COMMISSION
CLERK

To Whom It May Concern:

I was in attendance of the meeting on January 2017. I am very disturbed about the attitude my family has received over the years from Public Power. My Mother was always under pressure by this Company for year paying extremely high bills before passing (10 years ago). With the assistance from Community Action a \$1200.00 bill was paid.

Since her passing (10 yrs ago) I am under the same burden of \$300 to \$400.00 per month. I was without a Refrigerator and Air Conditioning for at least 9 or 10 mos refrigeration for 4 to 6 mos, they sent a bill \$18.00, \$36.00 and I believe \$86.00 now for Oct. \$400.00

A Month ago they sent power surges through my house, I called they sent a worker who reduced the power and told me if anything else happen it on me, I had my Air Condition Unit serviced, also the refrigerator. The service person told me I would need \$1000.00 to have corrections. Also a cable was placed in my yard without my permission.

I was in the backyard working here's this cable I've
have see so many cables in a community before.
They have been in the neighborhood, a school used to
be where they have all these cables. Further, they trimmed
the trees in this community but they passed in front
of my house, and for a time, they set and watched
my house. I strongly believe full power along with other
agencies are working to take my property, because of
all that is occurring.

I would be very grateful for your
consideration in this matter.

Very Sincerely yours for Christian
Service,
Billie L. Beckwith
