Subject: Docket # 20170007 / paying for Turkey Point clean-up

11/22/2017

To whom it may concern:

As a taxpaying citizen of the state of Florida, and an FPL client, I am totally against the idea that we (the client) should be charged for an FPL mistake, or cleanup. In fact, they should be paying a fine for what they are doing to Biscayne Bay...

It is THEIR responsibility to pay the bill — in good and bad times. And FPL and their parent company make billions from us every year. Or are we working under a system where FPL gets to keep all profits while we pay for the losses?

It is like me telling my condo administrator that I will NOT pay maintenance for the next three months because my washer and dryer are on the blink and I must get a new one that the condo association should pay for. Nonsense, right?! Well, what FPL wants and usually gets, is nonsense also.

Thank you for your interest in this matter.

To Whom it may concern,
I don't think we should have to pay for cleaning up FPL's mess. They average profits of more than \$1.5 billion per year and we are supposed to pay \$200 million dollars to clean up their mess? They keep raising rates and you keep letting them. How much profit do they need to make?

Sincerely,
Dorothea Belz

Importance: High

FPL bears the responsibility for making sure the canals work properly. If you pollute, you have to clean.
It is unfair we, the consumers, have to pay for their errors.

Sincerely,
Carmen Bosch

Subject: FPL should not be allowed to pass costs of Turkey Point cleanup to customers

To Whom It May Concern:

FPL should not be allowed to pass the costs of the Turkey Point cleanup to customers. The decisions and choices made by FPL leadership appear to have denied and covered up the realities of the situation. The company itself its leaders are responsible for how this was mismanaged and should not be allowed to abuse its customers in this manner.

Thank you,
Thomas M. Wade

Subject: FPL cleanup charges

As a local south Dade resident who fishes and lives in the area waters the real effects from FPL's poor maintenance of our waters are unacceptable! Only due to a law suit filed do they then come forward to clean up. But then they decided to have the residents pay for the major cleanup. Not acceptable and I believe all efforts to deny them the option to charge the citizens is what is needed. You break it you fix it! I hope you wisely make this decision for the good of the community!

Thank you,
Alexis

Subject: Case No: 20170007 WE OPPOSE paying for FPL's Turkey point clean up

RE: Case No: 20170007

To Whom it May Concern:

My family and I strongly oppose FPLs request to make the public pay for the Turkey Point Clean up. FPL bears the responsibility for making sure the canals work properly.

“FPL knew or should have known as early as 1978 that the operation of the cooling canals at the Turkey Point plant south of Miami was creating a hyper-saline plume that was polluting the Biscayne Aquifer – the drinking water resource for South Florida,”

Sincerely,

Ryanito Olivero

Subject: docket number 20170007 -- FPL NEEDS TO PAY TO CLEAN UP TURKEY POINT

To whom it may concern,

I am writing as a member of the public to tell you that FPL should pay to clean up Turkey Point, not us. It is their responsibility and they make enough money off of us, their consumers to pay for their negligence.

RE: Case No: 20170007

Dear Members of the PSC

:

My family and I strongly oppose FPLs request to make the public pay for the Turkey Point Clean up. FPL bears the responsibility for making sure the canals work properly.

"FPL knew or should have known as early as 1978 that the operation of the cooling canals at the Turkey Point plant south of Miami was creating a hyper-saline plume that was polluting the Biscayne Aquifer — the drinking water resource for South Florida,"

Please do right by the consumer and reject FPL's request to make us pay for the clean up

Sincerely,

Kat

Subject: Case No. 20170007

Dear Public Service Commission,

I am writing regarding case number 20170007. FPL customers should not be forced to pay for the cleanup of the leaking canals at Turkey Point that were maintained by FPL. The Office of Public Counsel has made clear that it is FPL's responsibility to make sure these cooling canals operate properly according to the federal permit issued in 1972. Therefore, FPL alone needs to be responsible to remedy its failure to properly maintain these canals and protect our water. The costs for this cleanup should NOT be passed to consumers. These leaking canals have been threatening to contaminate our drinking water and Biscayne Bay. FPL needs to immediately remedy the harm caused on our environment and it needs to find a way to provide power to consumers and protect our environment moving forward. Florida consumers should not be responsible for the costs associated with FPL's failure to protect our environment.

Thank you for your time and attention to this matter.

Sincerely,

Leah Shadle
