RE: Florida Power & Light Company's 2011 Ten Year Power Plant Site Plan

Dear Ms. Cole:

Enclosed are Florida Power & Light Company's ("FPL") responses to Staff's Second and Third Sets of Data Requests related to FPL's 2011 Ten Year Site Plan. An electronic copy of certain responses are also provided on the enclosed disc.

If you have any questions or concerns please feel free to call me.

Sincerely,

Jessica A. Cano

Data Request No. 2
Question 1

DOCUMENT NUMBER-DATE

03177 MAY-6 =

FPSC-COMMISSION CLERK

Q.

Please provide a description of the costs associated with each existing and planned utility-owned renewable generation resource. Please also include each renewable resource which provides fuel to conventional facilities (co-firing), if applicable, with estimates of its capacity and energy contributions. As part of this response, please include a description of the unit's generator type, fuel type, installed cost (nominal \$), fixed operations & maintenance (O&M) cost, variable O&M cost, fuel cost (if applicable), and the annual levelized cost of electricity. Please complete the table below and provide an electronic copy in Excel (.xls file format) and hard copy.

Utility-Owned Renewable Resources

Facility Name	Unit Type	Fuel Type	Installed Cost	Fixed O&M cost	Variable O&M Cost	Fuel Cost	Levelized Cost of Electricity
			\$/kW	\$/kW-yr	\$/MWh	\$/MWh	\$/MWh

A.

Please see the attached for FPL's existing renewable generation resources. FPL's 2011 Ten Year Site Plan does not include any planned utility-owned renewable generation resources. Please see FPL's responses to Staff's data requests provided on March 4, 2011, explaining that, in the absence of supporting legislation, FPL has not fully developed any specific projects but that it continues to perform initial permitting and due diligence activities with respect to solar and other renewable technology projects.

FPSC-COMMISSION CLERK

2011 Ten Year Site Plan Supplemental Data Request No. 2
 Question No. 1
 Attachment No. 1

Utility-Owned Renewable Resources

Facility Name	Unit type	Fuel Type	Installed Cost (1)	Fixed O&M cost (2)	Variable O&M Cost	Fuel Cost	Levelized Cost of Electricity (3)
			\$/KW	\$/KW-yr	\$/MWh	\$/MWh	\$/MWh
DeSoto Solar Center	Solar PV	Sun Light	6120	69	0	0	328
Space Coast Solar Center	Solar PV	Sun Light	7100	95	0	0	398
Martin Solar Center	Solar Thermal	Sun Light	5293	51	0	0	294

Notes:

- (1) Due to completion of remaining punchlist and other items, minor work orders remain open. and therefore final project costs are not complete at this time. Figures provided are estimated
- (2) 30 year average of escalated annual costs.
- (3) The levelized cost of electricity for the solar facilities is provided at 20% capacity factor. The capacity factor of the solar facilities is expected to be between 19% and 23%. These levelized costs of electricity include only the costs associated with each facility as a stand alone unit. They do not include the costs associated with operating these units as part of the FPL system (i.e. system impacts), which need to be considered in a proper economic analysis.

Data Request No. 2
Question 2

Q.

Please provide a description of the costs associated with each existing and planned renewable purchased power agreement. Please also include each renewable resource which provides fuel to conventional facilities (co-firing), if applicable, with estimates of its energy payments. As part of this response, please include a description of the unit's generator type, fuel type, annual capacity payments, annual energy payments, total annual payments to the facility, and the resulting levelized cost of electricity from the facility. Please complete the table below and provide an electronic copy in Excel (.xls file format) and hard copy.

Renewable Purchased Power Agreements

Facility Name	Unit Type	Fuel Type	Capacity Payments	Energy Payments	Total Payments	Levelized Cost of Electricity
			\$	\$	\$	\$/MWh

A.

The contracts for Broward Resource Recovery (North) and Broward Resource Recovery (South) include firm capacity obligations under the contract, plus an energy payment component. The Solid Waste Authority of Palm Beach County, pursuant to its contract, is currently delivering as-available energy while a facility refurbishment is underway. Upon completion of the refurbishment, the contract will revert to firm capacity. The proposed SWA Expanded Facility contract is a firm capacity contract currently before the Commission for approval. All other deliveries to FPL from renewables are "as-available" energy only contracts.

Data Request No. 2
Question 4

Florida Power & Light Company

Docket No.

2011 Ten Year Site Plan Supplemental Data Request No. 2

Question No. 4

Page 1 of 1

Q.

Please identify which climate station from the list below would most accurately represent the company's service territory, as a whole, for the purposes of determining a typical meteorological year. Alternatively, provide a data set for a typical meteorological year in an appropriate electronic format (TMY2, TMY3, or EPW). The stations below are drawn from the National Solar Radiation Data Base. Other publically available databases can be utilized, so long as an electronic copy is provided.

USAF	Station Name	USAF	Station Name
722215	Crestview Bob Sikes AP	747946	NASA Shuttle Fclty
722056	Daytona Beach Intl AP	722055	Ocala Muni (AWOS)
722039	Fort Lauderdale	722053	Orlando Executive AP
722025	Fort Lauderdale Hollywood Int	722050	orlando Intl Arpt
722106	Fort Myers Page Field	722057	Orlando Sanford Airport
722146	Gainesville Regional AP	722245	Panama City Bay Co.
722026	Homestead AFB	722225	Pensacola Forest Sherman NAS
722060	Jacksonville Intl Arpt	722223	Pensacola Regional AP
722065	Jacksonville NAS	722115	Sarasota Bradenton
722068	jacksonville/Craig	722108	Southwest Florida I
722010	Key West Intl Arpt	722103	St Lucie Co Intl
722015	Key West NAS	722104	St Petersburg Albert Whitted
722119	Lakeland Linder Rgn	722116	St. Petersburg Clear
747880	MacDill AFB	722140	Tallahassee Regional AP (ISIS)
722016	Marathon Airport	722110	Tampa International AP
722066	Mayport NS	747750	Tyndall AFB
722040	Melbourne Regional AP	722210	Valparaiso Elgin AFB
722020	Miami Intl AP	747770	Valparaiso Hurlburt
722029	Miami/Kendall-Tamia	722045	Vero Beach Municipal Arpt
722024	Miami/Opa Locka	722030	West Palm Beach Intl Arpt
722038	Naples Municipal	722226	Whiting Field NAAS

A.

The following are the weather stations that would represent FPL service territory:

- Daytona Beach International Airport
- Fort Myers Page Field
- Miami International Airport
- West Palm Beach International Airport

Data Request No. 2
Question 5

Q.

Please provide, if available, the hourly output, for the period January 1, 2010, through December 31, 2010, for an existing solar photovoltaic system in the company's service territory. As part of the data response, please provide the array's DC rating, AC rating, Array Orientation (degrees from south), and whether it is a fixed or tracking array. If a fixed array, please provide the degree of tilt, specifying if the tilt is seasonally changed (if so, when, and by how much). If a tracking array, specify whether it is a one or two axis tracking system. Please also provide general information about the installation, including panel height, whether shading issues exist, or other notable factors which may influence the array's output. Please complete the table below (expanding as necessary) and provide an electronic copy in Excel (.xls file format).

Month	Day	Hour	AC Output (kWh)
1	1	1:00	
1	1	2:00	
1	1	3:00	
1	1	4:00	
1	1	5:00

Array DC Rating: 27.60 MWac
 Array AC Rating: 25.00 MWdc
 Array Tilt: 0°F
 Tracker: One axis

Module Height: Height from ground varies throughout site. Range of array heights from bottom of module to ground is 3.5-5.0 ft
 Shading Issues: Some minor shading but no significant impact on projected annual generation.

Data Request No. 3
Question 1

Q.

1. The 2011 Ten-Year Site Plan shows that, beginning in 2016, the firm capacity purchases from the UPS and SJRPP will no longer be available.
 - a. Please describe or explain what plans, if any, FPL is making or has in place to either extend these contracts or to replace these purchases.
 - b. If this firm capacity cannot be renewed or replaced, what are FPL's plans for the excess transmission capacity that will become available as a result?

A.

- a. FPL cannot extend the SJRPP purchase. As explained in FPL's 2011 Site Plan on page 24: "due to Internal Revenue Service (IRS) regulations, the total amount of energy that FPL may receive from this (SJRPP) purchase is limited. FPL currently assumes, for planning purposes, that this limit will be reached in the first half of 2016. Once this limit is reached, FPL will be unable to receive firm capacity and energy from these purchases."

At that point in time, this power purchase contract will be in "suspension". The resulting reduction in resources due to the suspension of this contract is reflected in FPL's projected need for future resource additions, as discussed in FPL's 2011 Site Plan. Decisions regarding how to meet the need for resources in the future will be made as part of FPL's on-going resource planning process.

In regard to the UPS purchases, FPL chose, in January 2010, not to exercise its option to extend that part of the UPS contract that could have been extended (the Franklin and Harris Purchase Power Agreements) because such extension was determined not to be cost-effective. There is no option to extend the remaining part of the UPS contract (the Scherer 3 contract). The resulting reduction in resources due to the expiration of the UPS contracts at the end of 2015 is reflected in FPL's projected need for future resource additions, as discussed in FPL's 2011 Site Plan.

FPL continues to meet periodically with both Southern Company and Southern Power to discuss the possibility of future power purchases. Any proposals that may arise from those discussions regarding possible future power purchases will be evaluated in conjunction with other resource alternatives as part of FPL's on-going resource planning process.

- b. The end of these two purchases in 2016 will affect the amount of FPL's transmission capacity. The resulting transmission capacity will be accounted for in economic evaluations of potential sites and technologies for FPL self-build options, and of potential non-FPL capacity options as appropriate, when determining how best to meet its resource needs beginning in 2016.

Data Request No. 3
Question 2

Florida Power & Light Company

Docket No.

2011 Ten Year Site Plan Supplemental Data Request No. 3

Question No. 2

Page 1 of 1

Q.

In its 2011 Ten-Year Site Plan, FPL's Schedule 5 on page 91 shows that after a decline through 2014, the fuel requirements for steam generation increase for the remainder of the planning horizon. Please identify the steam units whose outputs will increase resulting in increased fuel requirements.

A.

The steam generating units whose operating hours are projected to increase in one or more years from 2015 through 2020, compared to their projected operating hours in 2014, are: Martin 1, Martin 2, Manatee 1, Manatee 2, and Turkey Point 1. Projected annual capacity factors for individual generating units, including those listed above, have been previously provided by FPL in the response to Question No. 25 of the 2011 Ten Year Site Plan Supplemental Data Request No. 1.

The projected increase in operating hours for these existing steam generating units is driven by a combination of factors including increased load growth and the projected reduction of approximately 1,310 MW of capacity due to the expiration of the UPS contract (approximately 165 MW of coal-fired capacity and 765 MW of combined cycle capacity) and the suspension of the SJRPP contract (approximately 380 MW of coal-fired capacity).

Data Request No. 3
Question 3

Q.

The 2011 Ten-Year Site Plan describes the need for additional natural gas supply and additional gas transportation capacity. However, no discussion is provided regarding FPL's plans to meet this need. Please explain or describe the steps being taken and the options being considered in order to ensure an adequate supply of natural gas will be available when the modernized units at Cape Canaveral and Riviera Beach become operational.

A.

FPL has entered into an agreement with Florida Gas Transmission Company (FGT) to add compression to their pipeline system which would allow FPL to use existing gas transportation capacity on FGT to serve Cape Canaveral. In addition, FPL has entered into a short-term transportation agreement with FGT for incremental firm gas transportation for the Summer periods (May through September) of 2013, 2014 and 2015. To serve the Riviera Beach plant, FPL will be installing pipeline and compression facilities as part of the overall Riviera Beach modernization project. These new facilities will allow FPL to serve the Riviera Beach plant either from FGT or through FPL's existing gas/oil pipeline which originates at FPL's Martin Plant.

FPL projects that existing gas transportation capacity on FGT and Gulfstream Natural Gas System (Gulfstream), along with the facilities and additional firm gas transportation described above, will be sufficient to meet the needs of Cape Canaveral and Riviera Beach through the end of 2015. FPL projects a need for additional natural gas transportation beginning in 2016 to meet the long-term needs of the modernized Cape Canaveral and Riviera Beach plants and the projected 2016 and 2020 greenfield combined cycle units discussed in FPL's 2011 Ten Year Site Plan.

FPL is currently evaluating available options for supplying additional gas to the FPL system. As part of this evaluation, FPL is examining a variety of factors regarding future generation that need to be considered prior to finalizing gas transportation requirements beyond 2016.
