Re: Fuel and Purchased Power Cost Recovery Clause with Generating
Performance Incentive Factor; FPSC Docket No. 20200001-EI

Dear Mr. Teitzman:

Attached for filing in the above docket is Tampa Electric Company's Petition for Mid-Course Correction of its Fuel Cost Recovery Factors and Capacity Cost Recovery Factors.

Thank you for your assistance in connection with this matter.

Sincerely,

James D. Beasley

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Fuel and Purchased Power Cost Recovery) DOCKET NO. 20200001-EI
Clause with Generating Performance Incentive)
Factor.) FILED: March 25, 2020
_____)

**PETITION OF TAMPA ELECTRIC COMPANY FOR A MID-COURSE
CORRECTION OF ITS FUEL COST RECOVERY FACTORS AND
CAPACITY COST RECOVERY FACTORS**

Tampa Electric Company (“Tampa Electric” or “company”), pursuant to Rule 25-6.0424, Florida Administrative Code, hereby petitions the Commission for approval of the company’s proposed mid-course correction of its fuel cost recovery factors and capacity cost recovery factors, and in support thereof says:

1. Tampa Electric is an investor-owned electric utility subject to the Commission’s jurisdiction pursuant to Chapter 366, Florida Statutes. Tampa Electric serves retail customers in Hillsborough and portions of Polk, Pinellas, and Pasco Counties in Florida. The company’s principal offices are located at 702 North Franklin Street, Tampa, Florida 33602.

2. The persons to whom all notices and other documents should be sent in connection with this docket are:

(850) 222-7952 (fax)

3. The Commission has jurisdiction pursuant to Sections 366.04, 366.05 and 366.06, Florida Statutes.

4. Tampa Electric is a corporation organized and existing under the laws of the State of Florida and is an electric public utility as defined in Section 366.02(2), Florida Statutes.

5. This Petition is being filed consistent with Rule 28-106.201, Florida Administrative Code. The agency affected is the Florida Public Service Commission, located at 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399. This case does not involve reversal or modification of an agency decision or an agency's proposed action. Therefore, subparagraph (c) and portions of subparagraphs (b), (e), (f) and (g) of subsection (2) of that rule are not applicable to this Petition. In compliance with subparagraph (d), Tampa Electric states that it is not known which, if any, of the issues of material fact set forth in the body of this Petition may be disputed by any others who may plan to participate in this proceeding. The discussion below demonstrates how the petitioner's substantial interests will be affected by the agency determination.

6. Tampa Electric's current fuel and purchased power cost recovery factors ("fuel factors" or "factors") were approved in Order No. PSC-2019-0484-FOF-EI issued November 18, 2019, for application during the period January 2020 through December 2020. The new factors became effective with the first billing cycle for January 2020.

7. In Order No. 13694 issued in Docket No. 840001-EI on September 20, 1984, the Commission authorized each utility to seek modifications to its fuel factors when it appears that its projected fuel revenues will result in an over- or under-recovery in excess of 10 percent.

8. Since the filing, approval, and implementation of Tampa Electric's current factors, the company has monitored its fuel and purchased power cost recovery revenue and expenses on an ongoing basis. Based on updated estimates for 2020, the company now projects that an over-recovery in excess of the 10 percent threshold set forth in Order No. PSC-07-0333-PAA-EI is likely to occur absent a modification to the company's current fuel factors.

9. Tampa Electric expects its total fuel and purchased power over-recovery for 2020 to be \$130,688,586, based on the \$35,821,098 final 2019 over-recovery amount and the \$94,867,488 actual January through February 2020 and estimated reforecast March through December 2020 over-recovery amount shown in Exhibit "A". The re-projected total fuel and net power transactions amount for January 2020 through December 2020 of \$491,985,196 reflects a decrease of \$58,897,397, compared to the original projection. The projected over-recovery for 2020 is over 10 percent greater than Tampa Electric's forecasted jurisdictional system fuel costs for the period on which the current fuel factors are based. Pursuant to Rule 25-6.0424(1)(a), Florida Administrative Code, the estimated percentage calculated using the estimated end-of-period total net true-up divided by the current period's total actual and estimated jurisdictional fuel revenue applicable to the period is 22 percent including the end of 2019 final true-up amount.

10. The primary cause of the over-recovery is a significant decrease in the projected cost of natural gas. With this filing, Tampa Electric also updated its planned power purchases with updated availability and pricing of market power purchases that may substitute for Tampa Electric generation when cost-effective because the price of natural gas affects the power market.

11. Accordingly, Tampa Electric proposes modifications to its fuel factors, effective with the first billing cycle for June 2020. Given the extraordinary economic circumstances of the ongoing pandemic, states of emergency, and customer impacts related to social distancing and business closures, the company proposes to (1) return a portion of the projected over-recovery over a shorter time period, from June 2020 through August 2020 through a line item credit on customers' bills and (2) reduce the fuel factors for the remaining seven months of 2020 to reflect the estimated reforecast over-recovery in 2020. The fuel credit for a residential customer using 1,000 kWh ("typical bill") will be \$18.40 per month for the three-month period, and the total bill reduction will be \$23.37. Beginning in September 2020 through December 2020, the residential typical bill will be \$4.50 lower than the current typical bill.

12. The fuel credit to customers will return approximately \$81 million of the projected over-recovery over the three-month period, and the fuel factors will be reduced for the period June through December 2020 to reflect the remaining \$49 million projected over-recovery amount. This \$81 million credit is calculated by including the \$45,601,340 projected December 2020 ending balance over-recovery amount using the revised fuel factors shown on Exhibit "B," Schedule E2 Supplemental and the \$35,821,098 final 2019 over-recovery amount in the fuel credit. The calculation of the three-month fuel credit is shown on Exhibit "B," Schedule E1-D Supplemental.

13. Attached hereto as Exhibit "B" are revised and updated "E" Schedules which take into account the company's currently projected over-recovery of \$130,688,586 and a recalculation of the fuel factors in a manner designed to eliminate the projected over-recovery with a fuel credit during the period from June through August 2020 and a reduction in the fuel factor for the period June through December 2020.

Tampa Electric hopes to aid customers during this unique time in our history, given the pandemic, by returning the over-recovery amount more quickly than would typically be done.

14. If the proposed fuel credit mid-course methodology is not accepted, then Tampa Electric requests that the mid-course factors shown in Exhibit “C” be approved. Exhibit “C” reflects the typical method of returning the projected over-recovery amount to customers over the remaining seven months of the year, from June 2020 through December 2020. This method also returns the re-projected 2020 end of period total net true-up over-recovery of \$94,867,488 plus the final 2019 true-up over-recovery of \$35,821,098, which is equivalent to \$130,688,586.

15. Attached hereto as Exhibit “C” are revised and updated “E” Schedules which take into account the company’s currently projected over-recovery of \$130,688,586. and a recalculation of the fuel factors in a manner designed to eliminate the projected over-recovery during the period from June 2020 through December 2020.

16. Tampa Electric is also proposing a reduction to its capacity cost recovery factors for use in 2020. Based on updated estimates for 2020, the company now projects that an over-recovery in excess of the 10 percent threshold set forth in Order No. PSC-07-0333-PAA-EI is likely to occur absent a modification to the company’s current capacity adjustment factors. The capacity clause projected over-recovery is caused by including the expected in-service timing true-up amounts for the First and Second SoBRA booked in February 2020, netted against expenses for additional firm power purchase agreements entered since the 2020 factors were set. Based on these updated estimates for 2020, the company now projects an over-recovery of \$2,885,599. The estimated percentage calculated using the estimated end-of-period total net true-up

divided by the current period's total actual and estimated jurisdictional capacity revenue applicable to the period is 182 percent, including the 2019 final true-up amount. Attached hereto as Exhibit "D" is a schedule demonstrating the expected 2020 over-recovery amount absent an adjustment.

17. The projected 2020 capacity over-recovery is \$2,885,599, which is the total to be included in the mid-course adjustment. Tampa Electric did not include the final 2019 capacity true-up over-recovery of \$111,228 in the mid-course adjustment because it is a *de minimus* amount which will be returned to customers in 2021 in the ordinary course of business. Attached as Exhibit "E" are the revised capacity cost recovery schedules to reflect the proposed change in capacity cost recovery factors.

18. Attached hereto as Schedule E10 of Exhibit "B" is a comparison of an average residential bill reflecting the present fuel adjustment and capacity cost recovery factors approved in Order No. PSC-2019-0484-FOF-EI and the modified factors proposed herein.

19. Because the proposed fuel adjustment and capacity cost recovery factor modifications are based on an effective date beginning with the first billing cycle for June 2020, Tampa Electric asks that this petition be given expedited treatment and scheduled for consideration on or before the May 5, 2020 Commission Agenda Conference to allow the company to provide notice to customers. In addition, Tampa Electric requests a waiver of the 30-day customer notice requirement if the petition is considered at the May 5, 2020 Agenda Conference. The company's first billing cycle for June 2020 will occur on June 2, 2020, or 28 days after the May 5th Agenda Conference. Given the relatively small timing difference, the company's ability to post notices of the proposed rate change

on bills and on its website, and the benefit of implementing the lower rates sooner during this extraordinary time, the waiver is warranted.

20. Tampa Electric has consulted with Office of Public Counsel about this petition and is authorized to state that they support the proposed fuel credit methodology described in paragraphs 11 through 13 and Exhibit “B” of this petition.

WHEREFORE, Tampa Electric urges the Commission to approve the company’s proposed modifications to its fuel and purchased power cost recovery factors and capacity cost recovery factors as set forth in the schedules attached hereto, for application on customer bills beginning with bills for June 2020 and thereafter until modified by subsequent Commission order. To achieve the forgoing effective date, the company further requests that this matter be given expedited treatment and considered by the Commission on or before the May 5, 2020 Agenda Conference.

DATED this 25th day of March, 2020.

Respectfully submitted,

JAMES D. BEASLEY

ESTIMATED FOR THE PERIOD: JANUARY 2020 THROUGH DECEMBER 2020**

SCHEDULE E1

	DOLLARS	MWH	CENTS/KWH
1. Fuel Cost of System Net Generation (E3)	442,544,128	18,956,176	2.33456
2. Nuclear Fuel Disposal Cost	0	0	0.00000
3. Coal Car Investment	0	0	0.00000
4a. Big Bend Units 1-4 Igniters Conversion Project	1,657,348	18,956,176 ⁽¹⁾	0.00874
4b. Adjustment	0	18,956,176 ⁽¹⁾	0.00000
5. TOTAL COST OF GENERATED POWER (LINES 1 THROUGH 4b)	444,201,476	18,956,176	2.34331
6. Fuel Cost of Purchased Power - System (Exclusive of Economy)(E7)	906,841	23,940	3.78797
7. Energy Cost of Economy Purchases (E9)	43,677,129	1,476,209	2.95874
8. Demand and Non-Fuel Cost of Purchased Power	0	0	0.00000
9. Energy Payments to Qualifying Facilities (E8)	3,504,446	123,937	2.82760
10. TOTAL COST OF PURCHASED POWER (LINES 6 THROUGH 9)	48,088,416	1,624,086	2.96095
11. TOTAL AVAILABLE KWH (LINE 5 + LINE 10)		20,580,262	
12. Fuel Cost of Schedule D Sales - Jurisd. (E6)	256,411	13,365	1.91853
13. Fuel Cost of Market Based Sales - Jurisd. (E6)	20,285	1,050	1.93186
14. Gains on Sales	28,000	NA	NA
15. TOTAL FUEL COST AND GAINS OF POWER SALES	304,695	14,415	2.11374
16. Net Inadvertant Interchange		0	
17. Wheeling Received Less Wheeling Delivered		0	
18. Interchange and Wheeling Losses		307	
19. TOTAL FUEL AND NET POWER TRANSACTIONS (LINE 5+10-15+16+17-18)	491,985,197	20,565,540	2.39228
20. Net Unbilled	NA ^{(1)(a)}	NA ^(a)	NA
21. Company Use	889,928 ⁽¹⁾	37,200	0.00457
22. T & D Losses	24,886,494 ⁽¹⁾	1,040,283	0.12770
23. System MWH Sales	491,985,197	19,488,057	2.52455
24. Wholesale MWH Sales	(0)	0	0.00000
25. Jurisdictional MWH Sales	491,985,196	19,488,057	2.52455
26. Jurisdictional Loss Multiplier			1.00000
27. Jurisdictional MWH Sales Adjusted for Line Loss	491,985,196	19,488,057	2.52455
28. Optimization Mechanism ⁽²⁾	1,120,353	19,488,057	0.00575
29. True-up ⁽²⁾ Including 2019 Final Over Recovery	(80,972,263)	12,341,316	(0.65611)
30. Total Jurisdictional Fuel Cost (Excl. GPIF)	412,133,286	19,488,057	1.87419
31. Revenue Tax Factor			1.00072
32. Fuel Factor (Excl. GPIF) Adjusted for Taxes	412,430,022	19,488,057	1.87554
33. GPIF Adjusted for Taxes ⁽²⁾	4,141,330	19,488,057	0.02125
34. Fuel Factor Adjusted for Taxes Including GPIF	416,571,352	19,488,057	1.89679
35. Fuel Factor Rounded to Nearest .001 cents per KWH			1.897

^(a) Data not available at this time.

⁽¹⁾ Included For Informational Purposes Only

⁽²⁾ Calculation Based on Jurisdictional MWH Sales

**TAMPA ELECTRIC COMPANY
 INCENTIVE FACTOR AND TRUE-UP FACTOR
 FOR THE PERIOD: JUNE 2020 THROUGH DECEMBER 2020**

SCHEDULE E1-C

1. TOTAL AMOUNT OF ADJUSTMENTS			
A.	GENERATING PERFORMANCE INCENTIVE REWARD / (PENALTY) (January 2020 through December 2020)	\$4,141,330	
B.	TRUE-UP OVER / (UNDER) RECOVERED (ending May 2020 Over Recovery)	\$45,151,165	
C.	TRUE-UP OVER / (UNDER) RECOVERED (2019 Final Over Recovery) True-Up filed Mar 2, 2020 Doc 2 Line 11	\$35,821,098	
D.	OPTIMIZATION MECHANISM GAIN / (LOSS) (January 2020 through December 2020)	\$1,120,353	
2. TOTAL SALES			
	(June 2020 through December 2020)	12,341,316	MWh
	(January 2020 through December 2020)	19,488,057	MWh
3. ADJUSTMENT FACTORS			
A.	GENERATING PERFORMANCE INCENTIVE FACTOR (January-December) (Using Effective MWh Sales of 19,474,612)	0.0213	Cents/kWh
B.	TRUE-UP FACTOR ENDING MAY 2020 (June-December) (Using Effective MWh Sales of 12,325,761)	(0.3663)	Cents/kWh
C.	TRUE-UP FACTOR 2019 FINAL OVER RECOVERY (June-December) (Using Effective MWh Sales of 12,325,761)	(0.2906)	Cents/kWh
D.	OPTIMIZATION MECHANISM FACTOR (January-December) (Using Effective MWh Sales of 19,474,612)	0.0058	Cents/kWh
