Subject: Docket No. 20200181; Fix FEECA Now

Dear Clerk Florida PSC Clerk,

As I mentioned in my statements in the previous hearing, Florida's largest utilities badly trail leading utilities in the Southeast and across the nation in delivering energy savings to customers. That's short-sighted because energy efficiency is the quickest, cheapest, and cleanest way to meet our energy needs and tackle climate change – but outdated practices in setting state energy efficiency goals are holding us back. As you consider changes to your goal setting rule, I ask that you reform the cost-effectiveness and screening practices that previously led many utilities to propose goals of zero to this Commission. I understand that Florida is the only state that relies primarily on these practices. Now is the time to remove the roadblocks to energy savings in order to provide more and better energy efficiency programs to customers.

Sincerely,
Zelalem Adefris
