*“They're asking for money to resolve – to get more profit for people that are out – for their shareholders that are out of state. Now we have seniors that cannot afford to buy their medication, and now with this rate increase and everything else, as everyone has spoken about, that will – it's not only a 23 percent, everything that comes with it that they're going to have to pay for, they may have to – they may have to serve – they may have to not eat to be able to pay for their bills.”*

*Times are hard and now FPL wants to make it harder for us that have to make a choice on what to do with our hard earned money. Many seniors are on a fixed income and this will create a harder life for them. Are shareholders more important than their customers who need the service. We do not have a choice on who to use as FPL is the only one here in Florida.*
