Comments : I do not think it is fair to provide more funding to a "private" company because they suffered business or loss. Isn't that the idea of running a private business, if you have losses and no earnings. I was without power for 4 days. We provided them billions to "upgrade" the grid which provided us little detail of when power was going to be restored or had to reopen a ticket. The website even said we had power when we did not. Had they handled the job in a more effective manner, maybe I'd more more willing to open up my wallet to a company that is already profitable. DO NOT APPROVE THIS INCREASE. Maybe they will learn next time there is repercussions when operating a business.
