Subject: TECO question

Can you see this goes to the various suites, please?

Q: Why is the 2014 res. rate impact for the Revised Cost Original Scope \$.01, but \$.18 for the Reduced Scope option? (See page 14, Table 5)

A: Per TECO:

Column 1: is based on an in-service of early 2015; thus, the only costs incurred in 2014 would be net O&M costs of about \$200, 000.

Column 2: is based on an in-service date of early 2014 (because absent the conveyer system and the dome, construction cab be completed sooner) and thus more costs are incurred in 2014.
