DOCKET NO. 110001-EI
FILED: September 1, 2011

PETITION OF TAMPA ELECTRIC COMPANY

Tampa Electric Company (“Tampa Electric” or “company”), hereby petitions the Commission for approval of the company’s proposals concerning fuel and purchased power factors, capacity cost factors, generating performance incentive factors, and the projected wholesale sales incentive benchmark set forth herein, and in support thereof, says:

Fuel and Purchased Power Factors

1. Tampa Electric projects a fuel and purchased power net true-up amount for the period January 1, 2011 through December 31, 2011 will be an over-recovery of \$47,813,410 (See Exhibit No. ____ (CA-3), Document No. 2, Schedule E1-C).

2. The company’s projected expenditures for the period January 1, 2012 through December 31, 2012, when adjusted for the proposed GPIF reward and true-up over-recovery amount and spread over projected kilowatt-hour sales for the period January 1, 2012 through December 31, 2012, produce a fuel and purchased power factor for the new period of 4.190 cents per kWh before the application of time of use multipliers for on-peak or off-peak usage. (See Exhibit No. ____ (CA-3), Document No. 2, Schedule E1-E).

3. The company’s projected benchmark level for calendar year 2012 for gains on non-separated wholesale energy sales eligible for the shareholder incentive as set forth by Order

No. PSC-00-1744-PAA-EI, in Docket No. 991779 is \$2,160,817 as provided in the direct testimony of Tampa Electric witness Carlos Aldazabal.

Capacity Cost Factor

4. Tampa Electric estimates that its net true-up amount applicable for the period January 1, 2011 through December 31, 2011 will be an under-recovery of \$715,564, as shown in Exhibit No. ____ (CA-3), Document No. 1, page 3 of 5.

5. As described in the direct testimony of Carlos Aldazabal, the company's proposed capacity factor for January through December 2011 reflects the rate modifications approved in Order No. PSC-09-0283-FOF-EI in Docket No. 080317-EI, issued April 30, 2009. The company's projected expenditures for the period January 1, 2012 through December 31, 2012, when adjusted for the true-up under-recovery amount and spread over projected kilowatt-hour sales for the period, produce a capacity cost recovery factor for the period of 0.238 cents per kWh. For demand-measured customers, the factor Tampa Electric proposes to recover is \$.86 per billed kW as set forth in Exhibit No. ____ (CA-3), Document No. 1, page 4 of 5.

GPIF

6. Tampa Electric has calculated that it is subject to a GPIF reward of \$2,054,696 for performance experienced during the period January 1, 2010 through December 31, 2010.

7. The company is also proposing GPIF targets and ranges for the period January 1, 2012 through December 31, 2012 with such proposed targets and ranges being detailed in the testimony and exhibits of Tampa Electric witness Brian S. Buckley filed herewith.

WHEREFORE, Tampa Electric Company requests that its proposals relative to fuel and purchased power cost recovery, capacity cost recovery and GPIF be approved as they relate to

prior period true-up calculations and projected cost recovery charges, and that the Commission approve the company's projected wholesale sales incentive benchmark.

DATED this 1st day of September 2011.

Respectfully submitted,
