2 PREPARED DIRECT TESTIMONY
3 OF
4 J. DENISE JORDAN

6 Q. Please state your name, address, occupation and employer.

8 A. My name is J. Denise Jordan. My business address is 702
9 North Franklin Street, Tampa, Florida 33602. I am
10 employed by Tampa Electric Company ("Tampa Electric" or
11 "company") as Director, Rates and Planning in the
12 Regulatory Affairs Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I received a Bachelor of Mechanical Engineering degree in 1987 from Georgia Institute of Technology in Atlanta, Georgia. Prior to joining Tampa Electric, I accumulated 13 years of electric utility experience working in the areas of rate design and administration, demand-side management implementation, commercial and industrial account management, customer service and marketing. In April 2000, I joined Tampa Electric as Manager, Electric Regulatory Affairs. In February 2001, I was promoted to

Director, Rates and Planning. My present responsibilities include the areas of fuel and purchased power, capacity, environmental and energy conservation cost recovery clauses, rate design, strategic planning and load research and forecasting.

Q. Have you previously testified before the Florida Public Service Commission ("Commission")?

10 A. Yes. On behalf of Tampa Electric, I have testified
11 before this Commission in the fuel and purchased power
12 dockets regarding regulatory treatment and cost recovery
13 of fuel and purchased power expenses since November 2000.
14 I also testified in Docket No. 010283-EI, which addressed
15 the calculation of gains and the appropriate regulatory
16 treatment for non-separated wholesale energy sales. In
17 addition, I have filed direct testimony and appeared
18 before this Commission on behalf of the company in
19 several other dockets.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present, for Commission review and approval, the proposed annual capacity cost recovery factors, the proposed annual levelized fuel and

1 purchased power cost recovery factors and the projected
2 wholesale incentive benchmark for January 2005 through
3 December 2005. In addition, I will address the 2005
4 projected incremental security costs due to increased
5 security as a result of the September 11, 2001 attacks;
6 the appropriate base amount and period for calculating
7 incremental security costs; and the projected incremental
8 operating and maintenance ("O&M") costs associated with
9 Tampa Electric's hedging activities. I will also
10 describe significant events that affect the factors and
11 provide an overview of the composite effect from the
12 various cost recovery factors for 2005.

13
14 Q. Have you prepared any exhibits to support your testimony?

15
16 A. Yes. My Exhibit No. ____ (JDJ-3), consisting of three
17 documents, was prepared under my direction and
18 supervision. Document No. 1 of Exhibit No. ____ (JDJ-3)
19 is furnished as support for the projected capacity cost
20 recovery factors. In support of the proposed leveled
21 fuel and purchased power cost recovery factors, Document
22 No. 2 is comprised of Schedules E1 through E10 for
23 January 2005 through December 2005 and Schedule H1 for
24 January through December, 2002 through 2005. Document
25 No. 3 provides the composite effect of the proposed cost

1 recovery factors on a 1,000 kilowatt-hour ("kWh")
2 residential bill.

3

4 **Capacity Cost Recovery Clause**

5 **Q.** Are you requesting Commission approval of the projected
6 capacity cost recovery factors for the company's various
7 rate schedules?

8

9 **A.** Yes. The capacity cost recovery factors, prepared under
10 my direction and supervision, are provided in Exhibit No.
11 ____ (JDJ-3), Document No. 1, Projected Capacity Cost
12 Recovery.

13

14 **Q.** What payments are included in Tampa Electric's capacity
15 cost recovery factors?

16

17 **A.** Tampa Electric is requesting recovery through the
18 capacity cost recovery factor of capacity payments for
19 purchases of power made for retail customers excluding
20 optional provision purchases for interruptible customers.

21

22 **Q.** Has Tampa Electric included costs for security alert
23 expenses as a result of the events of September 11, 2001?

24

25 **A.** Yes. The Commission has authorized in previous years'

1 fuel docket hearings, the recovery of incremental
2 security O&M costs arising as a result of the
3 extraordinary circumstances of the attacks of September
4 11, 2001, through the capacity clause. Therefore, as
5 shown on Exhibit ____ (JDJ-3), Document No. 1, Tampa
6 Electric requests recovery of \$363,579, after
7 jurisdictional separation, for estimated expenses in
8 2005.

9

10 Q. Were Tampa Electric's base year "post-9/11" security
11 costs adjusted for retail energy sales growth as required
12 by Order No. PSC-03-1461-FOF-EI, filed in Docket No.
13 30001-EI on December 22, 2003?

14

15 A. Yes. Tampa Electric's 2004 adjusted base year total
16 security O&M costs were \$2,135,077. After adjusting this
17 baseline for expected energy sales growth, a \$2,185,678
18 baseline was used to calculate Tampa Electric's 2005
19 incremental security costs. This calculation is shown on
20 Exhibit ____ (JDJ-3), Document No. 1, page 4 of 4.

21

22 Q. Please summarize the proposed capacity cost recovery
23 clause factors by rate schedule for January 2005 through
24 December 2005.

25

1	A.	Capacity Cost Recovery
2	<u>Rate Schedule</u>	<u>Factor (cents per kWh)</u>
3	Average Factor	0.302
4	RS	0.377
5	GS and TS	0.338
6	GSD, EV-X	0.278
7	GSLD and SBF	0.254
8	IS-1, IS-3, SBI-1, SBI-3	0.023
9	SL-2, OL-1 and OL-3	0.047

10
11 These factors are shown in Exhibit No. ____ (JDJ-3),
12 Document No. 1, page 3 of 4.
13

14 **Q.** How does Tampa Electric's proposed average capacity cost
15 recovery factor of 0.302 cents per kWh compare to the
16 factor for January through December 2004?

17
18 **A.** The proposed capacity cost recovery factor is 0.086 cents
19 per kWh (or \$0.86 per 1,000 kWh) higher than the average
20 capacity cost recovery factor of 0.216 cents per kWh for
21 the January 2004 through December 2004 period.

22
23 **Fuel and Purchased Power Cost Recovery Factors**

24 **Q.** What is the appropriate value of the base fuel and
25 purchased power cost recovery factor for the year 2005?

1 A. The appropriate value for the new period is 3.776 cents
2 per kWh before the normal application of factors that
3 adjust for variations in line losses. Schedule E1 of
4 Exhibit No. ____ (JDJ-3), Document No. 2, Fuel Projection,
5 shows the appropriate values for the total fuel and
6 purchased power cost recovery factor as projected for the
7 period January 2005 through December 2005.

8

9 Q. Please describe the information provided on Schedule E1-
10 C.

11

12 A. The GPIF and true-up factors are provided on Schedule E1-
13 C. Tampa Electric has calculated a GPIF penalty of
14 \$3,678,414, which is to be included in the calculation of
15 the total fuel and purchased power cost recovery factors.

16

17 Additionally, E1-C indicates the net true-up amount for
18 the January 2004 through December 2004 period. The net
19 true-up amount for this period is an under-recovery of
20 \$30,984,325.

21

22 Q. Please describe the information provided on Schedule E1-
23 D.

24

25 A. Schedule E1-D presents Tampa Electric's on-peak and off-

1 peak fuel adjustment factors for January 2005 through
2 December 2005.

3

4 **Q.** What is the purpose of Schedule E1-E?

5

6 **A.** The purpose of Schedule E1-E is to present the standard,
7 on-peak and off-peak fuel adjustment factors after
8 adjusting for variations in line losses.

9

10 **Q.** Please summarize the proposed fuel and purchased power
11 cost recovery factors by rate schedule for January 2005
12 through December 2005.

14	15	16	17	18	19	20	21	22	23	24	25	A.	Fuel Charge

1 IST-1, IST-3, SBIT-1, SBIT-3 4.561 (on-peak)
2 3.230 (off-peak)

3
4 **Q.** How does Tampa Electric's proposed average fuel
5 adjustment factor of 3.776 cents per kWh compare to the
6 average fuel adjustment factor for the January 2004
7 through December 2004 period?

8
9 **A.** The proposed fuel charge factor is 0.146 cents per kWh
10 (or \$1.46 per 1,000 kWh) lower than the average fuel
11 charge factor of 3.922 cents per kWh for the January 2004
12 through December 2004 period.

13
14 **Wholesale Incentive Benchmark Mechanism**

15 **Q.** What is Tampa Electric's projected wholesale incentive
16 benchmark for 2005?

17
18 **A.** The company's projected 2005 benchmark is \$1,222,083,
19 which is the three-year average of \$838,302, \$1,184,728
20 and \$1,643,220 in gains on the company's non-separated
21 wholesale sales, excluding emergency sales, for 2002,
22 2003 and 2004 (estimated/actual), respectively.

23
24 **Q.** Does Tampa Electric expect gains in 2005 from non-
25 separated wholesale sales to exceed its 2005 wholesale

1 incentive benchmark?

2

3 **A.** Yes. Tampa Electric anticipates that sales will exceed
4 the projected benchmark by \$2,846,417 of which 80 percent
5 or \$2,277,134 will flow back to ratepayers.

6

7 **Incremental Hedging O&M Costs**

8 **Q.** Is Tampa Electric seeking to recover prudently incurred
9 projected incremental O&M costs for initiating and/or
10 maintaining its non-speculative financial hedging program
11 in 2005?

12

13 **A.** Yes. The projected incremental O&M expenses are shown on
14 Exhibit No. ____ (JDJ-3), Document No. 2, Schedule E2,
15 line 8c. Exhibit No. ____ (JTW-2) of the direct
16 testimony of Tampa Electric witness J. T. Wehle itemizes
17 the expected O&M expenses by functional category.

18

19 **Events Affecting the Projection Filing**

20 **Q.** Are there any significant events reflected in the
21 calculation of the 2005 fuel and purchased power and
22 capacity cost recovery projections that were not
23 reflected in last year's projections?

24

25 **A.** Yes. There are three significant events. These are 1)

1 the company's fuel mix transition due to the repowering
2 of Gannon Station to H. L. Culbreath Bayside Station
3 ("Bayside Station"), 2) the company's wholesale purchases
4 and 3) Order No. PSC-04-0999-FOF-EI ("Order No. 0999")
5 issued October 12, 2004 in Docket No. 031033-EI regarding
6 Tampa Electric's waterborne coal transportation contract
7 costs.

8

9 **Q.** Please describe the first event that affects the
10 company's projection filing.

11

12 **A.** Tampa Electric's resulting fuel mix due to the repowering
13 of Gannon Station to Bayside Station is a significant
14 event. As described in the direct testimony of Tampa
15 Electric witness Wehle, Tampa Electric has completed its
16 shift from a predominant reliance on coal-fired
17 generation to a mix of coal and natural gas-fired
18 generation and changed its procurement strategies to
19 reflect that shift. Bayside Station became fully
20 operational in January 2004, and the increased reliance
21 on natural gas fired generation has resulted in increased
22 fuel costs. Since the 2004 projection was filed, the
23 average 2004 natural gas price increased 16 percent. The
24 increase in the natural gas market is the key driver of
25 Tampa Electric's increased fuel costs from the time of

1 the 2004 projection to its actual/estimated filing, and
2 the higher pricing is expected to continue through 2005,
3 resulting in an increase in Tampa Electric's fuel costs
4 to be recovered through the Fuel and Purchased Power Cost
5 Recovery Clause in 2005.

6

7 **Q.** Please describe the second event.

8

9 **A.** A purchase agreement was signed that results in an
10 increase in projected costs that will be recovered
11 through the capacity clause, compared to the 2004
12 projection. In an effort to improve reliability of
13 supply for retail ratepayers in 2004 and 2005 at
14 reasonable and prudent costs, Tampa Electric explored
15 numerous options. As a result, the company negotiated an
16 economical purchased power agreement with another
17 utility. The direct testimony of Tampa Electric witness
18 B. F. Smith describes the purchase and demonstrates that
19 the costs associated with the purchased power agreement
20 are prudent and appropriate for recovery through the Fuel
21 and Purchased Power and Capacity Cost Recovery Clauses.

22

23 **Q.** Please describe the third event.

24

25 **A.** The third event relates to the disallowance of costs

1 contemplated in Order No. 0999, which specifies that a
2 portion of the costs incurred by Tampa Electric under
3 the current contract with TECO Transport is not
4 reasonable for cost recovery. As a result, the annual
5 adjustment to the company's fuel cost recovery is an
6 estimated \$15,315,000 annually. On October 27, 2004,
7 the company filed a Motion for Reconsideration and/or
8 Clarification requesting the Commission to reconsider
9 Order No. 0999. However, pending the outcome of the
10 Motion, the company has reduced its 2005 fuel cost
11 recovery by \$30,630,000 to reflect the estimated annual
12 adjustments for both 2004 and 2005. In the event the
13 Commission's decision is reversed as a result of the
14 company's Motion, appropriate adjustments will be made
15 during the normal true-up process.

16

17 **Cost Recovery Factors**

18 **Q.** What is the composite effect of Tampa Electric's proposed
19 changes in its capacity, fuel and purchased power,
20 environmental and energy conservation cost recovery
21 factors on a 1,000 kWh residential customer's bill?

22

23 **A.** The composite effect on a residential bill for 1,000 kWh
24 is a decrease of \$0.94 beginning January 2005. These
25 charges are shown in Exhibit (JDJ-3), Document No. 3.

1 **Q.** When should the new rates go into effect?

2
3 **A.** The new rates should go into effect concurrent with the
4 first billing cycle for January 2005.

5
6 **Q.** Does this conclude your testimony?

7
8 **A.** Yes, it does.
