

8/15/2019

DOCUMENT NO. 08115-2019

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name:

Caroline Heuerman

Address:

6295 25th Ave N
St Petersburg FL 33710

Email:

cheuerman@tampabay.rr.com

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

RECEIVED-FPSC

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name: Heather Williaette

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

RECEIVED-FPSC

2019 AUG 15 PM 3:13

Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name:

Lawrence Potter

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

RECEIVED-FPSC

2019 AUG 15 PM 3:14

Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name:

Rob Perry

2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name:

Stacy Lome

Address:

670 Island way #500

Clearwater Beach 33769

stacylome@gmail.com

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

RECEIVED-FPSC

2019 AUG 15 PM 3:04

Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name: Brenda Probasco

Address: 1099 52nd St S

Tallahassee, FL 32399-0850

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name: MARGARET ZAK
Address: 3228 8th AVE N
ST. PETERSBURG, FL 33713

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name: Jason Gould

Address: 2075 Landena Ave
Clearwater, FL 33755

Email: jsongould1781@yahoo.com

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

In 2019, as part of FEECA (Florida Energy Efficiency and Conservation Act), the Florida Public Service Commission will set targets for energy efficiency programs for utilities. I want to make sure those targets are strong enough to benefit Floridians in a meaningful way. I appreciate your support and dedication to helping Florida's environment.

Dear Florida Public Service Commission,

Energy efficiency programs play a critical role in lowering energy bills for all customers, especially those that can least afford high energy bills.

Duke Florida's performance on energy efficiency programs is unacceptable - 0.2% of revenue. Utilities in other states like California and New England states are greater than 1.5%. Even Duke Carolinas is 1.09%.

The Florida Public Service Commission needs to set minimum targets at 1% of revenue for energy efficiencies. Florida residents want the Commission to show they care about lowering consumer energy bills and reducing our impact on the environment.

Sincerely,

Name:
