RE: Docket No. 160220-WS – Application for original water and wastewater certificates in Sumter County, by South Sumter Utility Company, LLC.

AGENDA: 02/07/17 – Regular Agenda – Proposed Agency Action for Issue 1 – Interested Persons May Participate

COMMISSIONERS ASSIGNED: All Commissioners

PREHEARING OFFICER: Graham

CRITICAL DATES: 02/08/17 (90-Day Deadline to Grant or Deny Application) (90-Day statutory Deadline to Address Rule Waiver has been waived by the Utility through February 7, 2017).

SPECIAL INSTRUCTIONS: None

Case Background

On October 11, 2016, South Sumter Utility Company, L.L.C. (South Sumter or Utility) filed its application for original water and wastewater certificates in Sumter County. The area is in the Southwest Florida Water Management District (SWFWMD) and is not in a water use caution area. The Utility anticipates providing services to approximately 8,393 water and 8,007 wastewater equivalent residential connections (ERCs) when it reaches build out in 2023.

The Utility's initial application was found to be deficient. The Utility corrected the deficiency on November 10, 2016, making this the official filing date of the completed application. Pursuant to Section 367.031, Florida Statutes (F.S.), the Commission shall grant or deny an application for a

certificate of authorization within 90 days of the official filing date of the completed application. Therefore, this application must be ruled upon by February 8, 2017.

Together with its application, the Utility filed a petition for temporary waiver of portions of Rule 25-30.033, Florida Administrative Code (F.A.C.), so that the Utility's initial rates and charges might be set at a date subsequent to the granting of the certificate of authorization. The Utility has waived the 90-day period for the Commission to grant or deny the waiver pursuant to Section 120.542(8), F.S., to allow the waiver request to be decided at the February 2017 Commission Agenda Conference.

The territory proposed to be served by South Sumter is owned or controlled by a related party which intends to develop the property as a Planned Unit Development as an expansion of The Villages of Sumter DRI Master Plan. South Sumter's service area will consist of single family homes, general and retail office space, and educational, medical, and recreational facilities.

The water treatment plant and the associated distribution system will be designed to supply the maximum daily demand and the peak hour demand. The plant will consist of wells which will provide 0.831 million gallons per day (MGD) of potable water. The water treatment will consist of sodium hypochlorite chlorination. A ground storage tank equipped with high service pumps will address peak hour water demands and maintain system pressure.

At build out the WWTP will have a capacity of 1.00 MGD maximum month average daily flow (MMADF). The build out will consist of two phases. The initial phase is anticipated to have a capacity of 0.2 MGD MMADF and the second phase will be an additional 0.8 MGD MMADF. Wastewater will be treated using an aerobic treatment system, with an oxidation ditch design which includes clarification, filtration, and sodium hypochlorite disinfection to treat effluent to acceptable levels for public-access reuse via golf course irrigation. Backup disposal will be to rapid infiltration basins during wet weather events or when effluent criteria do not meet the Department of Environmental Protection (DEP) standards.

The Commission has jurisdiction pursuant to Sections 367.031, 367.045, 367.081, and 120.452, F.S.

Discussion of Issues

Issue 1: Should the Commission grant South Sumter's petition for a temporary waiver of Rules 25-30.033(1)(p) and (q), F.A.C.?

Recommendation: Yes. South Sumter's petition for a temporary waiver of Rules 25-30.033(1)(p) and (q), F.A.C., should be granted. South Sumter should file the information required to set initial rates and charges in the third quarter of 2017. The Utility has met the requirements found in Section 120.542, F.S., and the Commission should grant South Sumter's petition for temporary waiver of Rules 25-30.033(1)(p) and (q) until it has completed its permitting and is closer to commencement of operations. (Hill, Taylor)

Staff Analysis: Rules 25-30.033(1)(p) and (q), F.A.C., direct the applicant for an original certificate to file information necessary for setting initial rates and charges, including: the filing of the existing and projected cost of the system and associated depreciation by year, the existing and projected annual contributions-in-aid-of-construction and associated amortization by year, the projected capital structure, current and projected annual operating expenses, a schedule showing how the proposed rates were developed, a schedule showing how the proposed service availability policy and charges were developed, a schedule showing how the customer deposits and miscellaneous service charges were developed, and a draft of the proposed tariff for the Utility. South Sumter has asked for a temporary waiver of those parts of the rule so that it may receive its certificates and then proceed with other permitting. When South Sumter has received its permits it will be able to provide accurate cost estimates, schedules and cost studies to support initial rates and charges.

Section 120.542, F.S., authorizes the Commission to grant variances or waivers to the requirements of its rules where the person subject to the rules has demonstrated that the underlying purpose of the statute has been or will be achieved by some other means, and that strict application of the rules would cause the person substantial hardship or would violate principles of fairness. "Substantial hardship" as defined in this section means demonstrated economic, technological, legal, or other hardship.

Section 367.031, F.S., requires each utility seeking to provide water and wastewater service to obtain a certificate of authorization from the Commission prior to obtaining permits from the DEP and the water management districts. Further, Section 367.045(5)(a), F.S., states that the Commission may grant a certificate of authorization if it is in the public interest. The purpose of Sections 367.031 and 367.045, F.S., is to ensure that a utility has the financial and technical ability to provide service and that there is a need for service in the proposed service area.

While South Sumter has requested a temporary waiver for filing part of the required financial and technical information regarding rate setting, as explained in Issue 2, South Sumter has provided sufficient information to demonstrate that it will have the financial and technical ability to provide water and wastewater service to the proposed service area. The development planned for the South Sumter territory will need water and wastewater service in 2018. The development will consist of 6,740 residential units and 120 commercial units to be developed in 2018 through 2023. South Sumter states that although it does not expect to provide service until 2018,

SWFWMD has required certification before it will review an application for water use permit. South Sumter states that it cannot calculate detailed facility cost information until after it is granted water use and other permits.

When a utility has met the criteria set forth in Section 120.542, F.S., the Commission has granted a temporary waiver of the rules regarding establishment of initial rates and charges and bifurcated the two parts of its certification proceedings.¹ In the instant case, South Sumter has met the underlying purpose of Sections 367.031 and 367.045, F.S., because it has demonstrated technical and financial ability to provide service and a need for service in the proposed territory. In addition, South Sumter has shown that it will suffer substantial hardship if all of the provisions of Rule 25-30.033, F.A.C., are strictly applied.

South Sumter has requested a waiver of the rules until it receives its other permits and is closer to commencing operations. South Sumter states that it will file its proposed tariffs and other required financial schedules to set initial rates sufficiently in advance of beginning operations, so that the Commission will have sufficient time to review and to establish initial rates and charges. South Sumter has stated that it will file the information required to set initial rates and charges in the third quarter of 2017, which will be at least eight months prior to the anticipated May 2018 date for commencing service. Staff recommends that the Utility has met the requirements found in Section 120.542, F.S., and the Commission should grant South Sumter's petition for temporary waiver of Rules 25-30.033(1)(p) and (q) until it has completed its permitting and is closer to commencement of operations.

¹Order No. PSC-13-0484-FOF-WS, issued October 15, 2013 in Docket No. 130105-WS, *In re: Application for certificates to provide water and wastewater service in Hendry and Collier Counties, by Consolidated Services of Hendry & Collier, LLC.*

Issue 2: Should the application of South Sumter Utility Company, L.L.C. for water and wastewater certificates be approved?

Recommendation: Yes. The Commission should grant South Sumter Utility Company, L.L.C. Certificate Nos. 669-W and 571-S to serve the territory described in Attachment A effective the date of the Commission's vote. The resultant order should serve as South Sumter's water and wastewater certificates and it should be retained by the Utility. (Hill, Galloway)

Staff Analysis: As stated in the case background, South Sumter filed an application for original water and wastewater certificates to provide service in Sumter County on October 11, 2016. The application is in compliance with the governing statute, Section 367.045, F.S., and other pertinent statutes and administrative rules concerning an application for original certificates.

Notice

The application contains proof of compliance with the noticing provisions set forth in Rule 25-30.030, F.A.C. The notice of application for an initial certificate of authorization for water and wastewater certificates was mailed to the entities required on November 17, 2016. No objections to the notice of application have been received and the time for filing such has expired.

Land Ownership and Service Territory

South Sumter submitted a recorded executed warranty deed in the name of the Utility as required by Rule 25-30.033(m), F.A.C. Adequate service territory and system maps and a territory description have been provided as prescribed by Rule 25-30.033(1)(j), F.A.C. A description of the territory requested by the applicant is appended to this recommendation as Attachment A.

Financial and Technical Ability

Rule 25-30.033(1)(h), and (i), F.A.C., requires a statement showing the financial and technical ability of the applicant to provide service, a detailed financial statement, and a list of all entities upon which the applicant is relying to provide funding along with those entities' financial statements. Since South Sumter has not been authorized by the Commission to provide service for compensation, it is relying upon the financial backing of its parent, Holding Company of The Villages, Inc. (The Villages). The Commission has traditionally allowed reliance on the parent's financial ability in these situations.² The Commission's reasoning has been the logical vested interest of a parent in the financial stability of its subsidiary. The application contains The

²Order Nos. PSC-13-0484-FOF-WS, issued October 15, 2013, in Docket No. 130105-WS, *In re: Application for certificates to provide water and wastewater service in Hendry and Collier Counties, by Consolidated Services of Hendry & Collier, LLC*; PSC-12-0224-PAA-WS, issued April 30, 2012, in Docket No. 090445-WS, *In re: Application for original certificates for proposed water and wastewater system and request for initial rates and charges in Indian River, Okeechobee and St. Lucie counties by Grove Land Utilities, LLC*; PSC-08-0540-PAA-WS, issued August 18, 2008, in Docket No. 080103-WS, *In re: Application for certificates to provide water and wastewater service in Hardee and Polk Counties by TBBT Utility LLC*; PSC-07-0076-PAA-SU, issued January 29, 2007, in Docket No. 060602-SU, *In re: Application for certificate to provide wastewater service in Lee and Charlotte Counties by Town and Country Utilities Company*; and PSC-07-0274-PAA-WS, issued April 2, 2007, in Docket No. 060694-WS, *In re: Application for certificates to provide water and wastewater service in Flagler and Volusia Counties by D & E Water Resources*.

Villages' most recent financial statements as well as a letter of commitment from The Villages "to make the financial and operating commitment necessary" for South Sumter to build and operate the system in Sumter County. Staff believes that The Villages' financial statements and extensive business operations in Florida show adequate and stable funding reserves for the Utility. Therefore, staff recommends that South Sumter has demonstrated that it will have access to adequate financial resources to operate the Utility.

Regarding technical ability, as stated above, The Villages has experience with operating multiple water and wastewater utilities. These systems are in good standing with the DEP. The Utility has also retained experienced engineering, design, permitting, construction, and operation professionals with experience in the development of its other utility systems.

Based on the above, staff recommends that South Sumter has demonstrated the technical and financial ability to provide service to the proposed service territory.

Conclusion

The Commission should grant South Sumter Utility Company, L.L.C. Certificate Nos. 669-W and 571-S to serve the territory described in Attachment A effective the date of the Commission's vote. The resultant order should serve as South Sumter's water and wastewater certificates and it should be retained by the Utility.

Issue 3: Should initial water and wastewater rates, charges, and return on equity be approved at this time?

Recommendation: No. Initial water and wastewater rates, charges, and return on equity should not be approved at this time. (Hill)

Staff Analysis: As discussed in the case background, the Commission must grant or deny the Utility's Application for Original Certificates within 90 days of the filing date of the Application. Reviewing the rates and charges at a later date does not conflict with the requirements in Section 367.045, Florida Statutes (F.S.), to approve or deny certificate applications within 90 days. As discussed in Issue 1, there should be no harm in bifurcating the rates and charges portion to a later date because the Utility will not be operational until 2018. The Commission has previously approved this method of bifurcation of the certification and the rate setting process.³ Therefore, staff recommends that initial water and wastewater rates, charges, and return on equity should not be approved at this time.

³Order No. PSC-13-0484-FOF-WS, issued October 15, 2013 in Docket No. 130105-WS, *In re: Application for certificates to provide water and wastewater service in Hendry and Collier Counties, by Consolidated Services of Hendry & Collier, LLC.*

Issue 4: Should this docket be closed?

Recommendation: If no timely protest to the proposed agency action portion of this recommendation is filed with the Commission by a substantially affected person within 21 days of the date of the order, a Consummating Order should be issued. Following the expiration of the protest period with no timely protest, the issuance of a Consummating Order, the docket should be closed administratively. (Taylor)

Staff Analysis: If no timely protest to the proposed agency action portion of this recommendation is filed with the Commission by a substantially affected person within 21 days of the date of the order, a Consummating Order should be issued. Following the expiration of the protest period with no timely protest, the issuance of a Consummating Order, the docket should be closed administratively.
