RE: Docket number — 20170235-EI and 20170236-EU

Public Service Commission;

The majority of the people in Indian River County have made their will very clear. We want and expect the sale of the Utility Company in Vero Beach to Florida Power and Light to be completed as soon as possible.

For citizens of this county to have to continue efforts to bring this about is very disheartening. Those that are causing this initiative to be delayed are very much in the minority but have the right to decent.

However, it is incumbent on your deliberative body to see that the will of the majority of the citizens of Indian River County is not only heard but understood and moved forward. I for one do not believe any further delays are warranted and this sale should proceed to completion. Thank you for your prompt attention to this matter.

Sincerely;

Donna Florian
