Is fpl really trying not to be solely responsible for their own contamination clean up at turkey point?unacceptable!and unbelievable they would even try that! I am a major stock holder in the company so am aware of their profitability.with the profits comes responsibility,even without the profits!do the right thing.

Subject: Turkey Point Clean-Up

Attention: Public Service Commission

It would seem that FPL would like consumers to pay for everything they do: new projects, fixing systems, recouping hurricane costs, fracking projects, cleaning up waste problems... everything!

It is beyond ridiculous to expect the consumer to pay for FPL's clean-up & attempt at cover-up. They have violated the Clean Water Act and only take responsibility once they are caught! And then that really isn't their fault- it's the state's!!

Time to make FPL pay for their own messes- not the consumer. And no rate increases to supplement this bill. FPL has everyone pay for the problems they create. Enough!

To Whom it May Concern,

I believe that FPL should be responsible for cleaning up the salty water which threatens drinking water of our community. FPL should have known that the cooling canals were polluting the Biscayne Aquifer. That Aquifer provides drinking water to South Florida. The 200 million dollar clean up bill should not be passed on to customers who are not at fault for the contaminated water. FPL should not be permitted to pass the clean up tab on to its customers. It was pointed out in court that FPL's Federal permit makes it clear that the company bears the responsibility for ensuring that the canals work correctly. FPL, do the right thing !

Dear FPL,

Ive recently read about the contamination of leaking canals at Turkey Point and the problem you guys seem to have caused. First i would like to start of that there are many dangers related to radiation posioned water leaking into canals and the surrounding area. This could easily contaminate fish, birds, and other kinds of wildlife and as well as possible drinking supplies. You guys and basically everyone else believe that FPL should be able to clean up the mess at with their own cost and shouldn't be using other customers hard working cash for something that wasn't their fault and did not take action in. As FPL has lied in the past to their customers, everyone feels as if its the right thing if that you did something wrong, its YOUR job to fix and repair the problem. I Hope you consider and agree to my points in this email and i hope you have a great rest of your day.
