Good Morning, Kathy Freeman

We will be placing your comments below in consumer correspondence in Docket No. 20200181-EU and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz  
Commission Deputy Clerk II  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399

Subject: Docket No. 20200181; Fix FEECA Now

Dear Clerk Florida PSC Clerk,

Florida's largest utilities badly trail leading utilities in the Southeast and across the nation in delivering energy savings to customers. That's short-sighted because energy efficiency is the quickest, cheapest, and cleanest way to meet our energy needs and tackle climate change – but outdated practices in setting state energy efficiency goals are holding us back. Let's fix that through this rulemaking process.

As you consider changes to your goal setting rule, I ask that you reform the cost-effectiveness and screening practices that previously led many utilities to propose goals of zero to this Commission. I understand that Florida is the only state that relies primarily on these practices.

Florida especially, with its climate and solar potential, can use energy efficiency to lower per-capita energy use which is key to getting our society to run on 100% renewable energy. There are many changes that could be made to building and energy use that could reduce waste and save customers money.

Technology is changing rapidly and we are in a climate crisis. It's time to orient processes to our future and not the past.

Thank you for considering my comment.

Sincerely,  
Kathy Freeman  
Melbourne, FL 32901
