This is what Mark gave me...

Poured the bed on 5-17-17 and poured 1779 lbs (MLSS was 8080)

Day 1 - TS was 2.6%

Day 2 - 3.9%

Day 5 – 11% (also noted that the bed started to crack)

Day 7 – 22%

Day 8 – 0.5” rain

Day 13 – 80% - Ready for harvest

This was a little quicker than usual as the previous bed was harvested after 24 days and the TS on that was 86% on the day it was harvested. I think this was a lighter pour looking at the MLSS and the pounds poured. Obviously the holiday weekend is where we really jumped and unfortunately we didn't get that sampled everyday.
