Subject: Utilities Inc

Attn: Florida Public Service Commission

Over the past year we have had an over 100% increase in the cost of water, and now once again Utilities Inc is going before the board for another increase in water rates.

At this juncture it is imperative that the Public Service Commission take the consumers interests above the profits of Utilities Inc, after all a recent increase of over 100% indicates that the Commission failed to put the consumer ahead of external interests at the earlier meetings evaluating raising costs to the people.

Water belongs to all Florida residents, and to grossly profit from that which all Floridians have a right to is not equitable, thusly it is requested that the raise being considered for Utilities Inc be denied. Furthermore, it might be prudent to re-evaluate the over 100% increase granted last year, in spite of the company maintaining a profitable position.

Thanking you in advance for your attention and strong consideration to deny any further increases in rates to Utilities Inc.
