**Subject:** About the FPL rate hike request

Hello,

I can't get through on the 800 number, but would like to make my opposition known to the FPL rate hike you are considering on Tuesday.

I want you to know I support more solar energy expenditures, not money going to unneeded gas burning plants that will result in higher power bills for us all. Now and in the future.

Thank you,

Bill McIltrout  
Fort Myers FL

### COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company  
Details:

I oppose FPL's rate hike request for gas-burning power plants that are unnecessary. I am particularly concerned that the new billion-dollar expenditures on gas plants in FPL's rate increase proposal will needlessly expose me and my fellow Floridians to more expensive electricity now and in the future. I want FPL to invest in affordable solar energy instead. Fossil fuel burning is causing climate change that threatens southern Florida more than any other part of the USA. Enough is enough. Get your head out of your ass and start building clean energy generation NOW !

**Subject:** FPL Rate Increase

Hello!

I understand that FPL has requested a rate increase for the purpose of building gas-burning power plants to generate electricity. I would much prefer that FPL direct their investment toward the generation of affordable solar energy instead. We need to move away from reliance on fossil fuels and outdated fuel solutions that are harmful to the environment. I would greatly appreciate it if the commission would challenge FPL's strategy toward gas-burning plants and deny the rate increase on the basis that this solution is the right one. I really don't want us, the consumers who pay for electricity, to waste our hard-earned money financing billion dollar plants that represent old fashioned solutions. Let's keep moving into a future in which clean, renewable energy solutions are encouraged and outdated thinking is challenged.

**Subject:** Upcoming rate hike decision

To whom it may concern,

I live in Boca Raton, Florida. I oppose FPL's rate hike request for gas-burning power plants that are unnecessary. I am particularly concerned that the new billion-dollar expenditures on gas plants in FPL's rate increase proposal will needlessly expose me and my fellow Floridians to more expensive electricity now and in the future. I want FPL to invest in affordable solar energy instead.

Thank you for your time,  
Sandi Schwartz

### COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company  
Details:

I understand that on November 29th the PSC will decide whether or not to approve a significant rate increase for Florida Power & Light (FPL). My complaint is that FPL has made such a request. I oppose a rate hike for FPL because it includes more than one billion dollars' worth of expenditures on gas-burning power plants which are destined to become obsolete. Even FPL knows that eventually solar power and batteries will out-compete plants that burn gas. I don't want to be paying for more expensive electricity now and in the future. I want FPL to invest in more affordable solar energy. Please disapprove the requested rate hike. Thank you for considering my plea.
