CONSUMER COMMENTS
As per letter mailed 6/2014 titled "Important Information About Your Drinking Water" "Lake Josephine Water Treatment System Has Levels of Haloacetic Acids which Violates Standard" the letter then states "Health Effect"- "Some people who drink water containing Haloacetic Acids in excess of their Maximum Contaminant Level (MCL) over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer."
Why should they get an increase with these standards of water quality when I have to go out and buy potable water to consume?
