RESPONSE:

The forecasts presented in Gulf Power's 2019 TYSP were developed prior to Hurricane Michael and did not reflect the impacts on customers and sales. Additionally, the 2019 sales reported in the 2020 TYSP are actuals which include the impacts of weather, whereas the 2019 sales reported in the 2019 TYSP are forecasts which assume normal weather.

QUESTION:

Please respond to the following questions based on FPL & Gulf's best information available:

- a. Referring to Schedules 2.1 and 2.2, please discuss how the Company's Forecast of Energy Consumption (GWH) of each customer class (Residential, Commercial and Industrial) would be expected to change (i.e. increase, decrease, and to what degree, in general terms) if updated to reflect the impacts of the COVID-19 Pandemic for 2020.
- b. Referring to Schedule 2.2, please discuss how the Total Sales to Ultimate Customers (GWH) would be expected to change (i.e. increase, decrease, and to what degree, in general terms) if updated to reflect the impacts of the COVID-19 Pandemic for 2020 through 2022.

RESPONSE:

Because the economic impacts of the COVID-19 pandemic are still highly uncertain at this time, FPL and Gulf Power are unable to quantify the impacts to energy sales.
