BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Fuel and Purchased Power Cost Recovery
Clause with Generating Performance Incentive Factor

Docket No: 20200001-EI

Filed: April 1, 2020

**PETITION OF GULF POWER COMPANY
FOR MID-COURSE CORRECTION**

Gulf Power Company (“Gulf Power,” “Gulf,” or “the Company”) hereby petitions the Commission to approve a \$51.3 million decrease in the amount to be recovered through its Fuel and Purchased Power Cost Recovery (“FCR”) Clause. In light of the COVID-19 public health pandemic and resulting economic disruption being experienced by a substantial number of customers, Gulf also seeks to flow back this over recovery to customers as quickly as possible, such that customers will see a significant one-time reduction in the bill for the month of May. As described below, the typical residential customer would receive the benefit of a one-time bill credit resulting in a bill decrease of 40 percent as a result of lower than projected natural gas costs. Accordingly, Gulf respectfully requests that the Commission consider this Petition at a Special Agenda Conference on or before April 30, 2020 and, at that time, approve the bill reduction to be applied to all customer bills for the month of May, beginning April 30, 2020. Attachment I, included with this Petition, details the new factors, and calculations associated with the mid-course correction. Attachment II contains the proposed tariff for the May mid-course credit by rate group in both legislative and clean format. Attachment III contains a tariff that cancels the May mid-course credit and reserves it for future use. In support of this Petition, Gulf states:

1. Gulf is a utility subject to the jurisdiction of the Florida Public Service Commission pursuant to Chapter 366, Florida Statutes. It has principal offices located at One Energy Place, Pensacola, Florida 32520.

2. All notices, pleadings and other communications required to be served on the petitioner should be directed to:

Russell A. Badders
Vice President and General Counsel
Gulf Power Company
One Energy Place
Pensacola, FL 32520-0100

Kenneth A. Hoffman
Vice President - Regulatory Affairs
Florida Power & Light Company
134 W. Jefferson Street
Tallahassee, FL 32301-1859

3. This Petition is being filed consistent with Rule 28-106.201, Florida Administrative Code (“FAC”). The agency affected is the Florida Public Service Commission, located at 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399. This case does not involve reversal or modification of an agency decision or an agency’s proposed action. Therefore, subparagraph (c) and portions of subparagraphs (b), (e), (f) and (g) of subsection (2) of that rule are not applicable to this Petition. In compliance with subparagraph (d), Gulf states that it is not known which, if any, of the issues of material fact set forth in the body of this Petition may be disputed by any others who may plan to participate in this proceeding. The discussion below demonstrates how the petitioner’s substantial interests will be affected by the agency determination.

Gulf is over-recovering under the current 2020 fuel factors

4. Gulf’s currently authorized 2020 fuel factors were approved by the Commission in Order No. PSC-2019-0484-FOF-EI (“Order 0484”), issued on November 18, 2019 in Docket No. 20190001-EI. The factors are based on projected fuel costs for 2020, plus the final true-up amount for 2018 and an actual/estimated true-up amount for 2019.

5. 2020 Projection Period. Gulf based its original 2020 projected cost on a forward curve as of the close of business July 26, 2019. Based on that curve, Gulf originally projected the average 2020 cost of natural gas to be \$3.39 per MMBtu. Natural gas prices for 2020 have declined substantially since that time. Based on the forward curve as of March 17, 2020, Gulf estimates the average cost of natural gas in 2020 to be \$2.57 per MMBtu, a decrease of approximately 24

percent. For 2020, Gulf projects its generation mix on a MWh basis will be approximately 67 percent natural gas. Therefore, a decrease in the projected cost of natural gas for Gulf is expected to significantly decrease its fuel expense.

6. Gulf's September 2019 Projection filing set forth a fuel clause revenue requirement of \$355.3 million for January through December 2020. Gulf now estimates that its current 2020 FCR factors will produce an over-recovery for 2020 fuel costs of \$47.7 million by the end of the year.

7. 2019 period. As noted above, the current 2020 factors include an actual/estimated true-up amount for 2019. Gulf's July 2019 filing estimated, and included in the 2020 fuel factors, a clause under-recovery true-up of \$5.2 million for January through December 2019. The actual 2019 fuel clause true-up reflects an actual over-recovery of \$3.7 million, resulting in a final over-recovery of \$8.9 million. The 2020 projected over-recovery of \$47.7 million together with the additional 2019 over-recovery of \$ 3.6 million brings the total over-recovery position to approximately \$51.3 million. This balance represents a 14.7 percent reduction.

Gulf's Mid-Course Correction

8. Gulf requests approval to flow back the \$51.3 million over-recovery associated with the January through December 2020 period through a mid-course correction. Rule 25-6.0424(2), FAC, which governs petitions for mid-course corrections, provides that utilities must report over-recoveries and under recoveries that are projected to exceed 10 percent of total fuel costs. As a result of the substantial decline in natural gas prices since Gulf filed its 2020 fuel projections, Gulf projects an over-recovery that exceeds its 2020 fuel projections by 14.7 percent. Mid-course corrections are typically flowed back to customers by revising the fuel factor over the remaining months of the period. Gulf supports this established methodology and does not seek through this petition to alter that framework going forward. However, these are not typical times.

The COVID-19 pandemic has resulted in executive orders from the federal, state and local governments instructing residents to maintain social distancing to the extent possible, with many non-essential business closing its doors or limiting their operations. This, in turn, has had and may continue to have adverse economic impacts across the state. A total of 74,021 Floridians filed for unemployment benefits during the third week of March alone, a figure that far outpaces the old one-week record of 40,403 set in 2009 during the Great Recession. Under these extraordinary circumstances, Gulf seeks approval for a mid-course correction that departs from the established approach of spreading the decreased fuel factor over the remaining months in the period.

Flow-back period.

9. Gulf proposes that the projected \$51.3 million over-recovery be flowed back to customers through a bill credit in the month of May 2020, rather than the spreading the bill reduction over the remaining seven months of the year. Compressing the flow-back period to one month will effectively infuse customers with the largest bill reduction possible, which Gulf believes is warranted in view of the current, unprecedented public emergency. Gulf intends to implement the one month bill reduction for customers by applying a line item credit for the May billing cycle. Accordingly, June through December 2020 bills will be unaffected by the mid-course correction and will reflect the applicable fuel factors approved in Order 0484.

Bill impact

10. If this Petition is approved, a typical, 1,000-kWh monthly residential customer bill for the month of May 2020 would be \$84.04, a decrease of \$56.39 or 40%. The 1,000 kWh residential bill includes a base rate charge of \$68.06, a fuel cost recovery charge of \$32.62, a one-time credit of \$54.98, a conservation cost recovery charge of \$0.60, a capacity cost recovery charge of \$8.78, an environmental cost recovery charge of \$18.86, a storm surcharge of \$8.00, and a gross receipts tax of \$2.10. See Attachment 1, Schedule E10, page 29.

Requested Expedited Treatment

11. Gulf is requesting that the Commission authorize the Company to apply the bill reduction to customer bills at the start of the May 2020 billing cycle (i.e., April 30). Accordingly, Gulf requests expedited consideration of this Petition, and that the Commission convene a special agenda conference to occur on or before April 30.

12. Additionally, while the Commission typically provides for mid-course corrections to become effective at least 30 days after they have been approved in order to provide notice to customers of the changes to their FCR factors, Gulf requests that the Commission approve the mid-course correction without the typical 30 days' notice. A shorter notice period is appropriate under the current exigent circumstances and the fact that the mid-course correction would implement a bill credit and thereby benefit customers. Gulf has in fact provided notice of this request for a mid-course correction in its April customer bills, subject to Commission approval. Applying the bill reduction beginning on April 30, 2020 would provide customers reduced bills as quickly as administratively possible. Indeed, the Commission has allowed refunds or rate changes to become effective in fewer than 30 days where appropriate. See, e.g., Order No. 16-0120-PCO, Docket 160001-EI, issued March 21, 2016.

WHEREFORE, Gulf Power Company respectfully requests that the Commission approve the above-described mid-course correction, and that the Commission approve application of the bill reduction as described herein to customers' May bills beginning April 30, 2020.

Respectfully submitted,

RUSSELL A. BADDERS
Vice President & Associate General Counsel
