Key Rating Drivers

Stable Outlook: Fitch Ratings last affirmed the ratings for Florida Power & Light Co. (FPL) on Dec. 4, 2014. FPL's ratings reflect the predictable nature of cash flows from regulated electric operations, a favorable 2012 rate order that provides for at least four years of regulatory certainty, recovering electric sales in its service territory after a prolonged trough, management focus on O&M cost containment that is expected to drive returns close to the upper end of the authorized return on equity (ROE) range, and a strong balance sheet and liquidity profile.

Constructive Regulation: A favorable turnaround in the regulatory climate in Florida and an extended period of regulatory certainty are key credit positives for FPL The 2012 rate order spans a four-year term (until December 2016), set rates based on 10.5% ROE with a 100 bps band and automatically adjusts base rates on commercial operations of new generation plants over 2013–2016.

Recovering Florida Economy: Florida's economy is recovering well after the recent prolonged recession, with most key indicators such as housing starts, employment statistics and consumer sentiment on an upward trend. Adjusted for weather, FPL's retail kilowatt hour sales grew 1.3% in 2014, driven by 1.2% customer growth and 0.1% usage increase. Fitch's financial forecasts for FPL are based on a 1% cumulative annual growth rate in retail sales over 2015–2018; any upside in sales growth would be positive for FPL's credit metrics.

High Capex: FPL has identified approximately \$14.6 billion in capex through 2019. Fitch believes this target is likely to be exceeded, given the recent approval by the Florida Public Service Commission (FPSC) to invest up to \$500 million annually in natural gas reserves projects. Fitch expects FPL to finance its capex and distribution to the parent using a mix of equity and debt so as to maintain its regulatory capital structure.

Robust Credit Metrics: FPL's forecasted FFO credit metrics are expected to weaken from their current robust levels as benefits from bonus depreciation subside after 2015. Fitch expects the FFO fixed-charge coverage to be in the 7.0x–9.0x range over the forecast period, 2015–2018. FFO-adjusted leverage and adjusted debt/EBITDAR are expected to be 3.0x and 2.3x, respectively, by 2018. These metrics are quite robust compared with the 'A' rated financial profile for a regulated utility.

Rating Sensitivities

Positive Rating Action: Given strong rating linkage with its parent company, NextEra Energy, Inc. (NextEra), that is rated a notch lower, future positive rating actions appear unlikely.

Negative Rating Action: Downward rating pressure could result from unfavorable changes in current Florida regulatory policies for timely recovery of utility capital investments, fuel and purchased power costs, and storm-related costs; or increasing parent risk profile from higher debt leverage or aggressive corporate strategy. A downgrade in NextEra's ratings would adversely affect FPL's ratings, consistent with Fitch's parent and subsidiary rating linkage criteria.

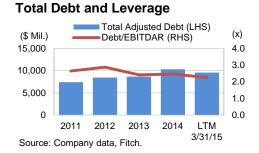

Financial Overview

Liquidity and Debt Structure

FPL independently funds its short-term and long-term debt needs, while 100% of FPL's equity is invested by NextEra. FPL's long-term debt financing vehicles are primarily taxable secured first mortgage bonds and tax-exempt revenue bonds. FPL has its own credit facilities, separate from NextEra and its other subsidiaries, to provide liquidity backup for commercial paper funding and variable-rate tax-exempt revenue notes, as well as for issuance of letters of credit.

Committed corporate credit facilities for the NextEra group of companies aggregate approximately \$8.8 billion, excluding limited recourse or non-recourse project financing arrangements. Included in that total is \$7.85 billion of corporate credit facility that includes \$3 billion in unsecured facilities available to FPL (entire amount available as loans and \$2.5 billion available to issue letters of credit). Out of the \$3 billion credit facility, \$500 million matures in May 2016, while the rest matures in 2020. Other credit facilities available to FPL include a \$200 million revolving term loan facility that matures May 2018. FPL's debt maturities are manageable.

Debt Maturities and Liquidity (\$ Mil., as of March 31, 2015) 2015 28 2016 — 2017 300 2018 — Thereafter 9,114 Cash and Cash Equivalents 28 Undrawn Committed Facilities 2,808

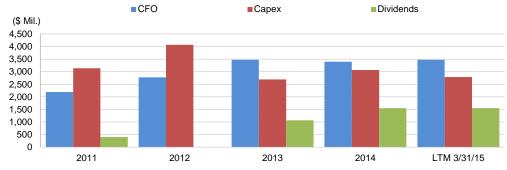

Cash Flow Analysis

Source: Company data, Fitch.

Fitch expects FPL to generate adequate cash flow from operations to fund its capital reinvestment needs. However, dividend distribution to its parent will render the company FCF negative. Fitch expects FPL to finance its capex and dividend to the parent using a mix of equity and debt so as to maintain its regulatory capital structure.

Key Rating Issues

Constructive Regulation

Fitch views the current Florida regulatory environment as constructive and vastly improved from the highly politicized decision-making witnessed at the depths of the last recession. FPL was successful in securing a favorable rate order for its 2012 base rate case. The rate order, effective from January 2013 to December 2016, provides for regulatory certainty for four years. The authorized regulatory ROE is 10.5% with a range of plus or minus 100 basis points. FPL can seek rate relief if the regulatory ROE falls below 9.5% and, conversely, can be pulled into a rate review if the ROE exceeds 11.5%. FPL has the ability to amortize a depreciation reserve surplus of approximately \$224 million and fossil dismantlement reserve of \$176 million to keep the regulatory ROE within the band. The rate order also provided for automatic adjustment to base rates to reflect FPL's three modernization projects, i.e. Cape Canaveral, Riviera Beach and Port Everglades.

High Capex

FPL's capex has been high over the last few years, mostly driven by new generation additions. As part of its fleet modernization program, FPL constructed and placed into service the 1,210 MW Cape Canaveral and 1,212 MW Riviera Beach power plants in April 2013 and April 2014, respectively. FPL has also undertaken uprates at its nuclear facilities of St. Lucie and Turkey Point, which resulted in an incremental 522 MW of capacity at these units. Through a generation base rate adjustment (GBRA) mechanism, FPL has been able to receive rate recovery of its modernization projects without filing for a rate case. These increases amounted

to \$164 million for Cape Canaveral and \$234 million for Riviera Beach. The nuclear uprate costs are being recovered through the nuclear clause and base rates.

Capex peaked in 2012 and has been moderating since, but it is likely to pick up again. FPL is in the process of modernizing its Port Everglades plant (1,240 MW), which is expected to be operational in mid-2016. FPL has issued a request for proposal for capacity need in 2019 and its self-build option includes a new natural gas-fired combined cycle plant in Okeechobee County, FL. In addition, FPL plans to build three solar PV projects (74 MW each) that are expected to be placed into service by the end of 2016. FPL has also announced plans to purchase the 250 MW coal-fired Cedar Bay facility, which has a power purchase agreement with FPL through 2024. Once the acquisition, which requires FPSC approval, is complete, FPL plans to retire the plant by the end of 2016.

In December 2014, the FPSC approved FPL's petition to invest in natural gas reserves and recover costs associated with the investment through the fuel clause. A wholly owned subsidiary of FPL will, in partnership with a third party, develop up to 38 natural gas production wells in the Woodford shale region. In June, the FPSC authorized FPL to invest up to \$500 million annually in future natural gas reserves. FPL also is in the process of obtaining a combined construction and operating license from the Nuclear Regulatory Commission for two additional nuclear units (2,200 MW) at its Turkey Point site.

Rebound in Customer Growth

Florida's economy is recovering well after the last prolonged recession, with most key indicators such as housing starts, employment statistics and consumer sentiment on an upward trend. Adjusted for weather, FPL's retail kilowatt hour sales grew 1.3% in 2014, driven by 1.2% customer growth and 0.1% usage increase. In 2013, FPL's weather-adjusted retail sales grew by 0.8%, driven by 0.6% customer growth and 0.2% increased usage.

Fitch's financial forecasts for FPL are based on a 1% cumulative annual growth rate in retail sales over 2015–2018; any upside in sales growth would be positive for FPL's credit metrics. Conversely, a flat or declining growth environment could put pressure on FPL's financial performance. However, FPL's credit metrics are expected to be quite robust over 2015–2018, and there exists adequate headroom to withstand a long period of flat-to-negative growth, which is what Fitch has assumed in its stress case. This is also a key factor in the stability of FPL's ratings, since the utility cannot implement a base rate increase outside the new generation additions before December 2016.

Strong Credit Metrics

FPL's credit metrics remain robust over the rating horizon and are strong compared to its 'A' rating level. The metrics show modest deterioration as the utility nears the end of its rate freeze period and continues to invest heavily in improving its infrastructure. Growth in EBITDA is supported by sales growth and preapproved base rate increases. FFO is negatively affected as the tax shield offered by bonus depreciation subsides and FPL resumes cash payments to its parent.

Fitch expects FFO fixed-charge coverage to be in the 7.0x–9.0x range over the forecast period, 2015–2018. FFO-adjusted leverage and adjusted debt/EBITDAR are expected to be approximately 3.0x and 2.3x, respectively, by 2018.

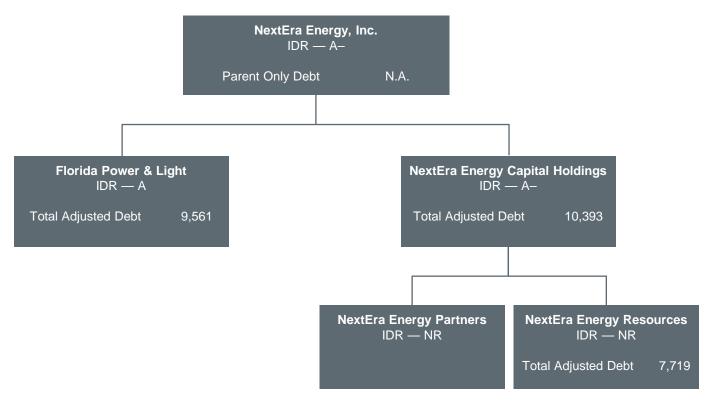

Organizational Structure

The rating linkage between NextEra and FPL is strong, given the strategic importance of FPL in the overall portfolio and common financial ties. However, FPL's authorized regulatory capital structure (40% debt and 60% equity) and 65% debt/cap covenant in its debt indentures limit the distribution that could be paid to the parent and provide for a one-notch differential between FPL's and NextEra's Issuer Default Ratings. The proposed acquisition of Hawaiian Electric Industries, Inc. (HEI) does not affect the ratings of FPL. HEI will become a wholly owned, second-tier holding company of NextEra.

Company Profile

FPL is an integrated electric utility that provides rate-regulated electric service to approximately 4.7 million customer accounts in Florida. Residential customer accounts comprise 89% of the total, with commercial customer accounts making up the rest. Its residential and commercial retail bill per kWh is one of the lowest in Florida and also below the national average.

FPL owns approximately 25,100 MW of generation capacity. FPL's fuel mix is 68% natural gas, 23% nuclear, 4% coal and 5% purchased power. FPL has firm transportation contracts in place for existing pipeline capacity with five transportation suppliers. In 2013, the FPSC approved FPL's 25-year natural gas transportation agreements with the proposed Sabal Trail and Florida Southeast Connection pipelines, both of which include NextEra as a project sponsor and are expected to be operational in mid-2017.

The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single
