**Subject:** FPL's pending rate case petition

I am writing to urge you to oppose FPL's pending rate case petition. This outrageous increase is not needed. FPL's bid to expand the use of natural gas and build new power plants punishes ratepayers in the name of corporate profits. FPL should instead be vigorously supporting rather than obstructing solar power in the "Sunshine" state. Some mix of power generation facilities will always be needed, but FPL is being deliberately shortsighted in their choice of alternatives.

FPL Vice President of Customer Service Marlene Santos tells us that FPL wants to "improve its facilities, switch to cleaner fuel sources and strengthen its infrastructure." Much of this work can be accomplished by honestly supporting deployment of current, cost-effective solar technology, putting viable options for distributed electrical power directly in the hands of ratepayers and taxpayers. Please act in the best interest of ratepayers as you consider FPL's motives and need for these rate hikes.

Dr. Andrew J. Brovey

**Subject:** Opposition to FPL's outdated gas-burning power plants

To the Public Service Commission,

I am writing to you in opposition to the FPL rate hike.

Please vote for solar energy and Florida friendly energies to help our future clean. I am against fracking by the power companies and the damage they have already left us with. The gas will come from more fracking sites. There is no reason to allow FPL more money to raise our rates to use fracked gas for my power. I have and will continue to protect our state, and other affected states from unnecessary excess. There is simply no need for the billion-dollar FPL proposal.

Let us invest in environmental efforts to utilize the sun for our energy needs and reduce greenhouse gases from polluting our beautiful state of Florida.

Thank you for allowing my vote against FPL's rate hike for gas plants in Florida.

Denise Glass

**To:** Consumer Contact  
**Subject:** FPL's Rate Increase

I'm writing to express my opposition to FPL's proposed massive rate increase in order to build new plants. I believe that any new revenue should be used to expand solar energy which will be best for our environment.

Sincerely,  
Patricia McDougale  
Miami

### COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company

#### Details:

I oppose FPL's rate hike request for gas burning power plants that are unnecessary. I am particularly concerned that the new billion dollar expenditures on gas plants in FPL's rate increase proposal will needlessly expose me and my fellow Floridians to more expensive electricity now and in the future. I want FPL to invest in affordable solar energy instead.

**Sent:** Tuesday, November 22, 2016 9:32 AM  
**To:** Consumer Contact  
**Subject:** Proposed FPL rate Hike

I am contacting you to lodge my opposition to the proposed rate hike by FPL to construct more fossil fuel burning power plants in the state. After their failed attempt to deceive Florida voters with Amendment 1, it is time that FPL puts all of their money and effort to making Florida the leader in solar energy in the country. We are, after all, the sunshine state!

Thank you  
Craig Milan  
Miami, FL 33129

**Sent:** Tuesday, November 22, 2016 9:00 AM  
**To:** Consumer Contact  
**Subject:** no rate hike for FPL

I oppose FPL's rate hike for more power plants unless it's for more solar plants. We are causing great harm to the environment by our excessive use of fossil-fueled power.

Yours truly,

Charlotte K Blitt

**To:** Consumer Contact  
**Subject:** Concern about FPL request for rate hike

Dear Commissioners:

I urge you to think very carefully about allowing FPL's rate hike to build additional natural gas plant capacity. Florida has abundant sunshine and we really need to be investing a lot more in solar power. This would serve the consumers rather than lining the pockets of FPL's shareholders.

I respectfully request that you deny at least part of FPL's request in favor of promoting and building the capacity for more safe, clean, renewable energy sources. Business and residential customers will all thank you for this approach!

Regards,  
Susan Duffin
