

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Elizabeth Hodges

Electric Utility Provider : EI801 - Duke Energy

Zip Code : 34761

Category : Information provided by electric utility provider after the storm

Comments : How dare Duke Energy demand more from us when they have already charged us \$800 Million for a Nuclear Power Plant that they aren't going to build. I want my money back from that. They have decided to do business in Florida and sometimes we have hurricanes, they should have been better prepared for this predictable situation, but instead they had some people without power for more than a week. Now they want people on fixed incomes with no other choice for power to foot the bill for something that is clearly out of their power to prevent. If this is how they do business I think they should get out of our state if they don't like paying for hurricane damages. The people of Florida can't afford to fill the pockets of a greedy corporation that doesn't like the cost of doing business. You should do your jobs and regulate this utility company and make them pay us back the \$800 million they owe us!!!!
