Comments:

I have read in the Orlando Sentinel that Duke Energy wants to raise their rates because of projected fuel prices. WHY ? The price of fuel has been down for over a year and we the customers has not seen a decrease in our rates dues to lower prices and now they want to go up. NO WAY.

I would like the commission to reject their request for we the customers like myself on a fixed income and no raise in S/S in the last year don't need to pay more.

So, PLEASE, REJECT THIER REQUEST.

Thanks,
Phil Fiedler

Subject: When will you stand up and protect my Interest?

I find the recent news article printed in the TampaBay Times very concerning and it should also concern the PSC the unelected by the people group of people that has taken an oath to protect the interest of Utility Customers who have no choice but to buy their electric from only One Company. Does anyone in the Board have Duke as their electric Provider? Doubt this will be answered. The article shows that Duke Elec customers pay by far the highest Electric Rate of any Power Company in Central Florida. The PSC will shortly see and approve 2016 Electric Rate requests and this TampaBay Times article writes, it's pretty much automatic...really? 2017 Rates for 1st 1000K; FI Power&Light \$91.56 (reduction); Tampa Elec \$106.22; DUKE ENGERY 111.76. If Duke is doing such a poor job managing profits vs the other 2 Power companies why should they be rewarded with a Rate Increase? Oh, I know, as Customers the PSC would rather keep Dukes Stock Holders happy...who by the way could sell their Stock, rather than Duke Customers who have absolutely NO CHOICE. I would love to be in a position to own a Publically Traded company that when I mess up maintenance and repairs to my equipment I can just ask the PSC to approve an increase to pay for the damages/repairs and....get it.

Does anyone there at the PSC see a problem with this Picture? Highest Electric Rate for 2017 and, customers paying for Dukes failure to properly maintain and Repair equipment.... Are there any of the PSC that instead of "Rubber Stamping" Dukes 2017 Rate Increase will sit back and push back at Duke, reject their rate Increase and tell them to get more in line with the other Power companies Rates? PSC members who will do the job they were appointed to do and protect the Electric Customers of Duke Energy from paying the HIGHEST Electric rate in Central Florida? Last I looked Duke Energy was Financial Solid...and paying excellent Dividends to their share holders off the backs of Florida Customers that they want to increase their rates.

Will the PSC finally this time stand up to Duke and decline their Electric rate Increase and do their appointed job of Protecting Florida Electric Customers and tell them what many hard working Floridians are doing, cutting what they spend to live within their income. Duke needs to cut their expensive....and not just roll them over to the people who can least afford to support Duke. If the other Providers in this area can charge less.....Duke should as well. Lets see, if Best Buys discovers that HHgregg is charging less for a product what do they do, yep, they lower their price to make the sale. Duke on the otherhand doesn't need to do that because the Florida PSC simply awards them the money so they DON'T HAVE to Lower their Price.
