Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Judy Kane
Tarpon Springs, FL 34689

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

I power my home with solar energy. I believe we should eliminate or at least lessen our dependency on fossil fuels and coal to preserve the planet and for our health and well-being.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Jan Jennings
1828 Crown Point Woods Cir Ocoee, FL 34761-3719

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

Solar paneling is our sustainable future. It is in our interest as Americans and Floridians to have the benefit to solar power for homeowners and businesses of net metering for power use.

Amid a public health and economic crisis is not the time to make changes to solar rights that will hurt jobs and take money out of people's pockets.

Going into the pandemic, Florida ranked fourth among the states in electricity produced from solar panels, sustaining an industry employing more than 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, employing 250,000 people. Due to the pandemic, Florida has already lost 22 percent of its workforce due to economic uncertainty, and this could get worse.

It only make sense that Florida people and businesses be able to choose how they power their lives. Solar panels and batteries contribute to the resilience of the electric grid. During hurricane season, Floridians need more tools – not fewer – to weather storms. Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,
Jean Etsinger
