## ROYAL WATERWORKS, INC.

November 7, 2019

Office of Commission Clerk Public Service Commission 2540 Shumard Oak Blvd. Tallahassee, FL 32399

Re: Application for transfer of facilities and Certificate Nos. 259-W and 199-S in Broward County from Royal Utility Company to Royal Waterworks, Inc. – Response to Staff Request

Dear Commission Clerk.

Royal Waterworks, Inc. (Royal) herewith submits its response to staff's data requests.

**Request:** In regards to the above referenced docket, please provide a list of all customer complaints received in 2019. In addition, please provide a list of any improvements that have been made to the system since July 1, 2019.

Response: See attached. The majority of the customer "complaints" or request relate to billing concerns. Several relate to the irrigation meters located at the residents. The residents have two meters — one for domestic use and one for irrigation. Several of the customers requested not to pay the base facility charge when the irrigation is not used. It has been explained that if there is a meter on the property then the utility will charge the base facility charge pursuant to its tariff. If the customer request the meter to be removed, they may be subject to a subsequent meter installation charge when the request service to be reconnected.

For water quality concerns, the lime softening unit needed rehabilitation. Royal took the unit offline at end of August to complete the rehab. The unit was coated with lime sludge and residue and was not functioning properly or efficiently. The unit took approximately 3 weeks to complete the rehab. During this time the water did not go through the softener and some customers experienced scaling and residue. This was due to the naturally occurring calcium in the water supply. In addition the back wash filters also required some rehab and repairs. After these were complete, the water returned to being clear and colorless. (see attached photos) The customers were notified via bill messages on their monthly statements.

There were some complaints on "cloudy" water which were caused by air in the water. This has been corrected with the improvements made by Royal. Finally, there were concerns with "milky" water. This was caused by faulty high service pumps stirring up sediment in the clear well. The high service pump was replaced and the recirculation system was repaired.

Royal Waterworks, Inc. Response to Staff Request November 7, 2019

The water quality at Royal has improved dramatically with the improvements that have either been completed or are in the process of being completed. Royal has received numerous compliments from its customers and the City of Coral Springs after the acquisition. Attached is a listing of these improvements.

Respectfully Submitted,

Troy Rendell Vice President

Investor Owned Utilities

# Royal Waterworks, Inc. Improvements since Acquisition

#### **Water Quality**

#### Accelator

- Chemical Optimization reduction of chemical costs
  - o performed JAR testing
    - process to determine proper chemical doses
  - o testing resulted in signification reduction in use of flocculent
- Rehabilitated Accelator (softening unit) See Attached
  - Drained and removed lime scale buildup (see attached pictures)
  - o Air hammer lime of blades, walls, floors, etc. see attached pictures
  - Improved circulation & treatment
- Relocated chemical application points for more effective treatment
- Replaced bearing & gears for lime mixer
- Repaired concentrator system
- Repaired wash down water system
- > Rebuilt sludge removal system
- Repaired various areas of metal corrosion
- > Painted the softening unit

#### <u>Filters</u>

- Filters replaced the level control systems
- Replaced inlet filter valves
- currently replacing outlet filter valves
- installed a backwash flow meter filter
- process of repairing surface and painting the filters

#### <u>Other</u>

- Painted the ground storage tank
- Replaced a high service pump
- Repaired clear well / ground storage tank recirculation system.
- Reactivated Fluoride feed system to bring into County compliance
- Replacing non-working water meters
- Replaced pressure control system reduction in purchased power
- Changed operating procedure to reduce wasted water in backwash and blowdown (approx 1,000,000 a month in savings per month)
- Aesthetics to water plant located within subdivision removal of trash old equipment
- Repair of non-functional generators for reliability and emergency back up
- Improve fuel storage tanks to bring into County compliance

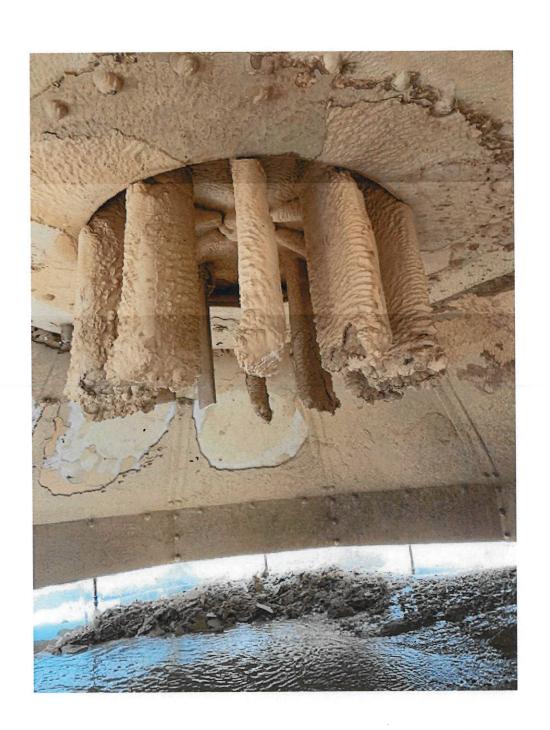

#### <u>Customer Service</u>

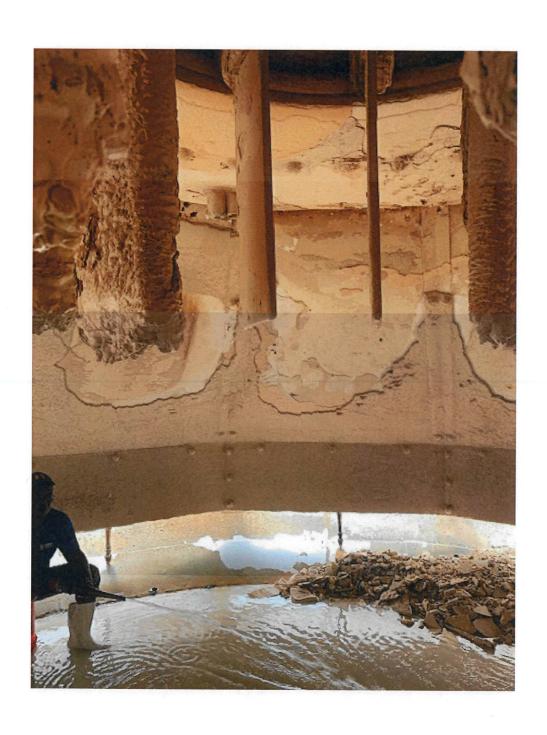

- Staging US Water equipment on-site
  - quicker response time to emergencies (repairs)
  - biggest concern of the City relative to previous owner
- Increase in customer payment options
- Improved customer billing more modernized
- Improved relations with City government

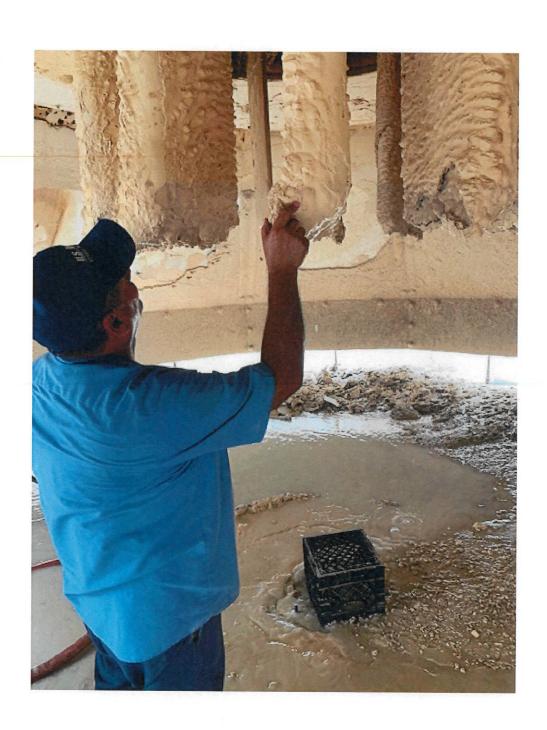

#### Wastewater

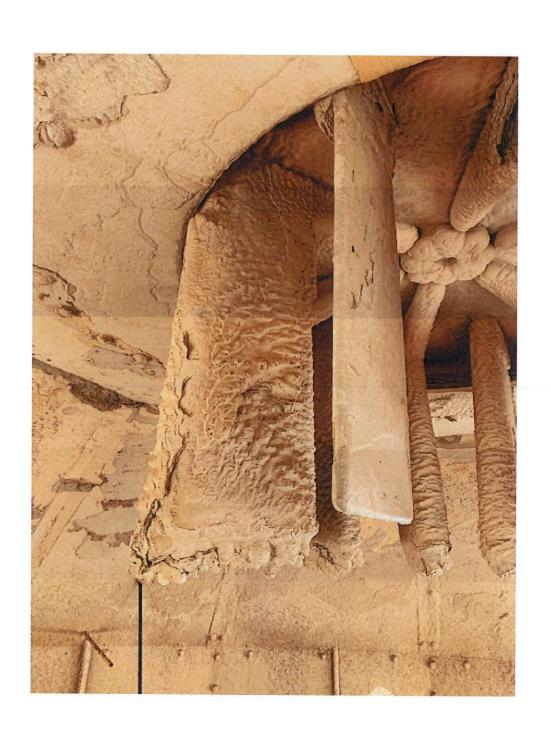

- ✓ Replacing 4 worn out pumps with 2 new properly sized pumps in master lift station expect to reduce purchased power
  - o current run time 30 hours/day new pumps = 8 hrs / day
  - o reduce number of spills and overflows at lift station
- ✓ Evaluation of deteriorated force main

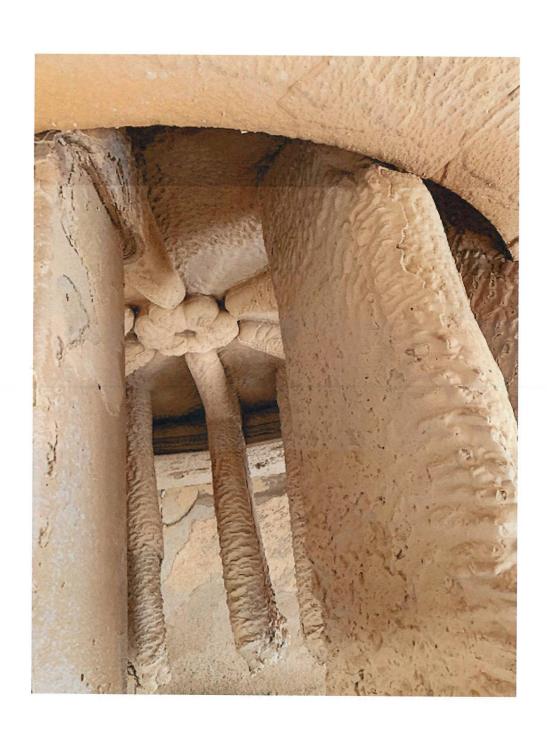

**Better Overall Water Quality**

#### Hello,

I live in the community behind the water faculty.

First and most important my water for the first time in years does not stink! I have pressure enough to wash a dish! So I commend you for that!!

I know that you do monthly federal samples and would like to know if they are published? Am I able to get a copy? I want to thank you for saving our community be providing water that may now be safe to drink!

Thank you,

Hello Team,	
I recieved the complaint	and I personally visited the school.
	untain had some air that literally cleared in 1 minute of running water. Air will make a grab sample and it was good.
We will be flushing syst	em to remove any remaining settlement or air in pipes.
Water Quality is Great a	nd we have been producing excellent water consistently.
These are the numbers for	or your review.;
	ow in service.  of the water being produced from Royal at this time.
Thanks everyone,

Hi Troy/Rita,

Just wanted to inform you that we just received a call from Adriana (954-345-5700) at Sherwood Academy in Royal WW stating that their water is milky/cloudy and undrinkable for students. I did place a call to Candy and she is on it with her team and an s/o has been created. Just wanted to make sure I reported it to you as well.

Let me know if you have any questions.

Re: Water Quality

Good afternoon Mrs. Cristina San Lucas,

I wanted to reach out to you and respond to your concerns about the water Quality.

I apologize for the inconvenience this may have caused your family.

The issue has been addressed and corrected.

Air was in the lines which caused the white water.

The water is safe to drink and the water quality has improved greatly in the last 3 weeks due to the fact that repairs have been completed at the water plant.

We have been working hard to get the system into top shape so we can provide the residents of coral springs the best water possible.

If you have any further questions please feel free to contact me.

Operation Manager Royal Waterworks, Rudy Perez 954-651-2311

Good afternoon Gentlemen.

One of your water customers has recently contacted us concerning a Water Quality Complaint. Please read below to see her comments and the attachments provided. I've made a few attempts to contact your Water plant personnel directly, but was unsuccessful.

Since this complaint is concerning another Utility's product, I can't comment other than to say that the water appearing in the video doesn't look to be normal. Could one of you kindly reply back to her directly.

Thanking you in advance for addressing your customers concerns.

Caution: This email originated from outside of the organization. Do not click links or open attachments unle you recognize the sender and know the content is safe.

Royal Utility,

For about two months the water has yet again let some white residue on my plates, spoons, etc. I recall what Ramblewood claimed previously regarding the water residue. Now there is another issue. I am having a little trouble understanding what is going on with the quality of water. Is it

not being treated? If you could please view the video attached. The water is now not only leaving white residue but is now also cloudy and murky. It is very alarming and I am questioning if Royal Utility is doing their duty to treat the water. I have cc'd Ramblewood East (association) so they are aware of what is going on. I also cc'd the Coral Springs Water Plant Superintendent, Mr. Alvin Jones. I would appreciate a response directly from you, Royal Utility and not a message handed off from you to Ramblewood.

Mr. Jones, though I know you have nothing to do with our water supply at Ramblewood East, if you could please email me and let me know if this murky cloudy water is normal. Last time you answered back promptly and were very helpful. I unfortunately do not recall ever getting a response from Royal Utility, just from Ramblewood.

I have also copied the Mayor and his staff. I would just really like to cook, clean, and bath with clean water. I thank you all for your time.

Regards,

Cristina San Lucas

Board of Directors,

I am in receipt of your email and your letter (attached). Thank you for responding back in writing but I was a bit confused as to you addressing my "complaint" regarding "soap sticking to my skin." Please reference the email date and time when I said my complaint was regarding "soap sticking to my skin." I do not recall that being a concern. On the contrary, my concern was regarding harmful water consumption (hence the subject line of my emails) and me washing my baby's bottles and cooking with the water. In addition, I actually said it left my kitchen towel/rag stiff and left a white residue on my plates and spoon leaving a "sandy" feeling. I even attached pictures and videos to show you what I spoke of.

Also regarding the dripping sound, please reference where in the bylaws it states that the homeowner is responsible for the mainline. The "drip" sound is coming from the within the wall where the mainline is located. I am also requesting a copy of the report/investigation your plumbers provided you with. Both plumbers told me they believed it was a drip, which is contrary to what you are stating. They said they would tell Ron, the VP, if it was okay to open the wall and investigate the matter because BOTH plumbers could not guarantee that it was the expansion and contraction of the pipes. They both said it was from the main white pipe and is why they needed to report it to Ron. Actually, the second plumber and his assistant only mentioned the expansion and contraction of the pipes only after I mentioned what the other plumber said it could possibly be. Please provide me with the report issued by the plumbers stating that it is just a sound.

I thank you for your time in addressing my concerns.

Cristina San Lucas

Re: Royal - Milky/Smelly Water

Gm Lina,

We are close to completing the work on accellator, looking to have system back in service late this week.

No there is not a problem at the plant.

Milky water was due to hsp 1 and 4 faulted

Which activated hsp 2 which is primarily the fire pump this stirred sediment from bottom of clearwell. This issue has been corrected.

Water quality is good other than hard water.

Customer concerns have been address in a timely manner. Closing out w/o sometimes gets delayed, but the team is working on staying in front of it.

Thank you

Subject: Royal - Milky/Smelly Water

Importance: High

Hello,

I wanted to make sure everyone is aware that we have had multiple call ins on the appearance and smell of the water from ROYAL WATERWORKS. Here is a list of all customers who have called. They are reporting "white milky water with awful smell." We did schedule the s/o's to investigate.

9090 NW 41ST MNR (s/o scheduled yesterday)

9188 NW 43<sup>rd</sup> CT.

8262 NW 43<sup>rd</sup> ST.

9175 NW 43<sup>rd</sup> CT.

Please inform OPUS of any other information you would like us to inform the customers if they call as well.

Re: Water Plant Rehabilitation - softener

Troy,

confirmed receipt.

I have discussed the memo with members of the board....we used your email to prepare an announcement for posting in bulletin boards.

Our goal is informative and attempt to reduce the phone traffic towards the Utility....which will increase over the next two weeks.

Again, thank you for presenting these details.

When the Utility performs maintenance and/or will have water quality fluctuations....Ramblewood East will post all information flyers in advance to reduce caller traffic. Allowing your phones to standby for emergency or higher priority issues.

Good morning Nick,

I trust all is well with you. I just wanted to give you a personal "heads-up" that we are conducting a rehab of the water softener at the water plant. We have taken it off line and will more than likely be offline for a couple more weeks. We have been receiving calls concerning discolored water and residue. The residue is caused because the water is not going through the softening process while it is offline.

This rehab is necessary due to years of neglect on the previous owners' part. After we drained the accelerator and went inside it was discovered that there was a tremendous amount of residual and lime sludge that needs to be removed. The owner is down there on-site today checking on the progress. This rehab should increase the quality of the water once complete.

Rest assured the water is safe – but customers may see discolored water or scaling on dishes, dishwashers, glasses, faucets, etc. We will be placing a bill message on the customer's bills next month – but not sure if it will appear on Ramblewood's.

It's important for us to communicate directly with our major customers and the condos.
