Subject: gulf power rates

there is NO way i would think gulf power deserves a rate hike at this time. just 2 or 3 years ago, they raised the rate, i believe it was \$7.00 for each 1000 kw. all this was supposed to be so they could build a new power plant. i never heard or saw anything about the power plant being built and i never got a refund for all the money they took from me to do this..

i am on disability and only got .3% raise, which gives me a whole \$3 extra each month. so them getting a 6.9% raise is crazy.

i want to know where my money went when they added the \$7 to every 1000kw per month.

Subject: Gulf Power rate increase

As a concerned citizen of Pensacola, FL - I do not believe the rate increase that Gulf Power is proposing should pass. A lot of people already have higher power bills in this state than other states do but it never seems to be enough. There is certainly no reason for the proposed hike to be as much as it is - 6.9 % is way too much to ask people that are already having a hard time paying their bills to come up with. It seems like every time we turn around, the utility companies are wanting to increase our rates which is just getting old to us. I do realize that improvements have to be made and they want to pass those off to the customer but it is time for the bleeding to stop. Please consider denying this rate increase so people don't have to choose between whether they can buy their medicine for the month or pay their power bill. Thanks for your time!

I believe this is an extreme increase. Gulf power is making plenty of money at there current rates. There facilities and equipment are new there people are among the highest paid in the state. I believe if they get a rate increase it will go to a wasteful spending such as windmills and other forms of alternative energy mandated by the liberals in Washington DC. If they think they need a rate increase that bad, give them an increase like the senior citizens on Social Security received. They received A HUGE INCREASE OF 3/10th OF ONE PERCENT OR .003% or in my case \$5.00 dollars per month. That \$5.00 does not cover the increase of insurance, let alone an increase \$10.22 per month to a multi billion dollar company like Gulf Power Corporation. On top of that people receiving Social Security have not received a cost of living increase for the past 3 years, other than the huge .003% increase. Gulf Power looking at my bill is doing very well at there current rates.
