- 1) The information contained on the listed page contains hedged fuel prices, hedged volumes of natural gas and hedging volume percentages, all of which types of information have been recognized by the Commission on numerous occasions to constitute proprietary confidential business information, the disclosure of which would be harmful to Tampa Electric's ability to contract for goods and services on favorable terms and, likewise, the disclosure of which would be harmful to the competitive interests of Tampa Electric. See, for example, Order Nos. PSC-07-0859-CFO-E1 and PSC-07-0860-CFO-EI. This is the specific type of information described in Section 366.093(3)(d) and (e) as being entitled to confidential protection and exemption from the Public Records Law.

**PUBLIC VERSION(S) OF THE DOCUMENT(S)**

Attached hereto (unless previously filed as may be noted below) are two public versions of the Document(s) with the Confidential Information redacted.

## **REQUESTED DURATION OF CONFIDENTIAL CLASSIFICATION**

Tampa Electric requests that the Confidential Information that is the subject of this request be treated as proprietary confidential business information exempt from the Public Records Law for a minimum of 18 months from the date of the order granting such classification. To the extent the company needs confidential protection of the Confidential Information for a period longer than 18 months, the company's justification therefore is set forth below:

Tampa Electric requests that the Confidential Information that is the subject of this request be treated by the Commission as confidential proprietary business information for a minimum of three years. The data in question provides detailed hedging strategies and actions, many of which are of a continuing nature and which could well be in place beyond the standard 18 month period that confidential information is treated as such by the Commission. The information in question would disclose the company's risk management strategies by making public the hedged prices Tampa Electric has settled on. Disclosing this type of information sooner than three years after it is submitted would arm would-be suppliers of goods and services, as well as competitors of Tampa Electric, with key components of the company's risk management strategies. A minimum of three years is essential to prevent those entities in the fuel and purchased power markets from having access to information they could use to the competitive disadvantage of Tampa Electric, which would increase the fuel and purchased power costs borne by Tampa Electric's customers.
