

IHS Global Insight and EDR Population Projections

IHS Global Insight's population estimates continue to be more in line with the U.S. Census

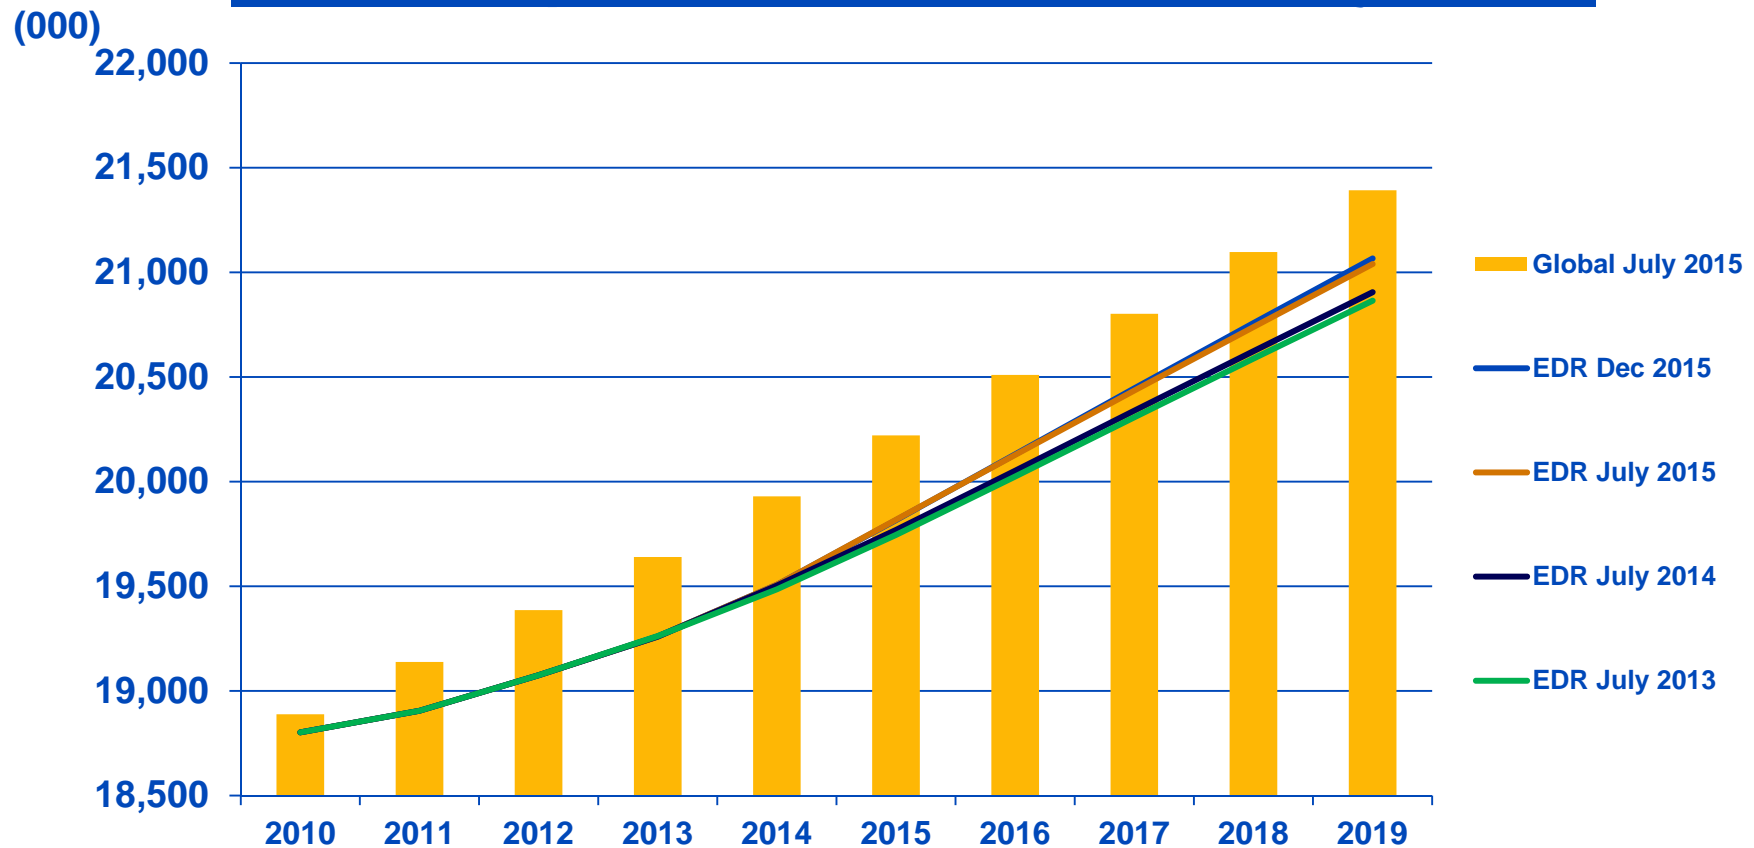

Florida Population - Estimates

U.S. Census figures as of July 2015

Despite increases in EDR's projections, IHS Global Insight's population projections continue to exceed EDR's

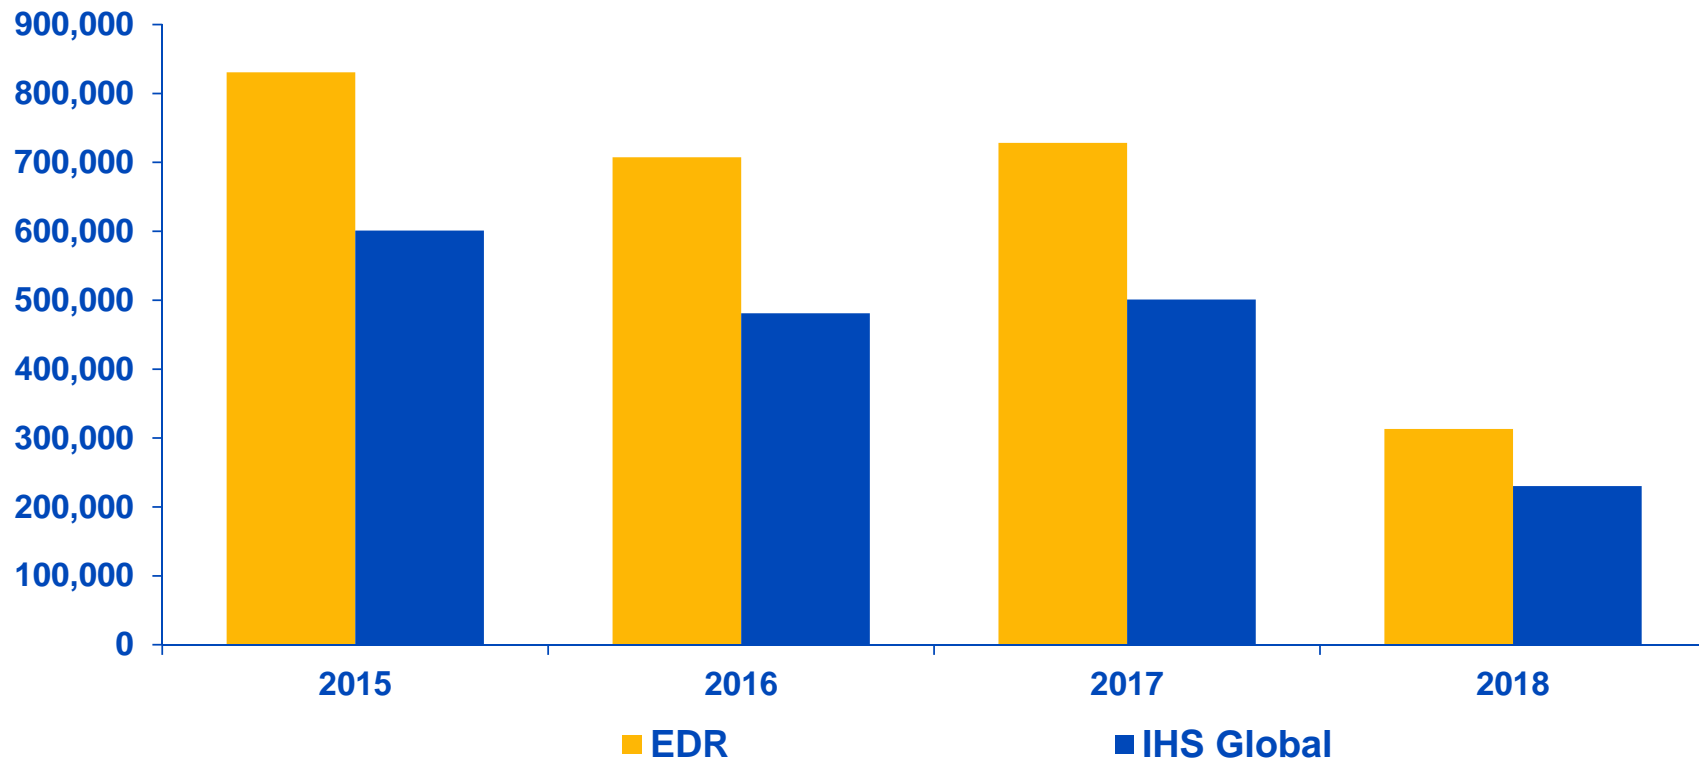

Florida Population – Estimates & Projections

EDR raised its population projections again in Dec 2015

EDR's population projections have been more volatile based on the standard deviation of forecasts

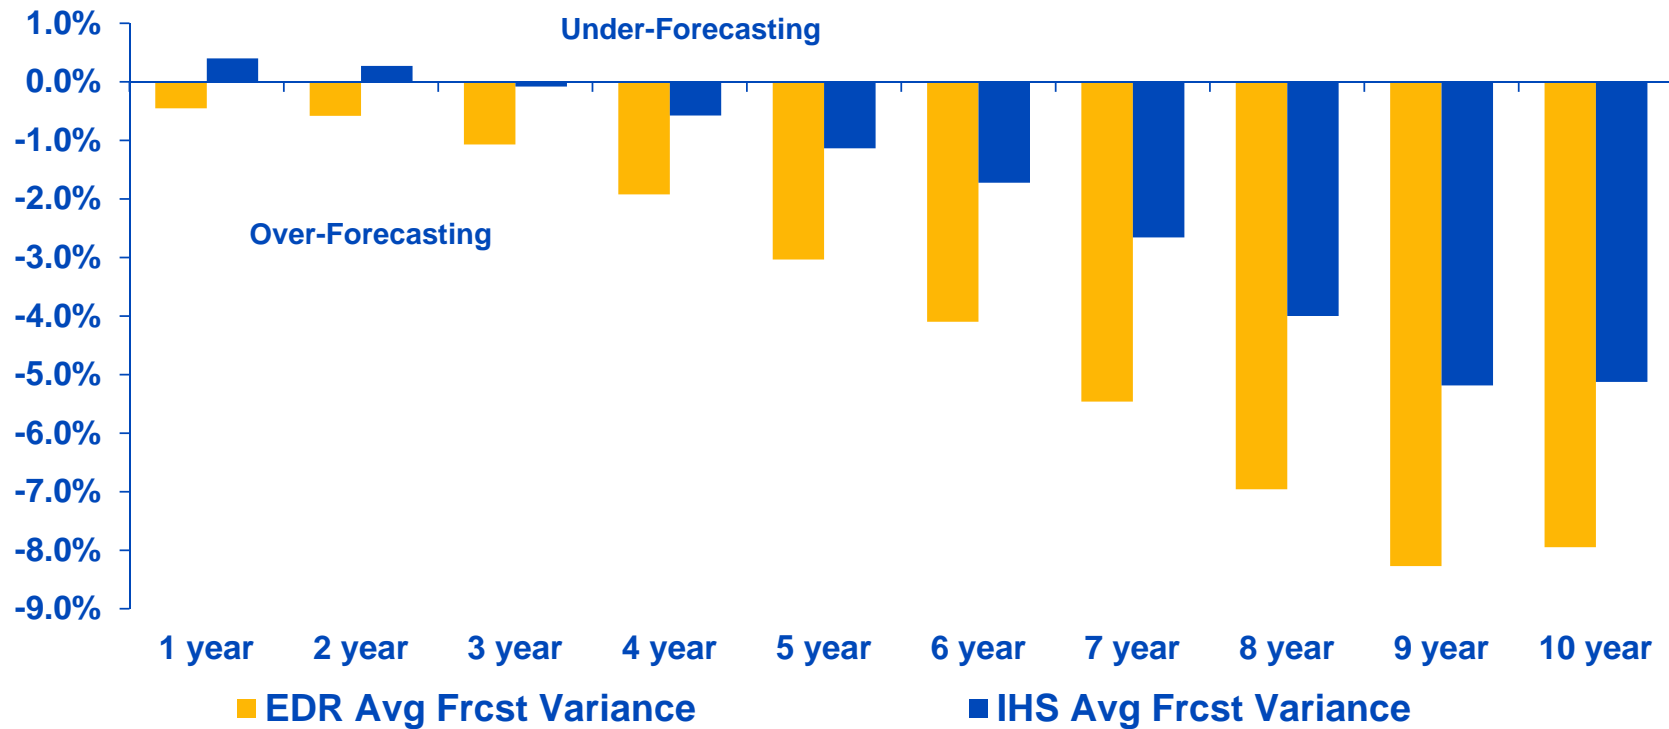

Standard Deviation in Forecasts by Year

The larger standard deviation suggests EDR has been making larger revisions to its population projections

IHS Global Insight's forecasting accuracy compares well with EDR's

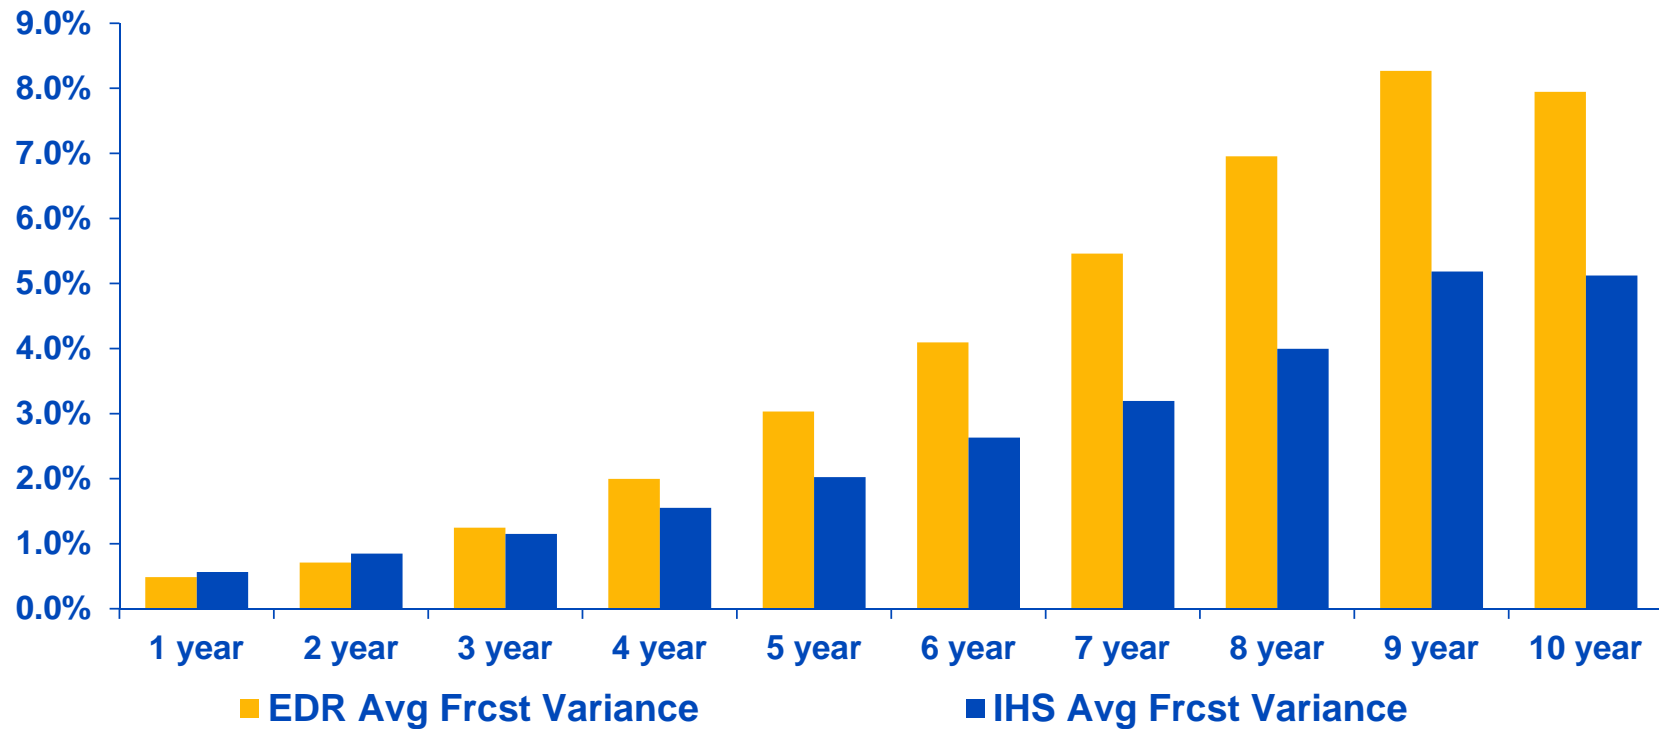

Average Forecast Variance

The x-axis shows the forecasting horizon, e.g. 1 year ahead, 2 years ahead, etc.

IHS Global's absolute forecasting variances compare well with EDR's

Average Absolute Forecasting Variance

The x-axis shows the forecasting horizon, e.g. 1 year ahead, 2 years ahead, etc.
