BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of:

DOCKET NO. 20190038-EI

PETITION FOR LIMITED
PROCEEDING FOR RECOVERY OF
INCREMENTAL STORM
RESTORATION COSTS RELATED
TO HURRICANE MICHAEL, BY
GULF POWER COMPANY.

_____ /

PROCEEDINGS: COMMISSION CONFERENCE AGENDA
ITEM NO. 2

COMMISSIONERS
PARTICIPATING: CHAIRMAN ART GRAHAM
COMMISSIONER JULIE I. BROWN
COMMISSIONER DONALD J. POLMANN
COMMISSIONER GARY F. CLARK
COMMISSIONER ANDREW GILES FAY

DATE: Tuesday, May 14, 2019

PLACE: Betty Easley Conference Center
Room 148
4075 Esplanade Way
Tallahassee, Florida

REPORTED BY: DEBRA R. KRICK
Court Reporter and
Notary Public in and for
the State of Florida at Large

PREMIER REPORTING
114 W. 5TH AVENUE
TALLAHASSEE, FLORIDA
(850) 894-0828

1 P R O C E E D I N G S

2 CHAIRMAN GRAHAM: Okay. Let's go back around
3 to Item No. 2. And I am told that we have some
4 speakers on Item No. 2. So I will let staff tee
5 this up, and then we will hear from the speakers,
6 and then we will hear from the parties.

7 MR. PEREZ: Good morning, Commissioners. I am
8 Tristen Perez with Commission staff.

9 Item 2 is staff recommendation on Gulf Power
10 Company's request for approval to implement an
11 interim storm restoration recovery charge.

12 On February 6th, 2019, Gulf Power Company
13 filed a petition for a limited proceeding seeking
14 authority to implement an interim storm restoration
15 recovery charge to recover an estimated \$342
16 million for incremental restoration costs related
17 to Hurricane Michael and to replenish its storm
18 reserve.

19 The approval of an interim storm restoration
20 recovery charge is preliminary in nature and is
21 subject to refund pending a further review once the
22 total actual storm restoration costs are known.

23 Based on a review of the information provided
24 by Gulf in its petition, staff recommends the
25 Commission authorize Gulf to implement an interim

1 storm restoration recovery charge subject to
2 refund. Once the total actual storm costs are
3 known, Gulf shall be required to file documentation
4 of the storm cost for Commission review and shore
5 up any excess or shortfall.

6 Federal executive agencies and the Office of
7 Public Counsel have intervened in this docket.
8 There are 285 consumer comments in the
9 correspondence file. There are parties here to
10 address the Commission.

11 Staff is available for any questions at this
12 time. Thank you.

13 CHAIRMAN GRAHAM: Okay. If you are here to
14 speak on this issue, can I get you to raise your
15 hands real quickly? We have only four or five, is
16 that correct?

17 All right. Let's come up to the microphone
18 one at a time. I need for you to leave your name
19 and location or position, and then you will get
20 three minutes to speak. The podium is way over
21 here.

22 MR. EVERETT: Mr. Chairman, Commissioners. I
23 hope y'all are well today.

24 I come before you from Washington County. My
25 job title in Washington County is Washington County

1 Chamber Director, Washington County EDO and the
2 Chipley Redevelopment Agency Director, and
3 therefore, I can assure you that I was able to talk
4 to many businesses, many citizens.

5 CHAIRMAN GRAHAM: Sir, before you continue --

6 MR. EVERETT: I'm sorry, my name?

7 CHAIRMAN GRAHAM: Yes, thank you.

8 MR. EVERETT: Theodore Samuel Everett.

9 CHAIRMAN GRAHAM: Thank you.

10 MR. EVERETT: Yes.

11 As I was saying is I can assure you that I was
12 in a position where I was able to talk to many
13 businesses and citizens after the storm. And I was
14 also aware that our EOC had mobilized and were
15 getting ready for what we all know was a
16 cataclysmic storm.

17 The day after the hurricane, it looked like
18 chaos. However, it seemed real quickly that Gulf
19 Power had everything under control. We saw their
20 trucks rolling in. The utility companies, they
21 also garnered to help them with the effort of
22 recovery.

23 And I can assure you, and this was -- this
24 was -- we could not believe it was done. Power was
25 coming on four, five, six days after the storm. In

1 a very rural area, 600 miles of dirt roads, trees
2 everywhere, they were there, and they were picking
3 up the pieces.

4 And wherever they went, I can assure you when
5 you go to a rural county -- I can speak for
6 Washington County in particular -- those linemen
7 were well fed by the people that they were serving.

8 When you have a small rural county, and very
9 small population, to get those businesses up and
10 running, and get those people with power is
11 extremely important. We have -- we struggle in a
12 lot of ways, and we struggled mightily, and we are
13 still struggling after the hurricane. But the one
14 thing we did not struggle with was power from Gulf
15 Power. It was on very quickly. And even after
16 they got the bulk of the power on, they came back,
17 reset more lines. Made additions. Cleaned up
18 more.

19 And as you know, and I know, they are not
20 entitled to any insurance. They are not entitled
21 to any federal disaster recovery money. And I will
22 assure you that I think the good people of
23 Washington County would like to know that they
24 would pay a little bit more on their monthly bill
25 in order to make sure that if, or when, another

1 storm comes through, we can rely on Gulf Power
2 being whole to come back and fix the job again.

3 We do not want to see anything like we have
4 been through, but there is always that potential.
5 And for Gulf Power to be whole from this, it's very
6 important for them to go forward, and for the
7 confidence of the general public to know that when
8 a storm comes again, they will be ready because
9 they were ready.

10 I will be glad to answer any questions.

11 CHAIRMAN GRAHAM: Thank you, Mr. Everett.

12 Commissioners, any questions?

13 Seeing none. Thank you, sir.

14 MR. EVERETT: Thank you.

15 CHAIRMAN GRAHAM: You guys all might as well
16 come over here and sit over there in those seats.

17 Welcome, sir.

18 MR. BOWEN: Good morning, Mr. Chairman,
19 Commissioners, my name is Mark Bowen. I am the
20 Chief of Emergency Services for Bay County,
21 Florida.

22 Just like every other community in the nation,
23 we are a very power dependent community.

24 Technology being as it is, we have more and more
25 citizens that have everything from home dialysis

1 systems to oxygen generators, elderly population
2 very, very power dependent.

3 In addition, in the aftermath of Hurricane
4 Michael, everybody from homeowners to hospitals,
5 fire stations, you know, we had backup power, but
6 our generators were destroyed. They were damaged.
7 Many homeowners, just like their home air
8 conditioner, or anything else that insurance covers
9 or doesn't cover, they still have not gotten their
10 backup power back on-line. And so even the most
11 resilient components of our community were very,
12 very dependent on power.

13 My colleagues and I estimated that it would
14 take months. I mean, we saw the infrastructure
15 damage. And in less than two weeks, we had over
16 95 percent of the Gulf Power customers back.

17 And I have been in the fire service for 30
18 years, and I know that that power -- that timely
19 restoration of power literally saved lives. And I
20 just can't overstate the importance of reliable
21 power coming back to our businesses and citizens.
22 It is a critical issue. I am here in support of
23 the company's efforts to make sure that they can
24 perform this task again, hopefully not in our
25 community, but, you know, to anybody that might

1 need this.

2 Again, I just cannot overstate the importance
3 of this for our citizens and our first responders,
4 and the whole of government.

5 CHAIRMAN GRAHAM: Thank you, Mr. Bowen.

6 MR. BOWEN: If you have any questions, I would
7 be happy to answer them.

8 CHAIRMAN GRAHAM: Do you know CFO Commissioner
9 Jimmy Patronis?

10 MR. BOWEN: Yes, sir. Very well.

11 CHAIRMAN GRAHAM: And you let him stay in the
12 county?

13 MR. BOWEN: Glad to have one of our own in the
14 role. So I mean, he is the State Fire Marshal
15 so...

16 CHAIRMAN GRAHAM: He was up here with us for
17 about a year-and-a-half, and we do miss him.

18 MR. BOWEN: Yes. Well, we are glad to have
19 him back.

20 CHAIRMAN GRAHAM: Thank you, sir. Thank you
21 for coming today.

22 MR. BOWEN: Yes, sir. Thank you.

23 MR. WRIGHT: Commissioners. Thank you for
24 allowing me to speak today. My name is Garrett
25 Wright, and I am the Vice-President of the Bay

1 Economic Developmental Alliance.

2 The Bay EDA is the economic development entity
3 for Bay County. So we are tasked with diversifying
4 our economy by our Board of Directors with
5 recruiting new companies and working with our
6 existing industry outside of the pillars of our
7 established economy of military and tourism.

8 Bay County is a very special place to have the
9 ability to do economic development and live in.
10 Prior to Hurricane Michael, our community was
11 having significant success in economic development
12 projects. A few projects that our community was
13 able to attract and announce prior to hurricane
14 Michael were Eastern Ship Building's \$10 billion
15 Coast Guard contract, a thousand new jobs. GKN
16 Aerospace's \$50 million investment, 170 new jobs.
17 Tyndall Air Force Base's new MQ-9 Reaper wing and
18 ATCM, Inc., their high tech air space supplier and
19 several others.

20 In the 18 months leading up to Hurricane
21 Michael, we had significant success in economic
22 development activity, and our economy was buzzing.
23 However, in October of last, our community's path
24 forward was quite altered.

25 In the days leading up to Hurricane Michael my

1 colleague and I were in the UK promoting Bay
2 County's economic development prospects. In the
3 immediate aftermath, due to the devastation and
4 many unknowns, we had to make the decision to come
5 back immediately, and two days later, after the
6 storm, we flew back.

7 Much to our dismay, kind of what we witnessed
8 when we got on the ground were thousands of homes,
9 businesses and schools destroyed. Countless --
10 countless roads and countless trees and debris
11 litters the rights-of-ways, but the one positive
12 sign that we saw in all of the devastation was Gulf
13 Power. Gulf Power had thousands and hundreds of
14 linemen already on our streets repairing our
15 electrical grid.

16 Immediately following Hurricane Michael, our
17 economy -- there was a lot of uncertainty regarding
18 the future of our economy. As you can expect, if
19 our companies can't power their equipment, turn on
20 their lights, or the basic electrical tasks, their
21 workforce can't come to work, so our economy does
22 not move. Luckily for our community, and for our
23 citizens, the response displayed by Gulf Power was,
24 simply put, amazing.

25 Through this effort, Gulf Power was able to

1 repair electrical grid within a matter of days, and
2 within two weeks, had almost all service back up
3 and running. Many of our largest employers
4 received their electrical services within a matter
5 of days, and they were turning out products for
6 their customers within a month. This kept their
7 contracts with their customers in time.

8 We are very gracious for the response
9 displayed by Gulf Power in the aftermath of
10 Hurricane Michael, but our local economy would not
11 be where it is today if our community -- if Gulf
12 Power hadn't responded in the way in which they
13 did.

14 As the 2019 season hurricane approaches, it
15 reminds us every day that we are all vulnerable
16 from Pensacola to Destin to Panama City and beyond,
17 that we are all vulnerable to hurricanes. We don't
18 know when the next hurricane will hit, but must
19 always be vigilant.

20 For those reasons and more, we are in support
21 of the petition requested by Gulf Power for the
22 recovery of incremental storm restoration costs.

23 CHAIRMAN GRAHAM: Thank you, Mr. Wright.

24 Thank you for coming up today.

25 MR. KING: Good morning, ladies and gentlemen

1 of the Florida Public Service Commission. My name
2 is Alex King. I am with the Panama City Port
3 Authority. I work in cargo development and
4 commercial development. I would like to thank each
5 and every one of you for the opportunity to speak
6 this morning on behalf of the Port Authority and
7 Gulf Power.

8 First a little background on our port.

9 Our port is progressive seaport located in
10 Panama City. We have two deep water terminals. We
11 are also very bullish on industrial development in
12 creating good, high paying manufacturing jobs in
13 Bay County. We do this by expanding regional
14 opportunities, by providing modern seaport
15 facilities to promote trade and development.

16 In addition to our general seaport operation,
17 we support major industrial companies located on
18 the port, such as Berg Steel Pipe and Oceaneering.
19 Together, these industries support several hundred
20 employees that live, work and call Bay County home.

21 Our intermodal distribution center, or inland
22 port we call, supports the large distribution
23 warehouse that provides vendor managed inventory
24 for other large industries in Bay County. We are
25 also aggressively marketing a 55-acre certified

1 site in partnership with our Bay Economic
2 Development Alliance and Gulf Power.

3 As we know, Gulf Power plays a violate role by
4 providing reliable energy to power our port and our
5 industrial tenants. When Hurricane Michael struck
6 Panama City and Bay County as a Category 5 storm on
7 October 10th, 2018, it left behind mass
8 destruction, decimating all critical infrastructure
9 in our region, leaving over 136,000 customers
10 without provider. I can safely say this storm did
11 not discriminate.

12 Gulf Power's response to Hurricane Michael was
13 nothing short of heroic. Over 7,500 heros to be
14 exact descended in the Bay County immediately as
15 the last rain bands were moving north.

16 Following were entire convoys of power
17 equipment and trucks came generators, supplies,
18 food trucks, kitchens, bunkrooms, all the tools
19 necessary to rebuild the electric grid.

20 Gulf Power and contract crews from all over
21 the United States and Canada, as referenced in some
22 of the storm numbers put out after, replaced over
23 7,000 this poles, 4,000 transformers, 200 miles of
24 distribution line, and repaired or replaced 100
25 miles of transmission line. They did all this too

1 in 13 days. Not to mention the hundreds and
2 thousands of trees that had to be cleared of the
3 rights-of-way before this work could commence.
4 This resulted in 99 percent of power being restored
5 to customers that could accept power in Bay County.

6 Port Panama City and its industrial tenants
7 rely on electricity provided by Gulf Power, just as
8 hospitals, grocery stores and gas stations run on
9 electricity to keep a community moving forward
10 after a major storm.

11 Gulf Power restored our electricity to the
12 port and our tenants in less than a week, allowing
13 storm assessments and limited cargo operations to
14 commence. This also enabled on-port industrial
15 tenants to access post-storm repair needs and work
16 to restart manufacturing operations.

17 The hard work and dedication by Gulf Power to
18 right our ship by restoring power after the
19 hurricane is a critical first step in the healing
20 and rebuilding process. We will support the
21 decision of the Public Service Commission for the
22 storm recovery surcharge request.

23 I will say that Gulf Power is an integral part
24 of our community and region, and we are very
25 appreciative for their tireless work and dedication

1 to restoring power to our port, our customers,
2 community and the region in the wake of this storm.

3 Thank you.

4 CHAIRMAN GRAHAM: Thank you, sir. Thank you
5 for making the trip out here today.

6 MR. KING: Thank you.

7 CHAIRMAN GRAHAM: Okay. OPC, comments?

8 MR. DAVID: Tad David --

9 COMMISSIONER GRAHAM: Microphone.

10 MR.. DAVID: Tad David for OPC. I would also
11 make an appearance for J.R. Kelly, the Public
12 Counsel.

13 We have no further comment to the petition.
14 It does appear to follow the settlement and
15 stipulation as referenced in the petition.

16 CHAIRMAN GRAHAM: Okay. Gulf?

17 MR. BADDERS: Good morning, Commissioners.
18 Russell Badders on behalf of Gulf Power. I am just
19 here to answer questions that you may have.

20 CHAIRMAN GRAHAM: Smart man.

21 MR. BADDERS: I have that on record now.
22 First time ever someone said that.

23 CHAIRMAN GRAHAM: Commissioners, any questions
24 of OPC, Gulf, staff?

25 Commissioner Brown.

1 COMMISSIONER BROWN: Thank you. And thank you
2 to those folks who came to Tallahassee to testify
3 today.

4 I have a question for Mr. Badders.

5 How many are still without service in Gulf's
6 territory?

7 MR. BADDERS: Mr. Talley from Gulf Power is
8 going to lead up -- led up the restoration efforts,
9 and he is continuing with that, so he should be
10 able to answer your question.

11 MR. TALLEY: Paul Talley, Technical Services
12 Manager for Gulf Power.

13 Currently, right now, he have about 8,600
14 customers that cannot receive power in the
15 eastern -- our eastern district.

16 COMMISSIONER BROWN: Is that because the lines
17 are not connected?

18 MR. TALLEY: No, ma'am. Those are where they
19 have not made their repairs, or been able to
20 restore their facilities to accept power.

21 COMMISSIONER BROWN: Thank you for that
22 clarification.

23 Are there any type of bill pay programs that
24 Gulf Power utilizes for those that have hardships?

25 MR. BADDERS: We do not have anything

1 specifically related to the storm. But we do
2 utilize what we would typically do when folks have
3 a difficult time paying, we have payment
4 arrangements and things like that, but nothing
5 specifically related to Hurricane Michael.

6 COMMISSIONER BROWN: Have you all contemplated
7 the potential -- other utilities do offer some type
8 of programs for assistance. Have you contemplated
9 any type of assistance program for those that are
10 still recovering and rebuilding and unable to pay
11 at this time and would like to defer it for a later
12 period? Have you contemplated any type of
13 programs?

14 MR. BADDERS: Nothing outside of what we do.
15 I mean, we have our bill pay arrangements that
16 would work in that fashion.

17 At this point, the folks who are unable to
18 receive power, the 8,600, as far as getting them,
19 you know, their meter cans and things like, that
20 that will basically be handled when they rebuild.
21 So we haven't seen or had any requests really
22 around a program that would help with that.

23 COMMISSIONER BROWN: And you all did a
24 commendable job at restoring service. So you
25 have -- it's a difficult situation for those that

1 are still struggling, and I would like to
2 acknowledge that.

3 That being said, also, Mr. Badders, have you
4 contemplated securitization as an option?

5 MR. BADDERS: It is something we looked at
6 initially. It is a very complex, very
7 time-consuming process.

8 We feel that the process that we have in the
9 stipulation and settlement that we are kind of
10 walking through now is more appropriate. It's
11 faster to get through, or should be, from a cost
12 perspective.

13 Securitization comes with a layer of costs
14 that would likely outweigh any of its benefits at
15 this point. So we are still looking at that, but I
16 don't believe that will be something we will pursue
17 at this point.

18 COMMISSIONER BROWN: Thank you.

19 Those are all my questions.

20 CHAIRMAN GRAHAM: Thank you, Commissioner
21 Brown.

22 Commissioner Polmann.

23 COMMISSIONER POLMANN: Thank you, Mr.

24 Chairman.

25 Question for staff.

1 The opportunity is here for the utility to
2 request an amount above the \$4 per month, and so
3 forth, that's documented here in the analysis, and
4 what's being recommended is the \$8 amount. And my
5 question is whether any other alternatives were
6 considered by the staff in your analysis. Any
7 other dollar amount for the customer bill, or any
8 other terms other than -- what we have here is \$8
9 per month for a term that the utility expects to be
10 for 60 months. I am just questioning whether any
11 other alternatives were considered in the analysis?
12 You don't need to go through what they were. I
13 just want to know if any others were considered.

14 MR. MOURING: Well, Kurt Mouring with
15 Commission staff.

16 With this storm in this area, just the amount
17 of damage that was done created a tremendous
18 problem in terms of the amount of damage relative
19 to the number of customers. As I think we've heard
20 a couple of times, it's a rural area.

21 COMMISSIONER GRAHAM: Yes.

22 MR. MOURING: And trying to find a way to
23 spread those costs over a period of time relative
24 to not extending the recovery out to a period of
25 time so long that you would run the risk of having

1 another storm hit and additional costs incurred and
2 kind of pancaking of expenses, but maybe Elizabeth
3 could add to that, if that answers your question.

4 CHAIRMAN GRAHAM: Ms. Draper.

5 MS. DRAPER: Elizabeth Draper with staff.

6 I just wanted to make one clarification. The
7 charges proposed are it's a cents per kilowatt
8 charge so the --

9 COMMISSIONER POLMANN: Oh, I'm sorry. I
10 misspoke.

11 MS. DRAPER: -- \$8 per month per thousand
12 kilowatt hour is just for a residential customer
13 that uses a thousand kilowatt hours.

14 COMMISSIONER POLMANN: Yes.

15 MS. DRAPER: But it's according to use, so I
16 just wanted to clarify that.

17 COMMISSIONER POLMANN: Okay. Yeah, I do
18 recognize that there was significant impact and
19 considerable dollars in that, the number of
20 customer accounts, compared to other utilities in
21 the state, is relatively smaller number, so the
22 charge -- the \$8 that we are talking about is
23 higher than we have seen in other cases just
24 because your number of customers and the dollar
25 amount is substantially different and compared to

1 prior storms. This was a Category 5 storm, so this
2 is a very substantial issue that we are dealing
3 with.

4 I was just checking to see if there were other
5 alternatives. I certainly support this. I just,
6 in due diligence, I was just checking to see.

7 Mr. Chairman, I am happy to hear other
8 questions.

9 CHAIRMAN GRAHAM: There is a few more.
10 Commissioner Clark.

11 COMMISSIONER CLARK: Thank you, Mr. Chairman.

12 I wouldn't pass the opportunity to make a
13 couple of observations.

14 First of all, thank you to our folks who drove
15 over this morning to testify on behalf of the
16 utility company for the work they did. I was one
17 of those that went through this storm myself, and
18 experienced the damage, and like most of the folks
19 in the area did, and also suffered from the outage
20 that was pretty extensive in duration. But also,
21 from having a little bit of experience in this
22 area, was able to witness the recovery, and the
23 amount of assets that were moved into the region in
24 this short amount of time, and was nothing less
25 than a impressed with the response that Gulf Power

1 gave to the community the mass mobilization of
2 those type of resources. And I would go even
3 further to say the extensive preparation work that
4 was done ahead of time.

5 I actually drove down and got to observe and
6 look at the tent city that was put up, and the
7 command center that was built on the old airport in
8 Panama City about two days after the storm, and it
9 was an absolutely amazing site. I have worked a
10 few storms, and been in this industry for a number
11 of years, and I had never seen anything like that.

12 Realizing it's an expensive process. Storm
13 recovery is not cheap. That's probably the most
14 expensive labor rate will you ever have to pay are
15 during those particular times.

16 But I also wanted to say thank you for helping
17 to work this out. I know, to address Mr.
18 Poulmann's question, I think there was,
19 Commissioner Polmann, a couple of observations
20 about recovery period and time, and the
21 cooperation, and stretching this thing out. There
22 was a 36-month, 48-month. I even heard those
23 numbers on stretching those timelines out. But to
24 go out 60 months and be able to bring that number
25 down a bit, I think, was in the best interest of

1 the consumers.

2 It's going to hurt, obviously. You know, we
3 talk about the thousand kilowatt hour threshold.
4 That's probably not as much norm as the most houses
5 that are using 2,000 kilowatt hours a month. So a
6 lot of consumers are actually going to see a \$16 a
7 month charge. Some are going to see, you know, \$30
8 a month charges.

9 So I think that it's -- it is going to be
10 difficult, but in light of what we saw in the
11 response, and the essential nature of power to
12 everyone in this country, I think that it is a
13 justifiable -- a justifiable charge at this time,
14 and thank you all for the hard work that you did
15 during this time.

16 Thank you, Mr. Chairman.

17 CHAIRMAN GRAHAM: Thank you.

18 Commissioner Brown.

19 COMMISSIONER BROWN: And at the end of the
20 day, the settlement agreement provides for this.
21 So with that, Mr. Chairman, I would move approval
22 of the staff recommendation on all issues.

23 COMMISSIONER POLMANN: Second.

24 CHAIRMAN GRAHAM: It's been moved and second
25 staff recommendation on all issues.

1 Any further discussion?

2 I would like to thank those people that came
3 down here today for this, and also I encourage you
4 to stay. I saw that three of the four of you were
5 in economic development. You will be encouraged by
6 the next item coming up, because I think Gulf is
7 involved in that as well. So hang around for the
8 next one as well.

9 If there is no other discussion, all in favor
10 say aye.

11 (Chorus of ayes.)

12 CHAIRMAN GRAHAM: Any opposed.

13 (No response.)

14 CHAIRMAN GRAHAM: By your action, you have
15 approved that motion.

16 Thank you very much.

17 (Agenda item concluded.)

CERTIFICATE OF REPORTER

STATE OF FLORIDA)
COUNTY OF LEON)

I, DEBRA KRICK, Court Reporter, do hereby
certify that the foregoing proceeding was heard at the
time and place herein stated.

IT IS FURTHER CERTIFIED that I
stenographically reported the said proceedings; that the
same has been transcribed under my direct supervision;
and that this transcript constitutes a true
transcription of my notes of said proceedings.

I FURTHER CERTIFY that I am not a relative,
employee, attorney or counsel of any of the parties, nor
am I a relative or employee of any of the parties'
attorney or counsel connected with the action, nor am I
financially interested in the action.

DATED this 22nd day of May, 2019.

DEBRA R. KRICK
NOTARY PUBLIC
COMMISSION #GG015952
EXPIRES JULY 27, 2020
