

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Paula Clark

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 34208

Category : Power restoration time

Comments : Hurricane Irma showed again how undependable the power grid is when a big storm hits. I think the utilities need to invest in more solar and batteries near our neighborhoods. Or make it easier for customers to buy their own equipment and be able to use it when the grid goes down. Those kinds of technology should be used wherever they can to prepare for hurricanes. We need to make sure FPL is building the grid with modern technology and clean energy to make it more dependable, not just rebuilding the same old power lines that keep going down when we need them the most. They make a big show of their solar, but the time has come for us to ensure our clean energy going forward.
