To whom it may concern,

I protest this rate increase proposed by Florida Public Utilities. The power purchased by Florida Public Utilities is dropping and this savings should be passed onto the customers. Instead Florida Public Utilities is offsetting the decrease in purchase Power (Fuel adjustment) by increasing their rates! A local hearing should be held to explain why Fernandina Beach area should be paying for benefits received by another area. Also, this seems like an opportunity for Florida Public Utilities to take all the benefits of lower power costs for themselves.

John Mandrick
