Florida Power & Light Company and PRECO provide the following responses to Staff's First Data Request:

1. The proposed amendment would realign the territorial agreement so that Phase 1 of a new development would lie entirely within PRECO territory. Do the parties anticipate future amendments as the development is built out beyond Phase 1?

The parties are not aware of any future amendments to the territorial agreement that will be required as a result of the development of the Del Web subdivision.

2. Do the parties believe the proposed amendment is in the public interest?

Yes. As discussed in the parties' joint petition, the proposed amendment will not cause a decrease in reliability of electrical service to the existing or future members of either utility, is likely to eliminate or prevent uneconomic duplication of facilities and will promote the Commission's stated policy of encouraging territorial agreements between and among Florida's electric utilities.
