Brevard Waterworks, Inc.

December 9, 2014

Office of Commission Clerk Public Service Commission 2540 Shumard Oak Blvd. Tallahassee, FL 32399

Re: Docket No. 140186-WU - Application of Brevard Waterworks, Inc. for Staff Assisted Rate Case in Brevard County – Staff Second Data Request Response

Dear Commission Clerk,

Please find attached for submission and consideration, Brevard Waterworks, Inc. response to Staff's Second Data Request dated December 3, 2014.

1. For each subdivision (Kingswood and Oakwood) please identify how many fire hydrants are in service.

Response: There are no fire hydrants. In addition, the minimum size line required for fire service is a 6" line. The largest water main for Brevard is 4".

2. Unaccounted For Water (EUW)

Response: Concerning the 2013 Annual report, it was discovered that the 2013 Annual Report submitted by Brevard Waterworks erroneously only included the information for the Kingswood system only and not for the combined both systems. Please find attached a Revised Schedule W-4 for both combined systems. In addition, please find attached a copy of the Monthly Unaccounted For Water report by system and combined for Brevard Waterworks for 2013 and 2014.

Concerning the request on the purchased water invoices, the information contained on the monthly invoices is for purchased water for the previous month. For example, the purchased water amount on the October 2013 invoice is for the previous month, September 2013. This is true for each invoice. So the table contained in Staff's Data Request is off by one month. Again, see attached copy of the Monthly Unaccounted For Water report. The county (Brevard County) misread the meter in November 2013 and there were errors in both the November and December 2013 invoices for Oakwood. Beginning in January 2014, Brevard County began issuing two separate bills for the compound meter. Previously, Brevard County added the reads of the two meters of the compound meter together. See attached e-mail and schedule from Brevard County. In addition, see attached schedule compiled by Brevard Waterworks for the monthly meter readings and consumption which equate to the amounts billed by Brevard County.

The information contained in Schedule F-1 is correct and no revisions are necessary.

3. EUW – Pro Forma: The Utility's response to staff's first data request, Number 15 indicates that the estimated cost to replace all the water mains and distribution system is approximately \$1 million.

Brevard Waterworks, Inc. Staff's Second Data Request December 9, 2014

Please provide details (e.g. pipe size, length of pipe, price per pipe size) regarding the estimated cost and provide any bids that were utilized in developing the estimated cost.

<u>Response</u> The pipe sizes and lengths are contained in Brevard's response to Staff's First Data Request. See attached cost estimate for the replacement. The total cost for replacement is \$835,437 which includes:

Materials	\$132,560
Directional Boring	\$627,877
Engineering	\$ 50,000
Pavement/asphalt	\$ 25,000

The directional boring is required for two reasons. First, the current mains and distribution system is located primarily at the back of the customers homes. This system was installed decades ago and the customers' properties have fences, sheds, trees, and numerous encumbrances which currently make it extremely difficult to access for meter checks, turn offs, turn ons, etc. The second reason relates to the shallow water table in the area. The water table is approximately 2-3 feet below the ground surface.

The replacement would involve moving the mains and distribution system to the front of the houses within the road right-of-ways. However, this would involve requiring the customers and homeowners to install new service lines from the house to the new meters. This has the potential of placing additional financial burden on the customers. This replacement to the front of customer homes has previously been approved by the Commission in Order No. PSC-06-1027-PAA-WS, issued December 11, 2006. Due to the cost to replace the aging infrastructure and the financial burden it would place on the customers, Brevard Waterworks believes the most reasonable alternative at this point is to not make an unaccounted for water adjustment in the SARC. When it becomes necessary to replace the infrastructure, Brevard Waterworks will file a subsequent rate case to address the replacement costs.

However, if the Commission determines that an unaccounted for water adjustment is necessary, Brevard Waterworks may have no alternative then to proceed with the replacement of its infrastructure due to the financial burden the adjustment would place on this small Class C utility. Brevard Waterworks still will be required to pay the purchased water costs to the County with no means of recovery. Brevard Waterworks respectfully requests that the costs of replacement be taken into consideration when analyzing the unaccounted for water. Brevard continues to work diligently to locate any probably water leaks. In addition, the majority of the service lines are galvanized metal which has caused sediment build up in the customers' service lines.

Respectfully Submitted,

Troy Rendell

Manager of Regulated Utilities // for Brevard Waterworks, Inc.

YEAR OF REPORT DECEMBER 31, 2013

Oakwood Water 4" water install doc02180920141209104620.pdf

Ron,

Attached are quotes for material (Ferguson) \$132,560 and install (S&S Directional) \$627,877. Total is \$760,437.

In addition I would add

Engineering / plan prep / permits \$50,000 Pavement/asphalt replac \$ 25,000

Total \$835,437 for budget cost

Thanks

Mark
