. The purpose of this table is to obtain UNE-P and Resale lines (on a VGE basis) leased to CLECs. **Do not include lines or channels, such as private lines, that are not connected to a switch.**
- B. Each field must be populated. All entries must be made without quotation marks.
- C. **Report VGE Access Lines based on how you bill the CLEC.** If you bill a CLEC for 1 DS1, the access line count would be 24 even if the CLEC isn't utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 4. Enter Method of Service as UNE-P or Resale. **Each method must be entered in separate rows.**

Column 5: Enter Type of Service as either Analog or Digital. **Each type must be entered in separate rows.**

Column 6. For Analog lines, enter count of all analog loops for each method of service and service type (Res or Bus). **Each count must be entered in separate rows.** For digital services, enter line count as voice-grade equivalents (VGEs). Count lines based on how they are charged to the CLEC rather than how they are physically provisioned. **EXAMPLE:** Report 8 voice-grade equivalent lines if a CLEC buys 8 channels that happen to be provisioned over a DS1 circuit. If a CLEC buys a DS1 circuit that is provided as a channelized service, report 24 voice-grade equivalent lines, even if there is some indication that the CLEC is only using 8 of the derived lines. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication. Each line count must be entered in separate rows. The Grand Total must be equal to the total number of residential and business VGE access lines connected to the serving switches.

NOTE: UNKNOWN - BellSouth can not determine the CLEC name at the Exchange level.

**PROPRIETARY**

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-3:**

- A. The purpose of this table is to obtain the actual count of lines leased to CLECs (other than UNE-P and resale). **Do not include lines or channels, such as private lines, the**
- B. Data must be actual line counts, not VGEs.
- C. Each field must be populated. All entries must be made without quotation marks.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter Method of Service as either EEL (include only loop and not transport piece), UNE-L, or Other (i.e. tariff services such as special access local, ISDN, etc.). **Each rows.**

Column 4. Enter Line Type as Analog, ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), etc. **Ea rows.**

Column 5. Enter actual line count total, not VGEs, in the Total Lines column without duplication, e.g., Enhanced Extended Link (EEL) Loops must not be included in UNE-L count **total must be entered in separate rows.**

EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.

## SAMPLE DATA

PROPRIETARY

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-4:**

- A. The purpose of this table is to obtain a breakdown of retail digital access lines (reported in Table-1) by line type and actual line counts, not VGEs.
- B. DO NOT INCLUDE LINES OR CHANNELS THAT DO NOT HAVE SWITCH PORT ASSIGNMENTS SUCH AS PRIVATE LINES.
- C. Each field must be populated. All entries must be made without quotation marks.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. List exchanges in alphabetical order.

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered into separate rows.**

Column 3. Enter Line Type as ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), etc. **Each type must be entered in separate rows.**

Column 4. Enter actual line count total, not VGEs, in the Total Lines column without duplication. Example: Enter 1 for 1 ds1, 2 for 2 DS3s, etc. **Each actual line count total must be entered in separate rows.**

EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.

Note: UNKNOWN RSLR - Customer service record doesn't contain FID RESH to allow BellSouth to identify CLEC  
Note: UNKNOWN - BellSouth cannot determine the CLEC name at the Exchange level.

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-2:**

A. The purpose of this table is to obtain UNE-P and Resale lines (on a VGE basis) leased to CLECs. **Do not include lines or channels, such as private lines, that are not connected to a switch.**

B. Each field must be populated. All entries must be made without quotation marks.

C. **Report VGE Access Lines based on how you bill the CLEC.** If you bill a CLEC for 1 DS1, the access line count would be 24 even if the CLEC isn't utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 4. Enter Method of Service as UNE-P or Resale. **Each method must be entered in separate rows.**

Column 5: Enter Type of Service as either Analog or Digital. **Each type must be entered in separate rows.**

Column 6. For Analog lines, enter count of all analog loops for each method of service and service type (Res or Bus). **Each count must be entered in separate rows.** For digital services, enter line count as voice-grade equivalents (VGEs). Count lines based on how they are charged to the CLEC rather than how they are physically provisioned. **EXAMPLE:** Report 8 voice-grade equivalent lines if a CLEC buys 8 channels that happen to be provisioned over a DS1 circuit. If a CLEC buys a DS1 circuit that is provided as a channelized service, report 24 voice-grade equivalent lines, even if there is some indication that the CLEC is only using 8 of the derived lines. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication. Each line count must be entered in separate rows. The Grand Total must be equal to the total number of residential and business VGE access lines connected to the serving switches.

**SAMPLE DATA**

**ILEC TABLE-2: CLEC UNE-P & RESALE ACCESS LINES (VGE Basis)**

NOTE: UNKNOWN - BellSouth can not determine the CLEC name at the Exchange level.

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-3:**

A. The purpose of this table is to obtain the actual count of lines leased to CLECs (other than UNE-P and resale). **Do not include lines or channels, such as private lines, the**

B. Data must be actual line counts, not VGEs.

C. Each field must be populated. All entries must be made without quotation marks.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter Method of Service as either EEL (include only loop and not transport piece), UNE-L, or Other (i.e. tariff services such as special access local, ISDN, etc.). **Each rows.**

Column 4. Enter Line Type as Analog, ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (If you are providing voice over broadband service), etc. **Ea rows.**

Column 5. Enter actual line count total, not VGEs, in the Total Lines column without duplication, e.g., Enhanced Extended Link (EEL) Loops must not be included in UNE-L count **total must be entered in separate rows.**

EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.

## SAMPLE DATA

**ILEC TABLE-3: UNE-L, EEL Loop & Other Line Counts (not VGEs)**

1	2	3	4	5
CLEC Name	Exchange	Method of Service	Line Type	Total Lines
Company A	Apopka	UNE-L	analog	35
Company A	Apopka	UNE-L	DS1	4
Company A	Apopka	UNE-L	DS3	1
Company A	Apopka	EEL	DS3	2
Company A	Tampa	UNE-L	OC3	1
Company A	Tampa	EEL	ISDN-BRI	4
Company B	Naples	UNE-L	DS3	2
Company B	Naples	Other	OC1	1
Company B	Orlando	UNE-L	analog	53
Company B	Orlando	UNE-L	DS1	4
Company B	Orlando	UNE-L	DS3	5
Company B	Orlando	EEL	OC3	1
Company B	Orlando	Other	DS1	2

FLORIDA PUBLIC SERVICE COMMISSION

2004 ILEC Data Request TABLE-4

(Data as of May 31, 2004)

Company Name: BellSouth Telecommunications, Inc.

Company Code\*: TL720

\* Your ILEC Company code is shown on the label affixed to the envelope in which this was mailed and on the cover letter.

Grand Total	
-------------	--

**NOTES/INSTRUCTIONS FOR COMPLETING TABLE-4:**

A. The purpose of this table is to obtain a breakdown of retail digital access lines (reported in Table-1) by line type and actual line counts, not VGEs.

B. DO NOT INCLUDE LINES OR CHANNELS THAT DO NOT HAVE SWITCH PORT ASSIGNMENTS SUCH AS PRIVATE LINES.

C. Each field must be populated. All entries must be made without quotation marks.

**TABLE COLUMN INSTRUCTIONS:**

Column 1. List exchanges in alphabetical order.

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered into separate rows.**

Column 3. Enter Line Type as ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), VOB (if you are providing voice over broadband service), etc. **Each type must be entered in separate rows.**

Column 4. Enter actual line count total, not VGEs, in the Total Lines column without duplication. Example: Enter 1 for 1 ds1, 2 for 2 DS3s, etc. **Each actual line count total must be entered in separate rows.**

EXAMPLE: Enter 1 for 1 DS1 Loop, 2 for 2 DS3 Loops, etc.

## SAMPLE DATA

ILEC TABLE-4: RETAIL ACCESS LINE COUNTS (not VGEs)

1	2	3	4
Exchange	Res or Bus	Line Type	Total Lines
Apopka	Res	ISDN-BRI	2
Apopka	Bus	OC3	1
Orlando	Bus	DS3	5
Orlando	Res	VOB	3
Tampa	Res	DS3	4
Tampa	Bus	VOB	4
