Importance: High

Debbie and Cynthia,

Attached is the low bid form for the Chlorine Contact Chamber. The amount is \$1,075,475.00. It is \$500k more than we had estimated which we are trying to derive why, but cannot wait to proceed as the CCC has leaked for a second time and constitutes a DEP violation so we will be proceeding with the work as soon as possible. We may see some value engineering and cost savings on potentially building off site to save on housing costs, but cannot guarantee anything but this number.

Bart

Good afternoon Greg/Chris,

Please find our price proposal for the referenced bid attached.

Note: Due to the current lack of living accommodations available in the lower keys as a result of the recent hurricane, my general conditions are estimated at costs higher than previous projects in the area. Also, my estimate incorporates purchasing the new structures and media from Evoqua, however there is a price available from an independent fabricator that could be entertained if value engineering is desired.

We appreciate the opportunity to work with KWRU again. Feel free to contact me directly if you have any questions/comments.
